

Are You Ready?

Listen to me.

Eyes on me.

The First Plane

You are going to learn:

Topic: Transport — The first plane

Words: invent, wing, float, flight

Grammar: Transitive verb

Sing a Song

DOWN BY THE STATION

Down by the sta-tion, early in the morn-ing,
See the lit-tle puf-fer bel-lies all in a row,
See the en-gine dri-ver pull the lit-tle han-dle,
“Chug-chug, toot-toot!” Off we go!

Let's prepare!

Vocabulary

Thomas Edison helped
invent the light bulb.

in·vent

What would you like to invent?

Vocabulary

The parrot flapped its **wings**.

wing

Which are wings?
Circle them.

Vocabulary

Boats can **float** on water.

float

Which picture shows float?

Vocabulary

TIME	DESTINATION	FLIGHT	GATE	REMARKS
13:08	HONG KONG	HK591	13	CANCELLED
13:24	NEW YORK	NY880	20	ON TIME
13:44	LONDON	LN472	16	DELAYED

14:34	SYDNEY	SY560	11	DELAYED
14:55	ROME	RM379	36	CANCELLED
ABCDEFGHIJKLMNOPQRSTUVWXYZ0123456789:=-				

The **flight** to New York
will take off at 13:24.

flight

Can you circle the flight to Rome?

Grammar

He eats ice cream.

transitive
verb

specific noun

1

drive

2

clap

Let's read!

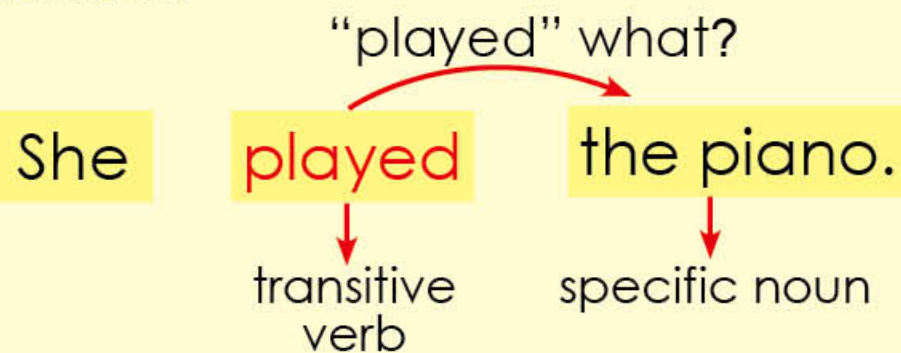

Who invented the first plane?

The first plane was **invented** in 1903 by the two brothers Orville and Wilbur Wright, who **ran** a bicycle shop. Thanks to them, we can fly anywhere around the world.

Grammar

Transitive verb

A transitive verb is an action verb that indicates that the subject of the sentence is doing something to a specific noun.

e.g. He drank water.

The brothers grew up in America. They enjoyed making kites and playing with the flying toy that their father gave them. They also loved inventing things.

What did the brothers enjoy doing when they were growing up?

The brothers began to study how birds fly. They noticed how different parts of birds' **wings** move around to help them fly up, down, left and right.

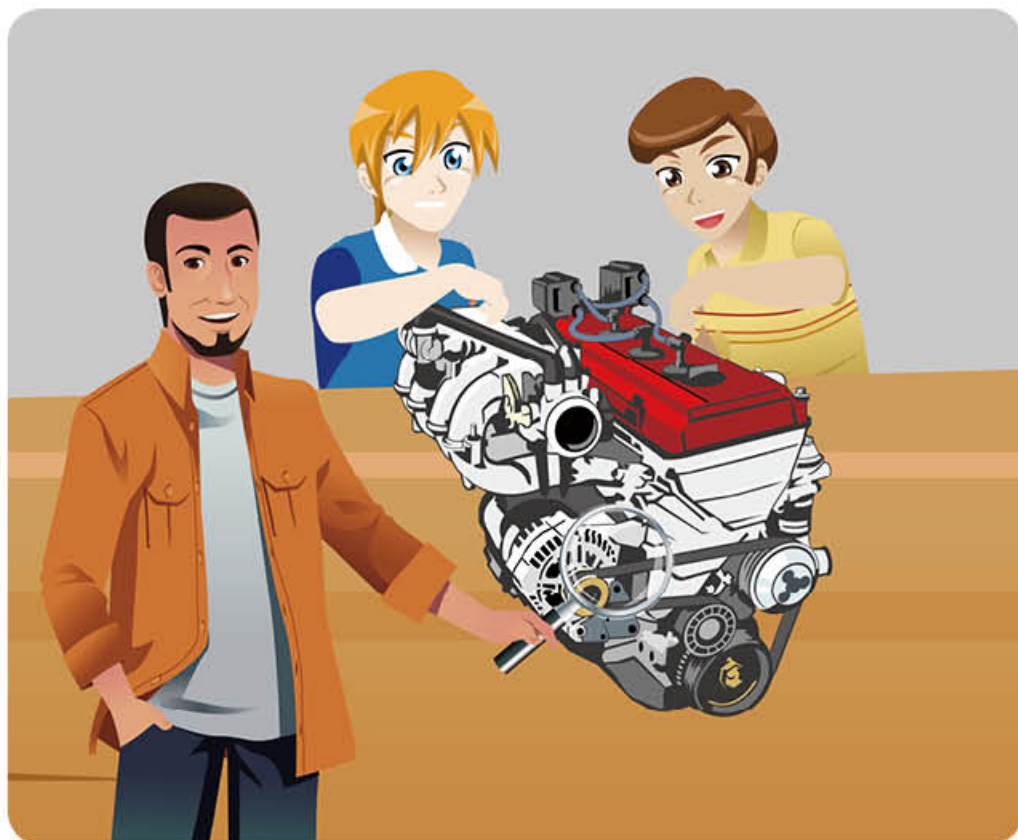

What do birds' wings help them do?

Flying also needs a plane that is very light. They learned a lot from studying gliders — planes that **float** on the wind. They also built several wind machines to help them test their planes.

What are gliders?

Of course, planes need power too. The engine had to be strong enough to fly, and also very light. They asked many people, but finally the engine was made by the mechanic that worked in their own bicycle shop!

Who made the engine?

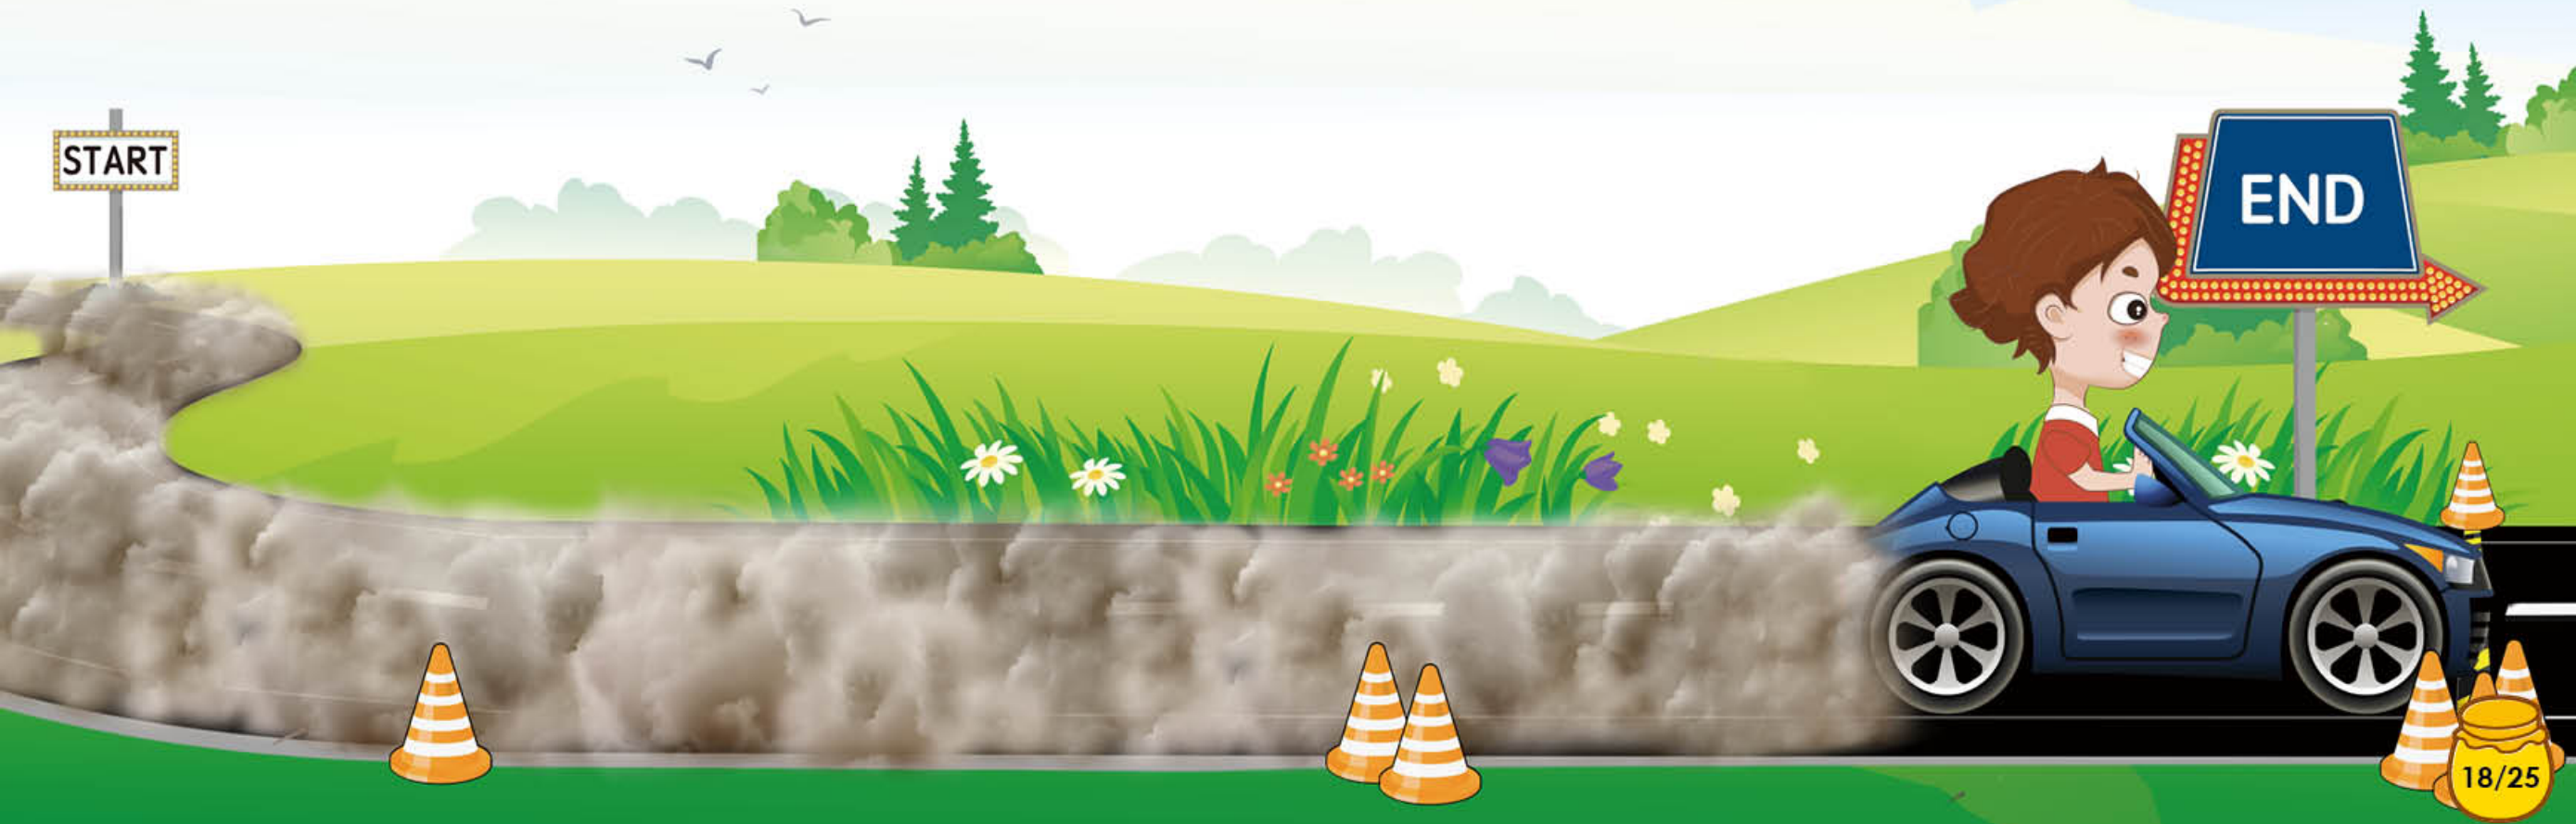

The first plane **flight** was somewhere very safe. There was lots of sand on the ground, which made it much safer if the plane crashed! The first flight distance was only around 260 meters, but soon increased to many kilometers!

What kind of place was used for the first flight?

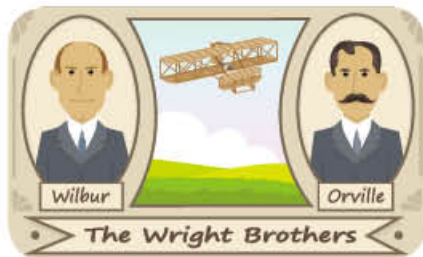

Let's practice!

Activity

Complete the sentences.

The two brothers
wanted to _____
a plane.

They noticed how
different parts of
birds' _____ move.

They learned a lot from
studying gliders that
_____ on the wind.

Word Bank
float wings
flight invent

The first _____ covered only
about 260 meters.

Activity

Match and say.

He has a fever.

He can't go to school.

The two brothers wanted to invent planes.

Now we can fly anywhere.

Planes need power.

They studied birds and gliders.

They invented the first plane.

They made an engine.

Activity

Read and correct the information.

01

ran a bike shop

02

grew up in Britain

03

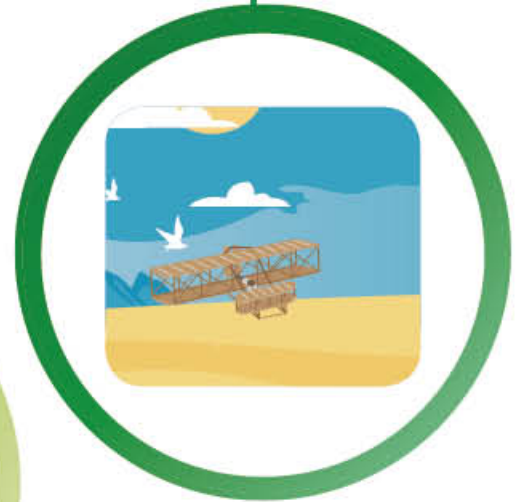

loved making kites

04

liked playing with
running toys

05

invented gliders

Writing Preparation

Prepare for your writing by answering the question.

Let's talk!

What do you know about the two brothers Orville and Wilbur Wright?

A large yellow rectangular box for writing the answer.

Writing Project

Write a passage about the two brothers Orville and Wilbur Wright.

Today I learned:

Topic

Transport—
The first plane

Words

invent

wing

float

flight

Grammar

Transitive verb

e.g. The first plane
was invented in 1903
by the two brothers
Orville and Wilbur
Wright, who **ran** a
