Let's read!

This is our planet. It is called Earth, formed about 4.6 billion years ago. Earth is the third planet from the Sun. It is a beautiful planet covered with blue water and green land.

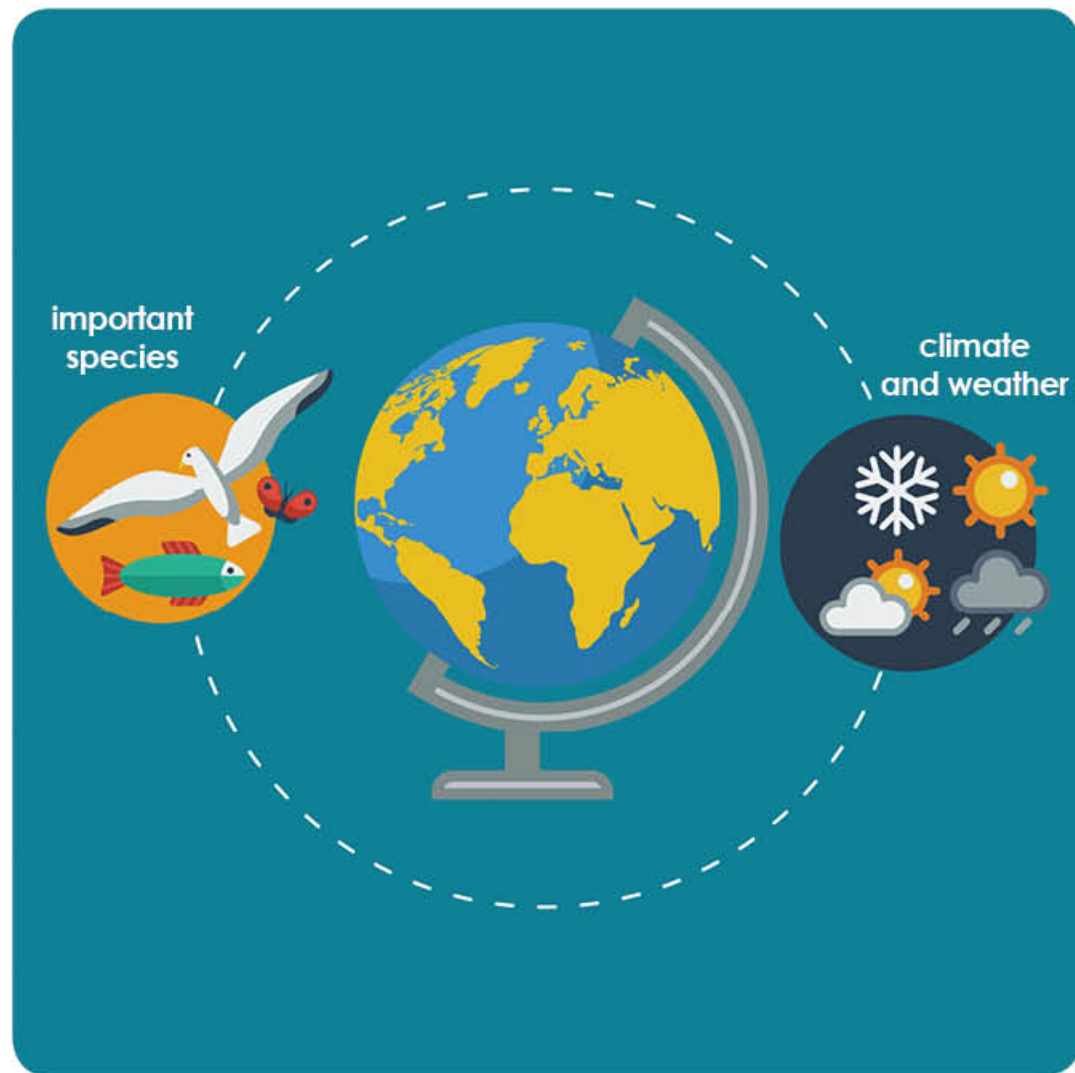

What is our planet called?

Water **covers** more than two thirds of our planet. The largest bodies of water on Earth are called oceans. There are five oceans on Earth.

How many oceans are there on Earth?

The world's oceans are important to us. They influence the **climate** and weather patterns. They are also the **habitat** of many important species.

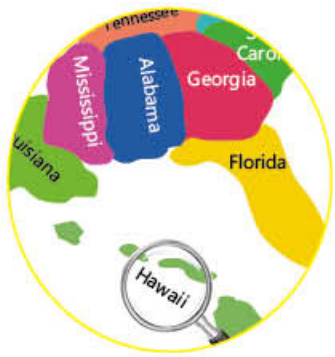

What is the importance of the world's oceans?

Land covers one third of our planet. It is divided into big pieces of land called continents. There are seven continents on Earth.

How much of Earth is land and how much is covered with water?

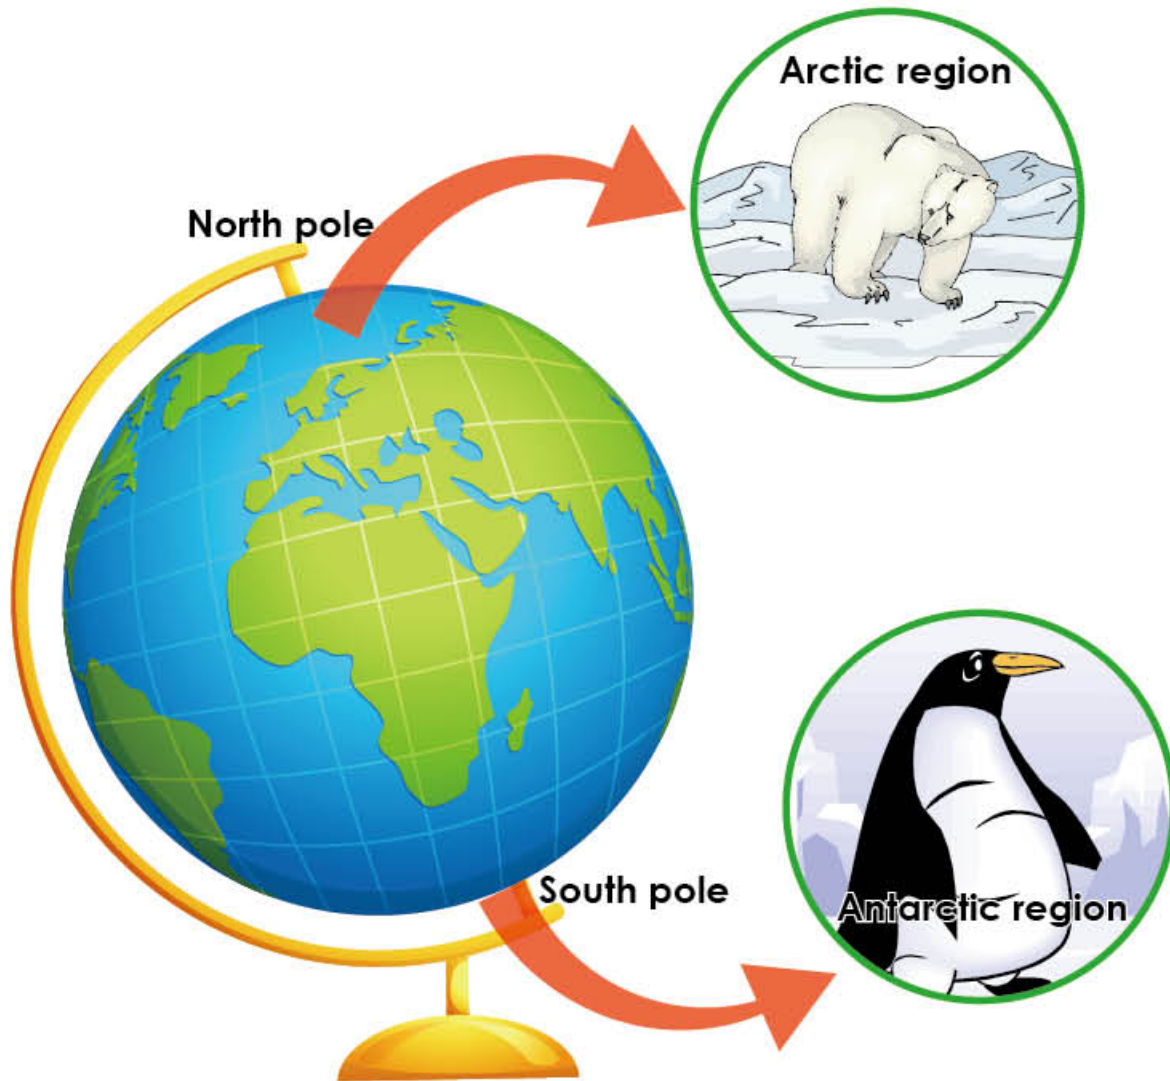

Amazon River

Small pieces of land that are separated by water are called islands. Hawaii and Hainan are two examples of islands. Lakes and rivers are forms of water that can be found on land. Two examples are the Yellow River in China and the Amazon River in South America.

Can you name some islands and rivers?

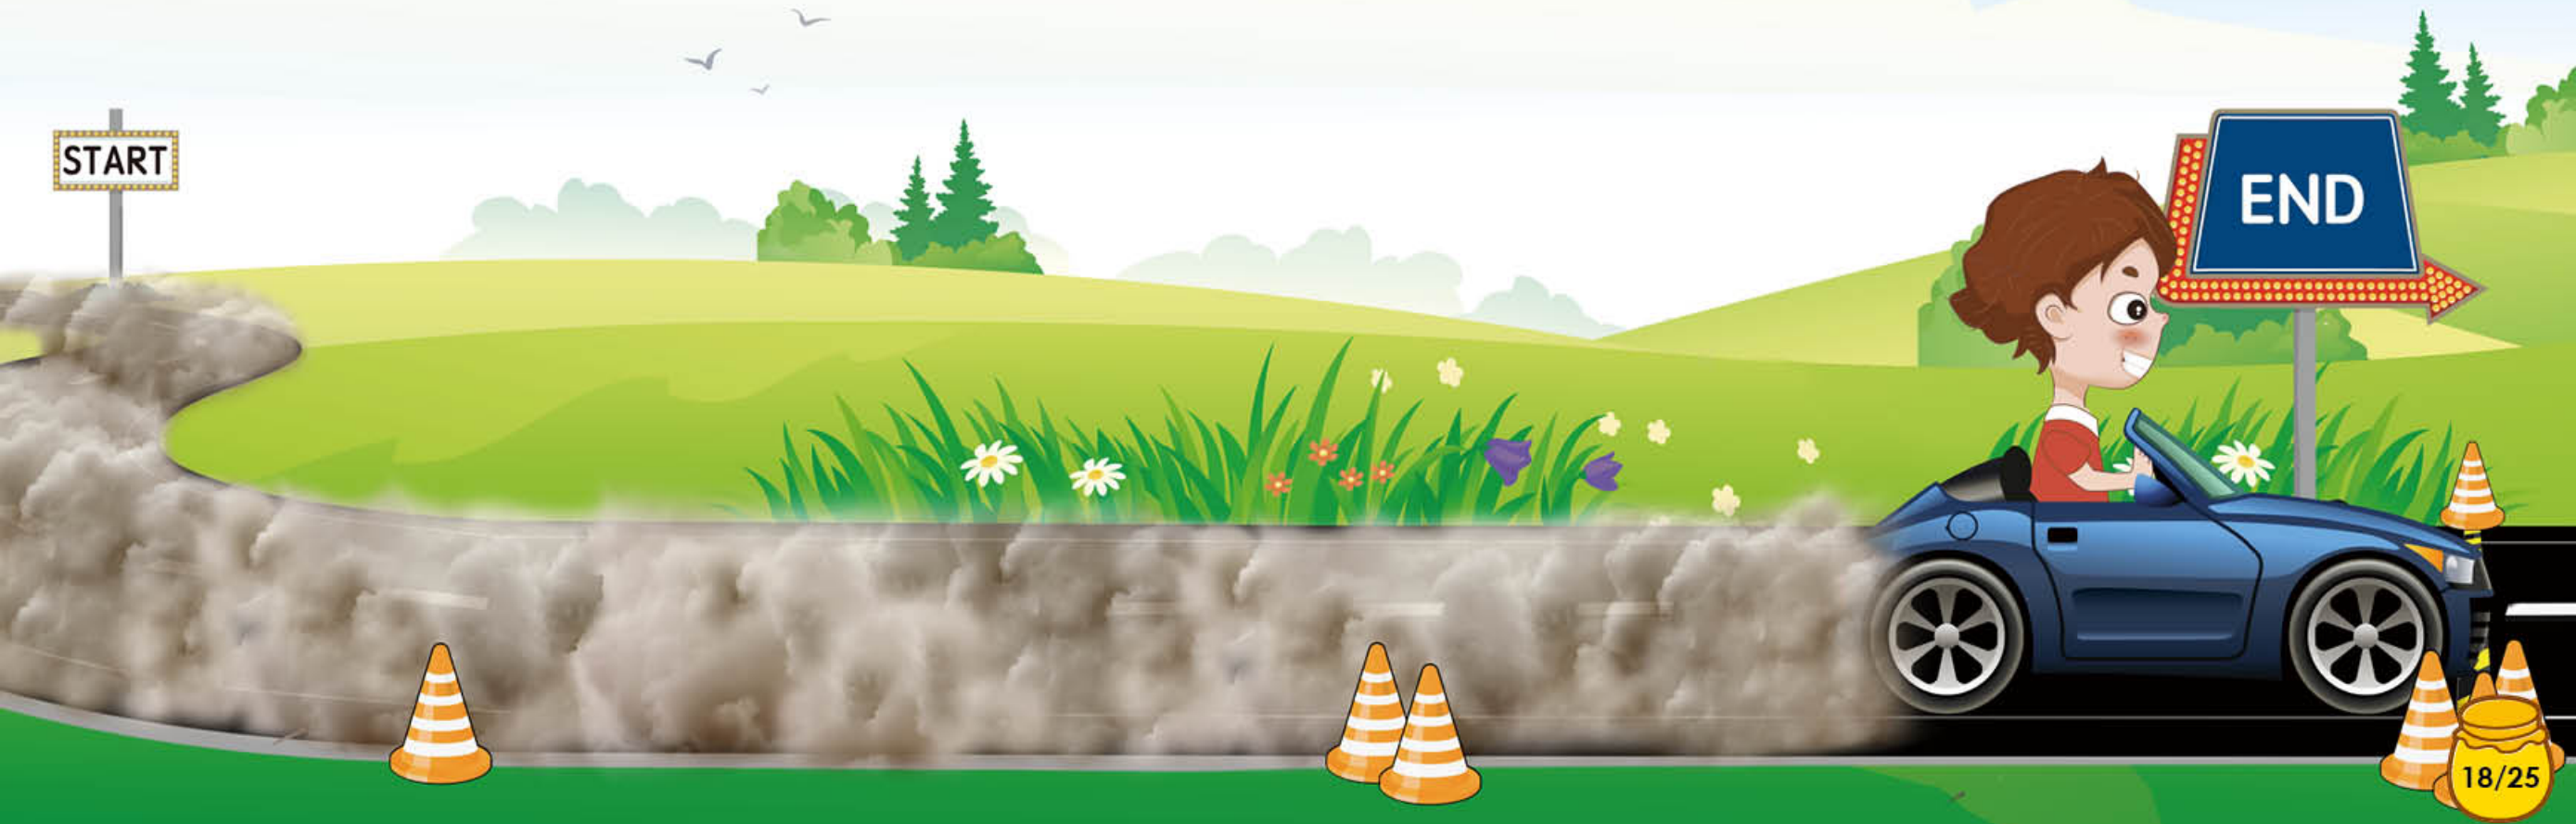

Earth's two **polar regions** are covered in ice. The Arctic region is at the North Pole and the Antarctic region is at the South Pole.

Which parts of the earth are covered in ice?

Let's practice!

Activity

Complete the sentences using the words in the Word Bank.

Our planet is _____
into big pieces of land.

The two regions
at the poles are
called _____.

The two _____
are _____ ice.

The two _____
are the _____
of the polar bear and
penguin.

Word Bank

polar region

habitat

divided

covered

Activity

Correct the sentences.

1. Small pieces of land that are separated by water are called lakes.

2. Land covers two thirds of our planet.

3. There are seven oceans on Earth.

Activity

Complete the form.

Main Idea	Supporting Details
Our planet is covered with _____ and _____.	<ol style="list-style-type: none">1. Water covers more than _____ of our planet.2. There are _____ oceans on Earth.3. Lakes and rivers are forms of water.4. Land covers _____ of our planet.5. There are _____ continents on Earth.6. _____ are small pieces of land separated by water.

Writing Preparation

Prepare for your writing by answering the question.

Let's talk!

What do you know about Earth's oceans and land?

A large yellow rectangular box for writing the answer.

Writing Project

Write a passage about our planet.

Today I learned:

Topic

The world around us—
This is our planet

Words

cover

divide

habitat

polar region

Grammar

Cardinal numbers
e.g. There are **seven**
continents on Earth.
