Logs can be used to build houses.

log

Which are logs?

Many families put **mats** in front of their doors.

mat

Do you have a mat in your home?

What **is** butter
made from?

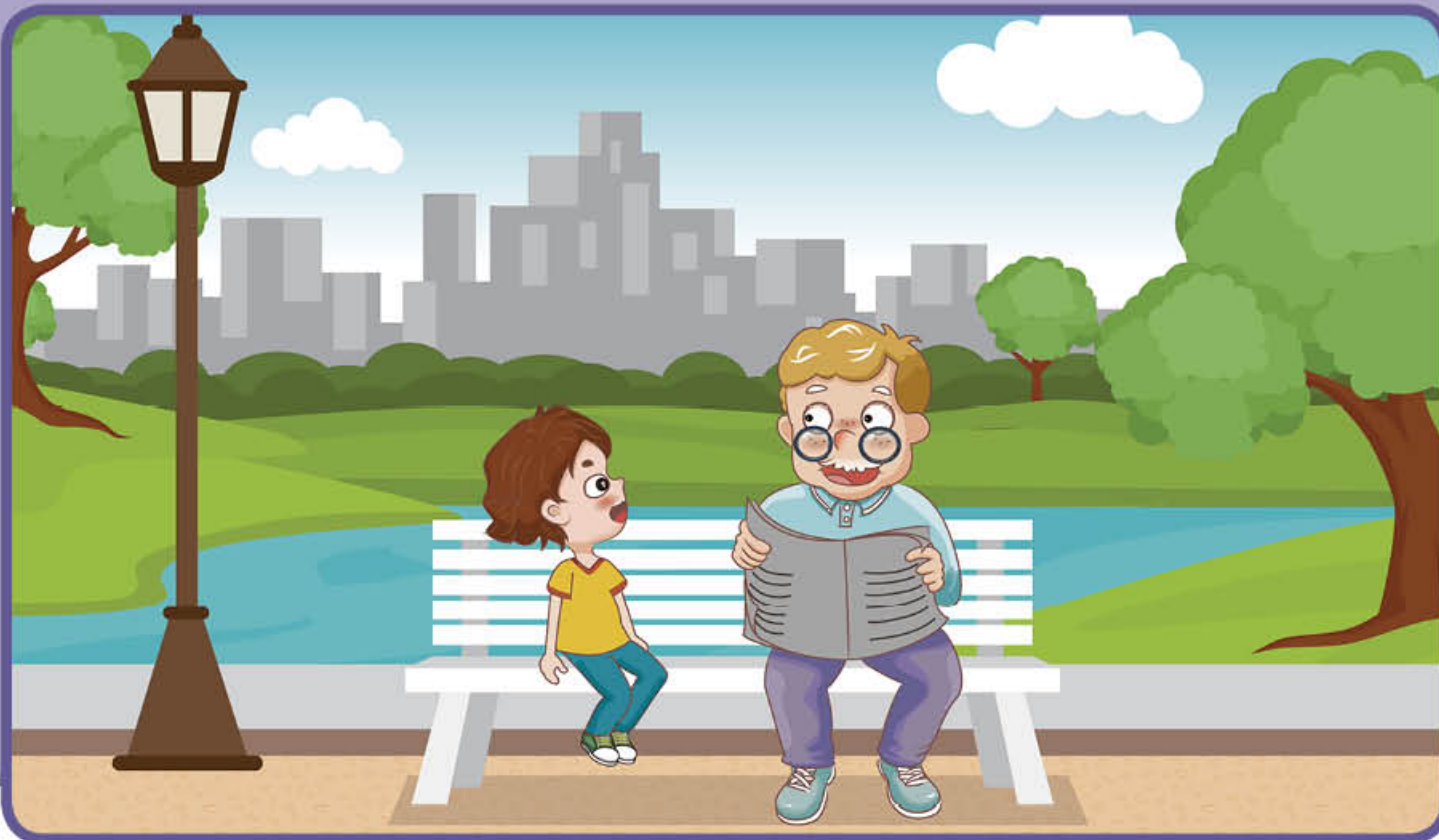

Butter **is made**
from milk.

Let's talk !

Introduction.

Timmy and his grandpa are in the park. They are talking about what trees can be used for.

Grandpa, the air
here is so fresh!

Yeah, there are lots of trees
in the park and they clean
the air. Trees are very useful
to people, aren't they?

Yes! And trees give us wood, which helps us make things like this bench. Even my pencils are made of wood. Lots of things come from trees.

That's right. But do you know that paper **is made from** wood?

Really? How? I've never thought about it. But it must start from **cutting down** trees, right?

Right. Then the **logs** are sent to the paper factory, where they are chopped into tiny pieces of wood. These pieces are then boiled in water with a few **chemicals**.

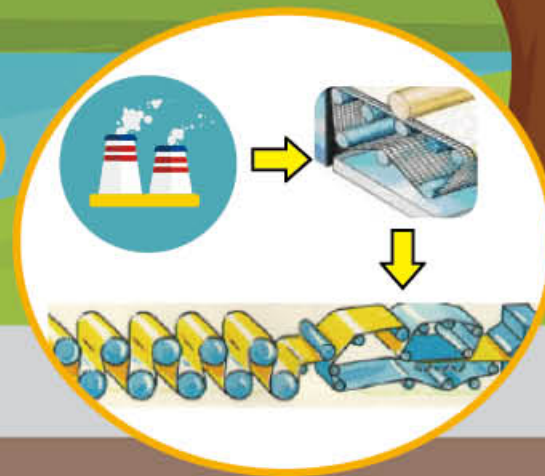

It sounds complicated.
What's next?

Wow, that's amazing!
Trees are really useful!

Next, people drain out the water and get a kind of **mat**. After that, the mat passes through a special machine. When it becomes thinner and drier, we get paper.

Let's practice !

Recall and answer.

What can we make with wood?

We can make...

Recall and answer.

Can you recall the steps of making paper?

step1

step2

First, we need to..., then the logs...

Hints:

cut down
chop into
chemical

To be continued on the next page.

Recall and answer.

What's next after we boil the wood pieces with chemicals?

We drain out the water and we get...

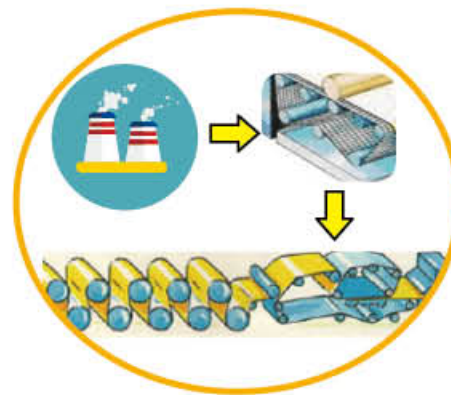

What's the last step of making paper?

...

Hints: mat pass through

step3

step4

Today I learned:

Topic

Materials —
Useful trees

Words

chemical

log

mat

cut down

Sentence

Paper **is made from**
wood.

GOODBYE!
