Glossary 9

Arthropods

invertebrate

a living creature
that does
not have a
backbone

Arthropods are invertebrates that live almost everywhere around us. It's the largest group of animal. About 85% of animals in the world are arthropods!

The easiest way to tell an arthropod from any other animal is to see if they have: a **segmented** body, many **jointed** legs or limbs, a hard outer body and cold blood. Arthropods include spiders, ants, lobsters, crabs, shrimp and many, many others. They fly, they **creep**, and they **crawl**. They live on land, in ponds, and in the ocean.

Fish

How do fish breathe?

Fish are vertebrates that live in water. They have **gills**, scales, and **fins** on their body. Fish live in different bodies of water. They live in seas, rivers, and lakes. Some of them even hop onto land.

Fish **breathe** through their gills and use their fins and tails to swim. They lay eggs in the water or on water plants. There are more than 30 thousand kinds of fish in the world. Fish come in a variety of colors and shapes. The clownfish is one of the most beautiful fish in the world. It has bright colors.

Amphibians

toad

a small animal that looks like a large frog and lives mostly on land

nwt

a small animal with a long body, four short legs, and a tail, which lives partly in water and partly on land

How many kinds of amphibians are there?

Amphibians are vertebrates that spend their lives in the water and on land. They are born in water with gills and tails. As they grow, they develop **lungs** and legs so that they can live on land.

Amphibians are cold-blooded. That is to say, their temperature changes with the air or water around them. There are more than 4,000 different kinds of amphibians. Members of this animal class are frogs, toads, nwts, etc.

Glossary

- **invertebrate**

a living creature that does not have a backbone

- **toad**

a small animal that looks like a large frog and lives mostly on land

A feature of an informational text: **Glossary**

- **newt**

a small animal with a long body, four short legs, and a tail, which lives partly in water and partly on land
