Red envelopes and firecrackers are some **features** of the Spring Festival.

fea·ture

Which phone has more features?

Grammar

I'll **look into** some websites before writing a report.

more facts

buy a car

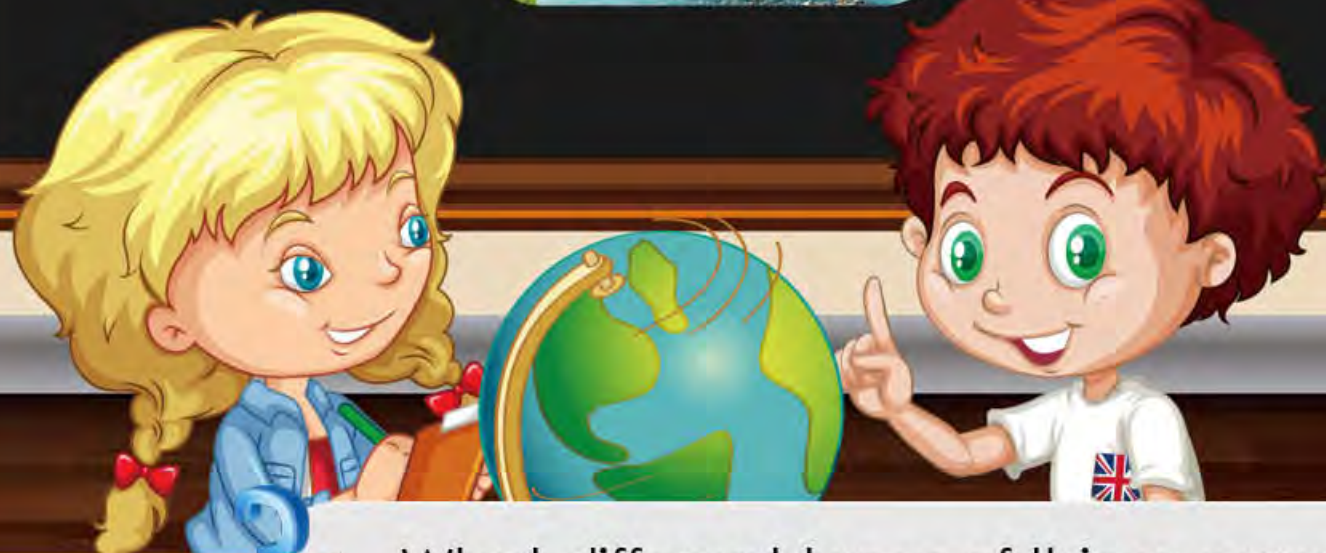

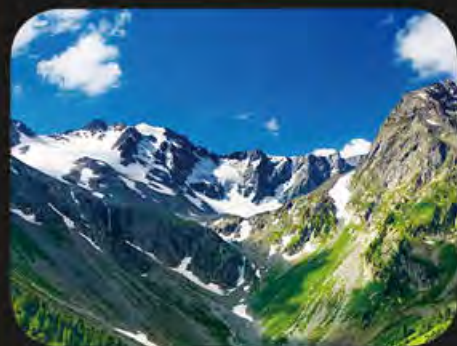

the police

crime

Let's read!

What different types of things can we see on our massive planet?

When we look down on our **massive** planet, we can see many different things, like mountains, rivers, and forests. There is so much to see and enjoy. So let's **look into** it!

Grammar

Phrasal verb: look into

"Look into" means to find out more information about something.

e.g. My mom is looking into buying a new phone.

Most of us live on **flat** land. Flat land gives us a large area to easily build houses and roads on. It also gives us a great place to keep animals and grow fruit and vegetables.

Why do most of us live on flat land?

Hills and mountains are the highest parts of the world. They give us **protection** from strong weather and also allow us to look down over long distances. Mountains are also where much of our fresh water comes from.

What do mountains give us?

Rivers and lakes can be found all over the land. Rivers give us water, food, and transportation. Lakes give us a place to keep lots of fresh water, and they are also great places to farm fish.

Why are rivers and lakes so important?

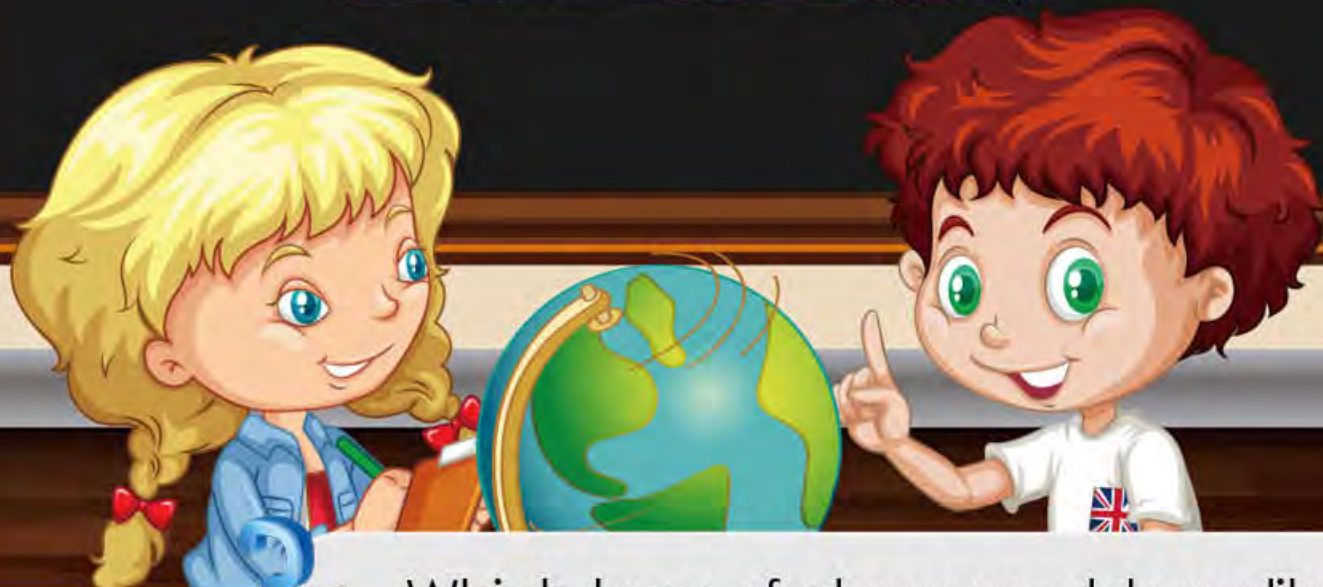

Forests can be found in both flat and hilly lands. They cover around one third of the earth's land area. They help give us our clean air, provide a home for animals, and provide people with lots of wood.

What do forests give us?

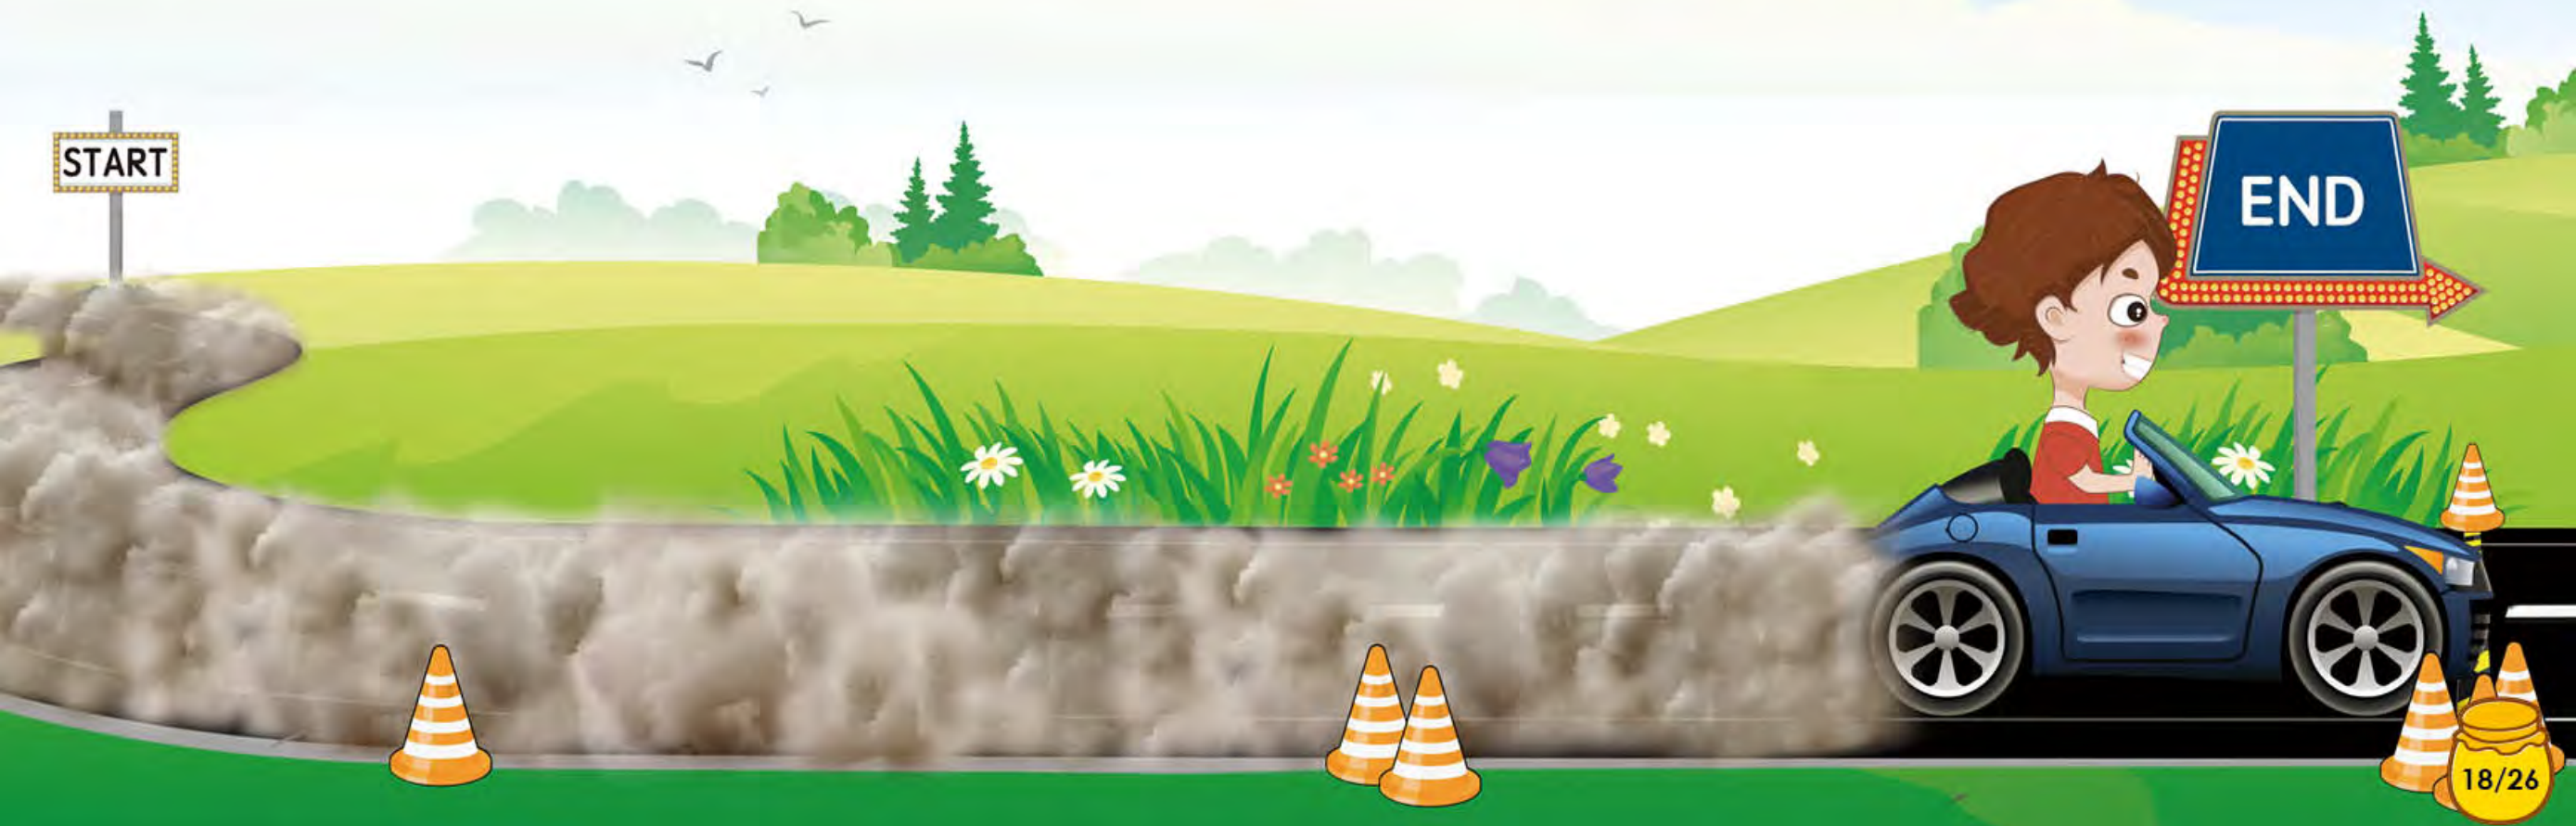

Our planet needs all of these land **features**. The next time you go on vacation, look into going somewhere that has mountains, lakes, or forests. They are all very important features of the land and beautiful to see!

Which type of place would you like to visit on your next vacation, and why?

Let's practice!

Activity

Match the words with the pictures.

massive

feature

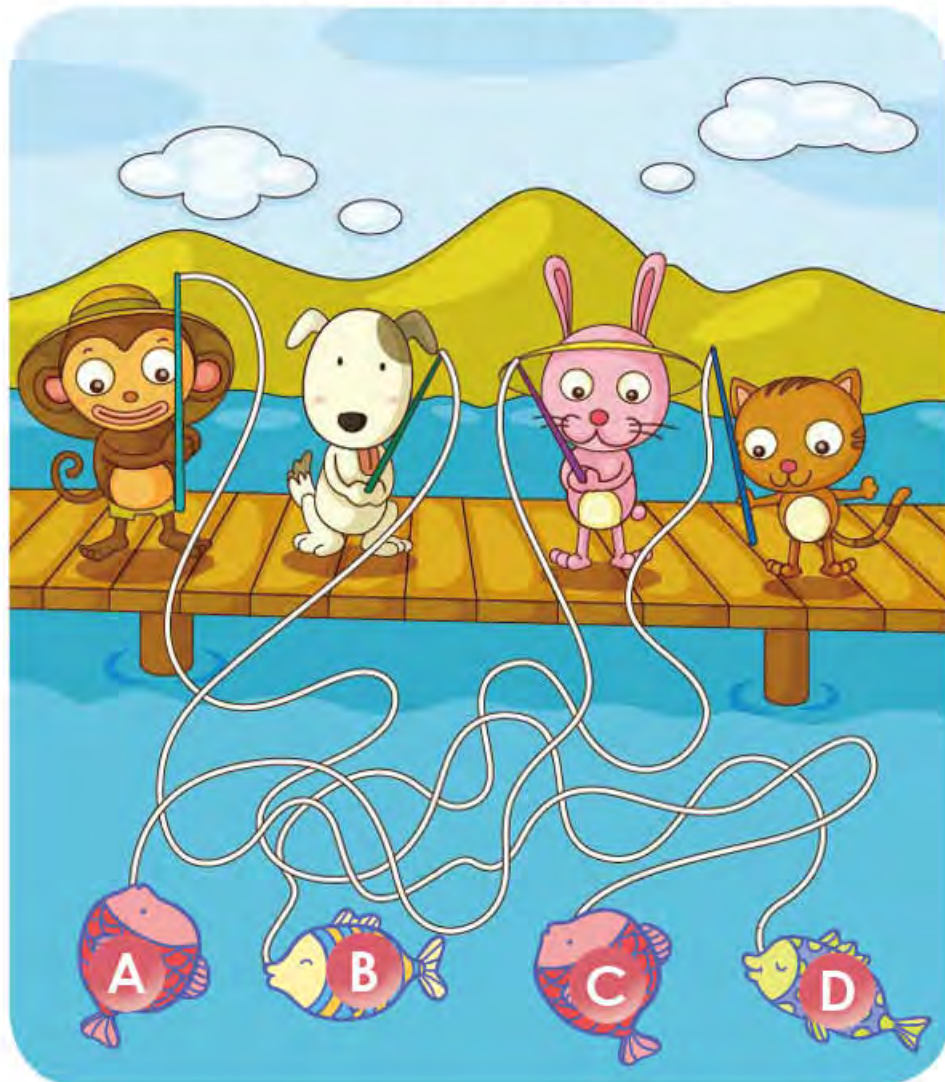

flat

protection

Activity

Find the words and make sentences.

A: massive B: flat
C: protection D: feature

Activity

Match the descriptions with the pictures and words.

They can be found in both flat and hilly lands. They provide people with lots of wood.

flat lands

They give us protection from strong weather and also allow us to look down over long distances.

mountains

They give us a large area to easily build houses and give us a great place to keep animals.

forests

Activity

Read and answer.

Rivers and lakes can be found all over the land. Rivers give us water, food, and transportation. Lakes give us a place to keep lots of fresh water, and they are also great places to farm fish.

Where can you find rivers and lakes?

What do rivers give us?

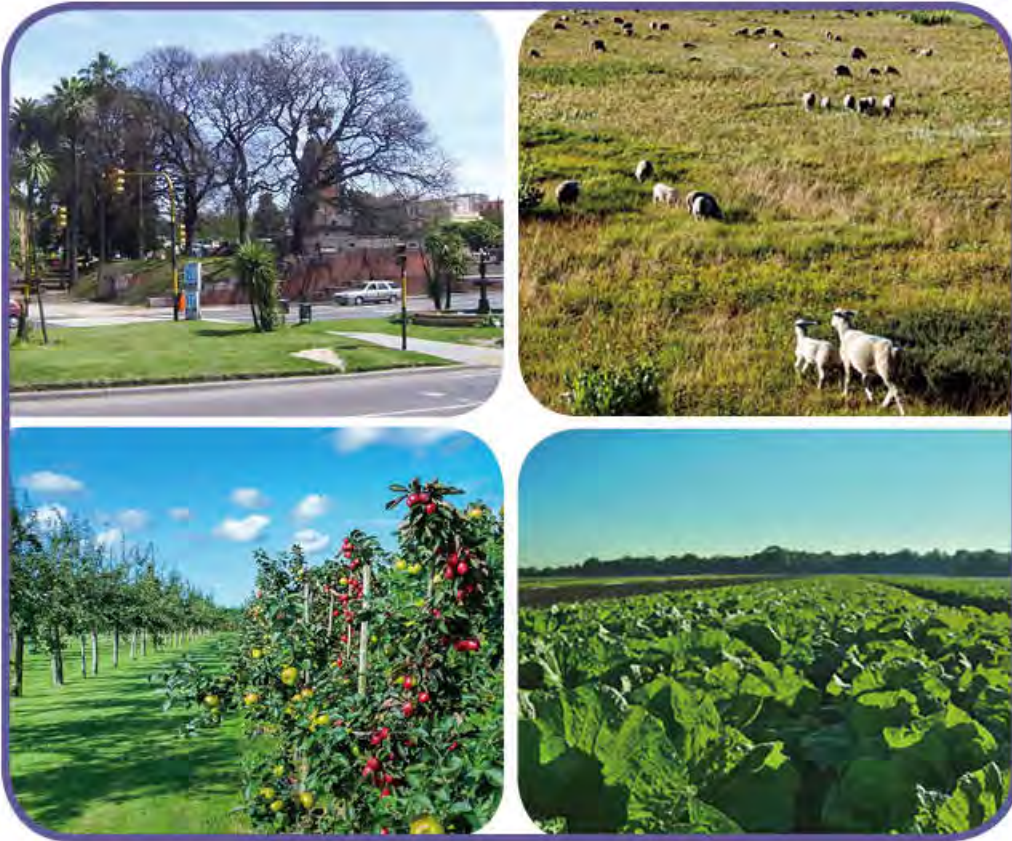

What do lakes give us?
