Classic English Junior Level 9 - Unit 5 - Lesson 3

When an Earthquake Strikes

We are going to learn how to survive an earthquake.

Warm-up 2 min

Have you ever experienced an earthquake?
What do you know about earthquakes?

Reading 4 min

Read with the teacher and then answer the question below.

Earthquakes are among the most **destructive** natural disasters. They cannot be avoided, but your chances of **survival** are much better if you know what to do when an earthquake **strikes**.

What other destructive natural disasters do you know?

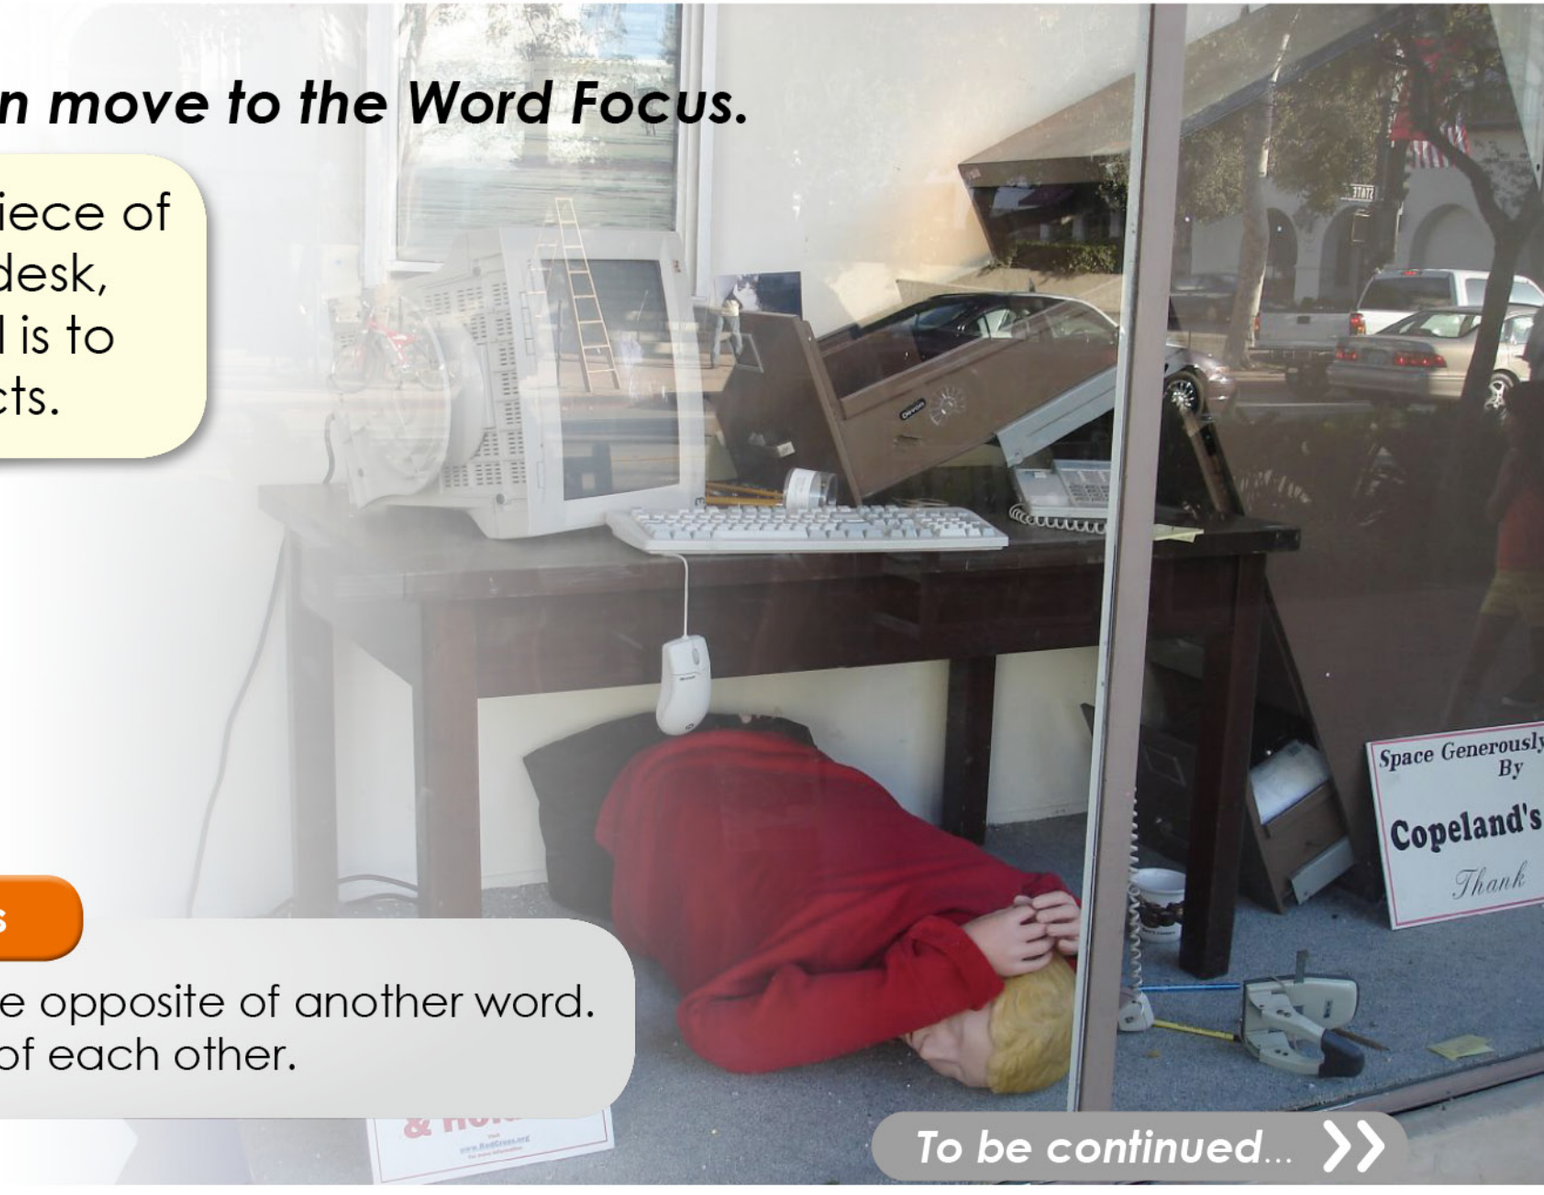
Reading 3 min

Read with the teacher and then move to the Word Focus.

If you are indoors, hide under a piece of **sturdy** furniture, such as a **strong** desk, rather than a **weak** one. The goal is to protect yourself from falling objects.



Word Focus

- An **antonym** is a word that means the opposite of another word.
- "**Strong**" and "**weak**" are **antonyms** of each other.

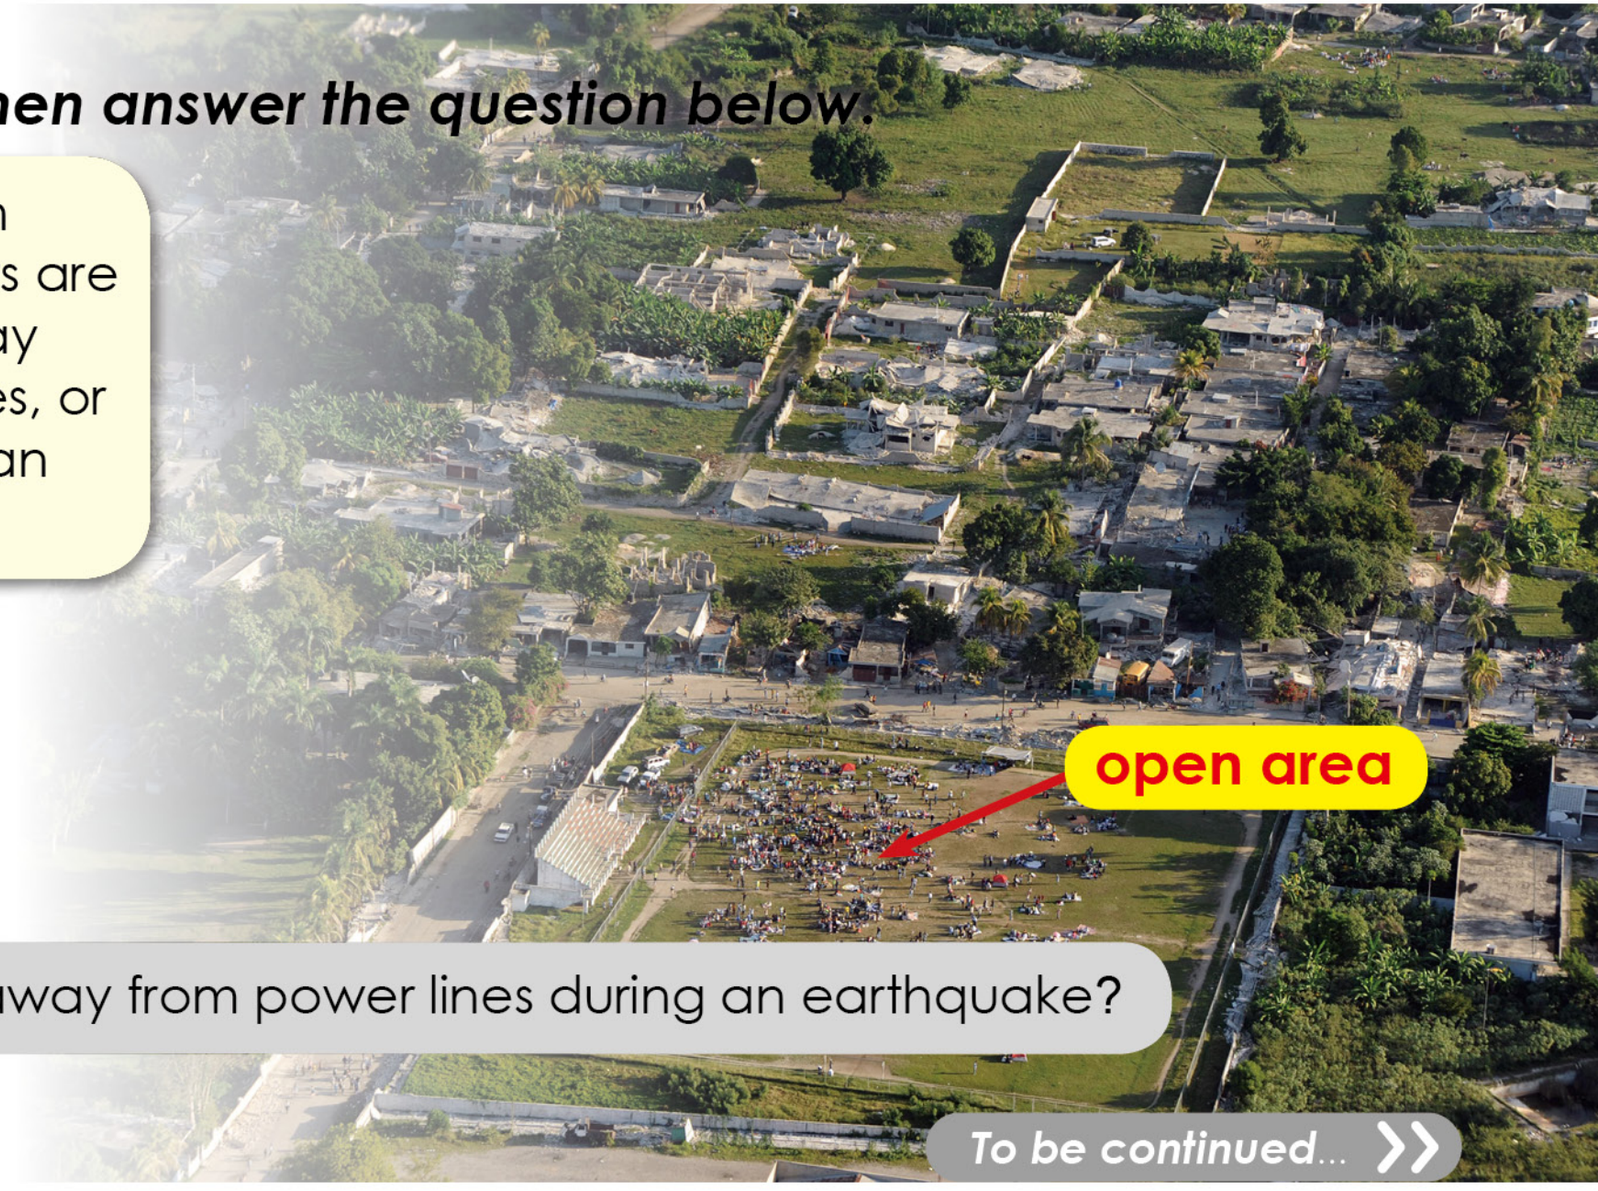
Reading 3 min

Read with the teacher and then answer the question below.

If you are outdoors, move to an open area where falling objects are unlikely to strike you. Move away from buildings, **power lines**, trees, or anything large or heavy that can fall on you.



Why should you move away from power lines during an earthquake?

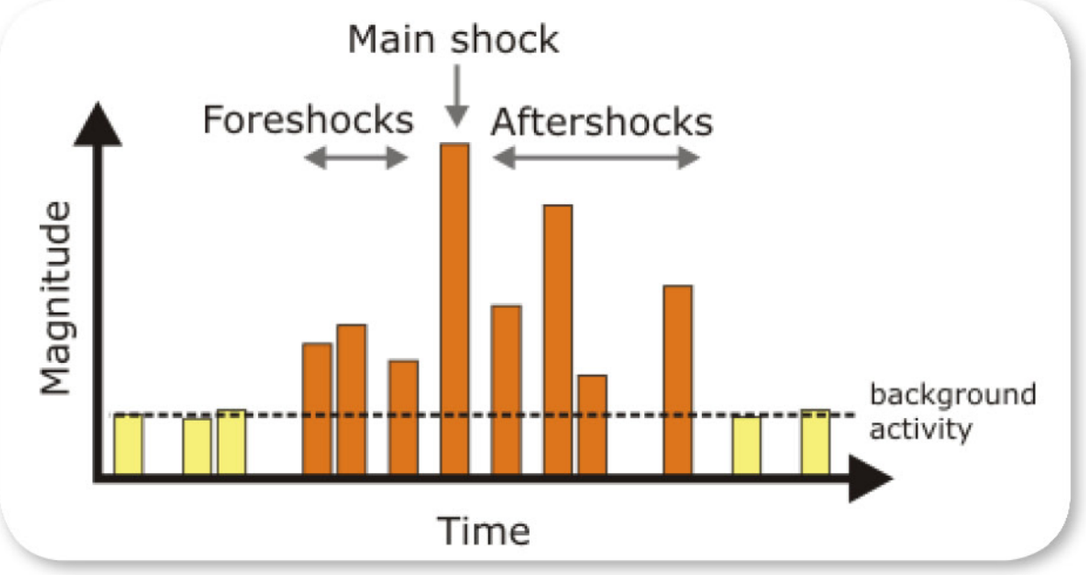
Reading 4 min

Read with the teacher and then answer the question below.

No matter whether you are indoors or outdoors, wait a moment after the first quake before moving to another place. The aftershocks right after an earthquake are usually the strongest. When you do leave, take care that **debris** does not fall on you.



Why should you wait after the first quake before you move?

Let's practice.
