亲爱的小朋友们，此页是为老师准备的教学目标页。

You are going to learn:

Topic: Animals – How to Hatch Eggs

Grammar: Adverb clauses of time

Reading skill: Reading for information

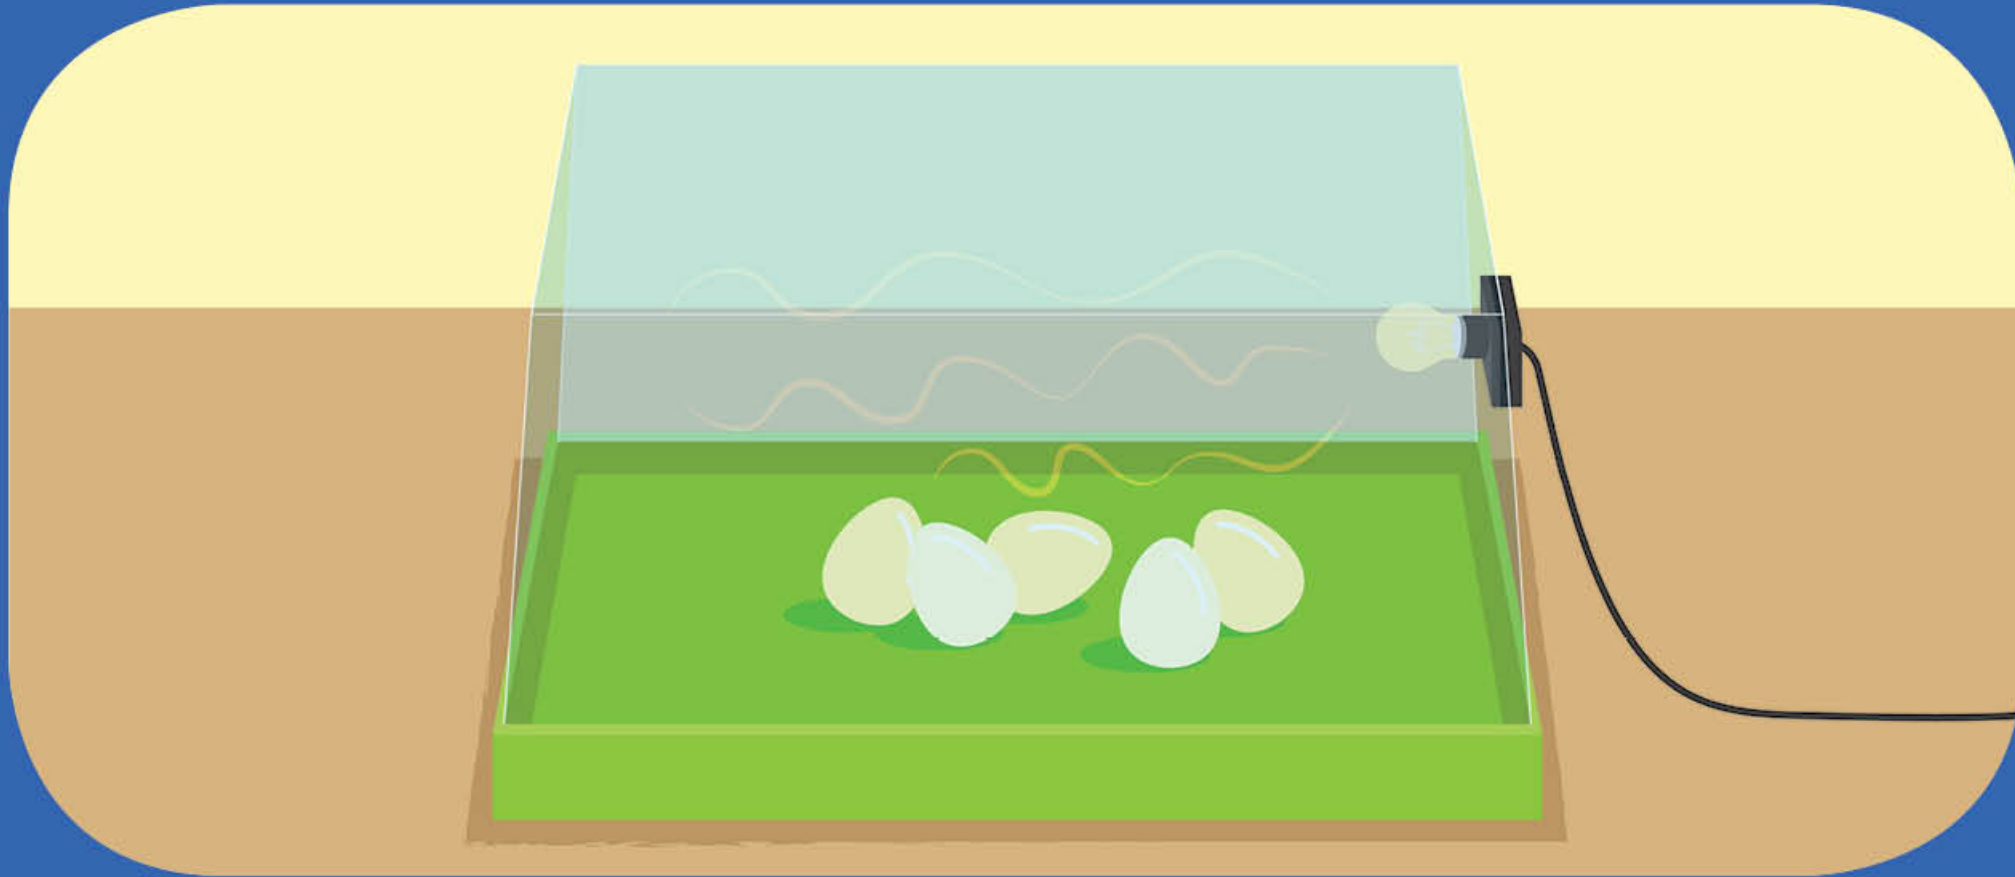

Are You Ready?

Listen to me.

Look at me.

HOW TO HATCH EGGS

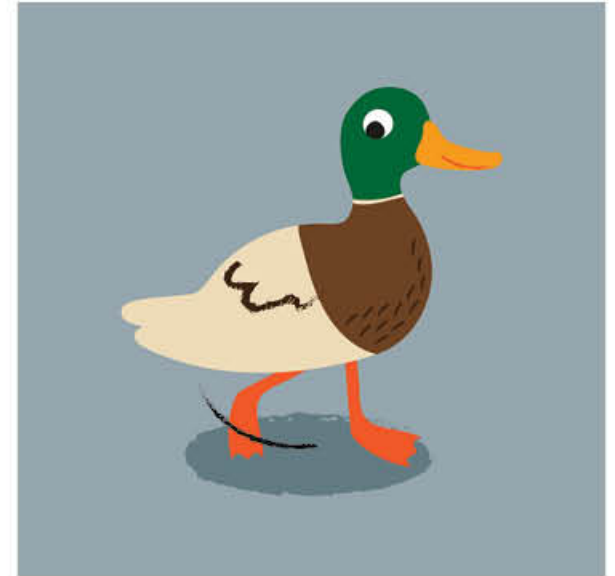

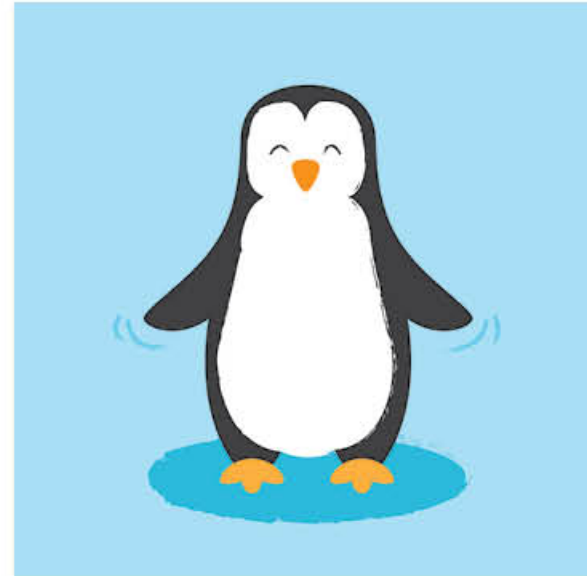

Classic English Junior Level 5 - Unit 5 - Lesson 3

INTENSIVE READING

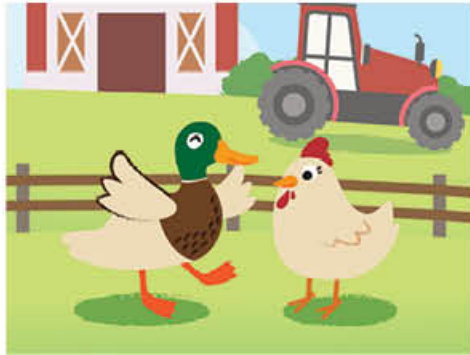

WARM-UP

Cross out the picture of the animal that does not lay eggs.

• LET'S PREPARE! •

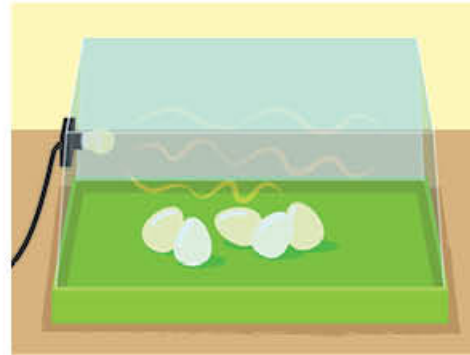

VOCABULARY

poultry

container

incubator

humidity

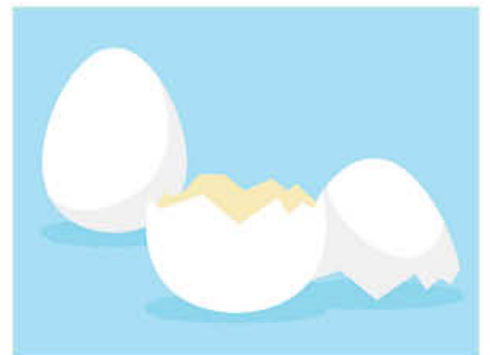

ventilated

place

turn something over

shell

GRAMMAR

Adverb clauses of time

An adverb clause of time shows when something happens. It is usually introduced by time adverbs.

Examples:

Hens sit on their eggs
until they hatch.

I always take a bath
before I go to bed.

Jenny was not home
when I came to see her.

Complete the sentences by choosing the correct adverb of time.

1. Sandy goes to swimming class
after school.

after

as long as

2. Can you wait for me _____
I'm ready?

while

until

3. We will go to the movies _____
you finish your homework.

since

as soon as

READING SKILL**Reading for information**

When we read a text for the first time, we look through it quickly and mark the important or relevant information.

Quickly read the passages to help you answer the questions. Circle the part/s of the passage that contains the answer.

1. When is Johnny's birthday?

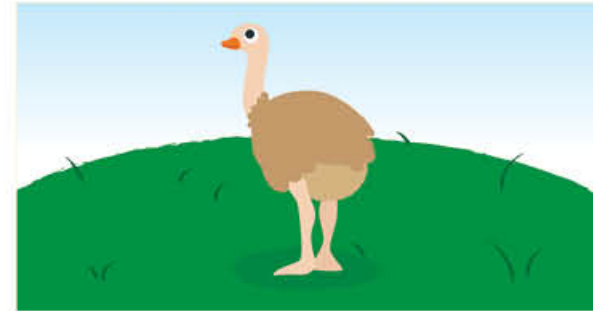

It is Thursday and everybody's busy getting ready for Johnny's surprise birthday party. They only have two days left to prepare everything. Kenny calls his friends to remind them of their assignments.

2. What does Roger need to do to pass his math class?

Roger failed most of his math tests. Because of this, he might fail his math class. Roger's teacher told him that he needs to get an A in their final test. Roger didn't want to fail math, so he studied really hard the night before their final test.

• LET'S READ! •

Match the pictures. What do you think will come out of these eggs?

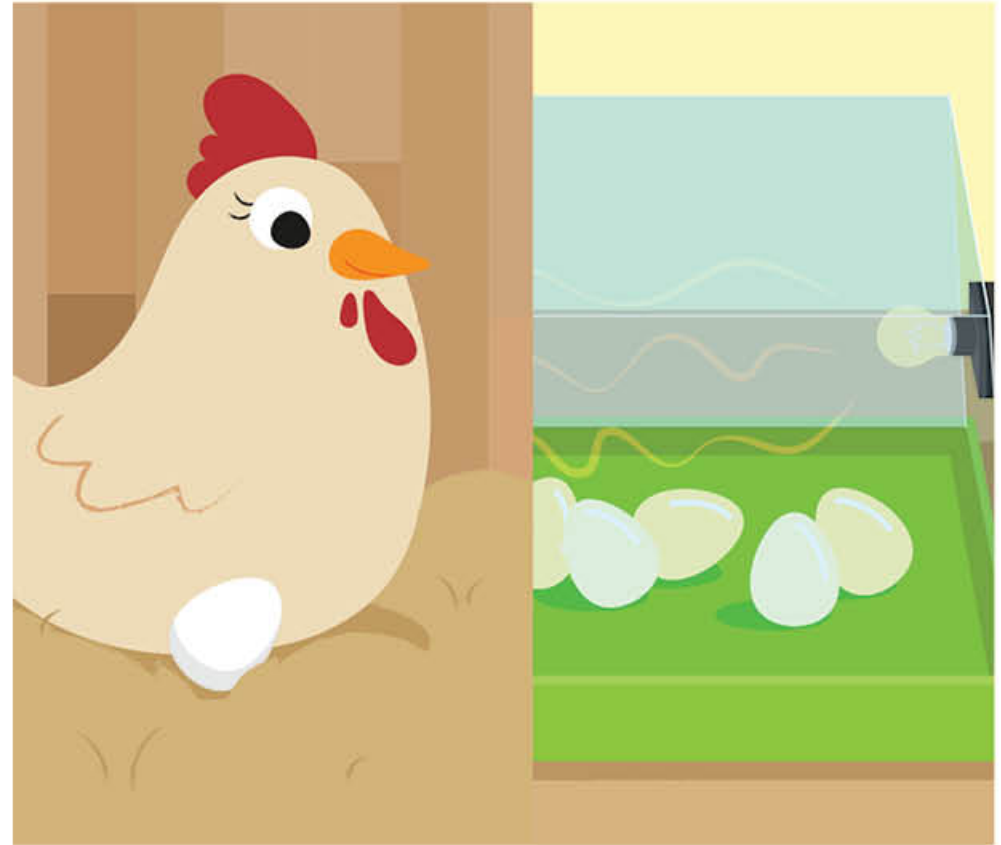

INTENSIVE READING

HOW TO HATCH EGGS

Chickens and other **poultry** are warm-blooded animals. They sit on their eggs to keep them warm until they hatch. However, there are other ways to hatch an egg. People often use a **container** to keep eggs in before they hatch. This container is called an **incubator**.

Today, we'll talk about how to hatch eggs in an incubator.

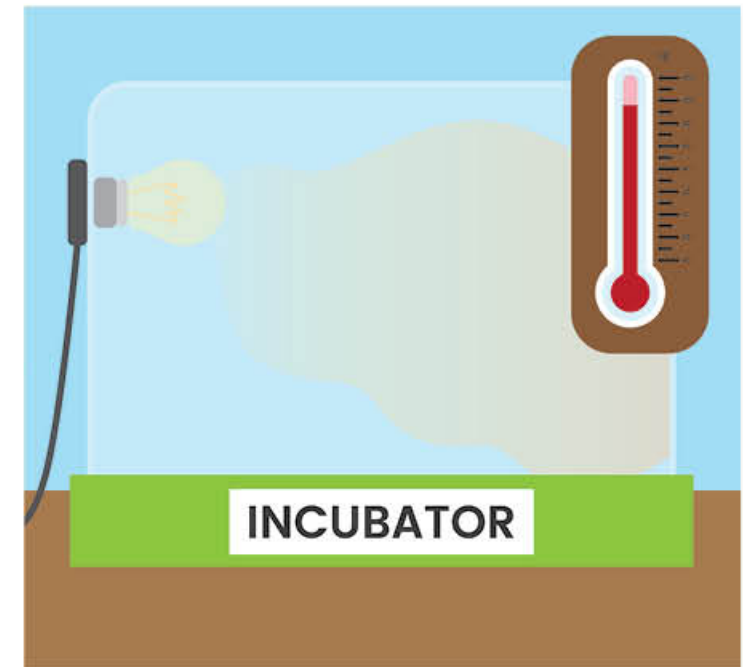

INTENSIVE READING

Read the question. Quickly look through the passage and underline the answer to the question.

When should the humidity of the incubator be kept at 40 – 50%?

The temperature inside the incubator must be kept at 99.5 degrees Fahrenheit. The **humidity** must also be controlled. For the first 18 days of incubation, it should be kept at 40–50% humidity. After that, you should increase the humidity to 65% in the final days before hatching.

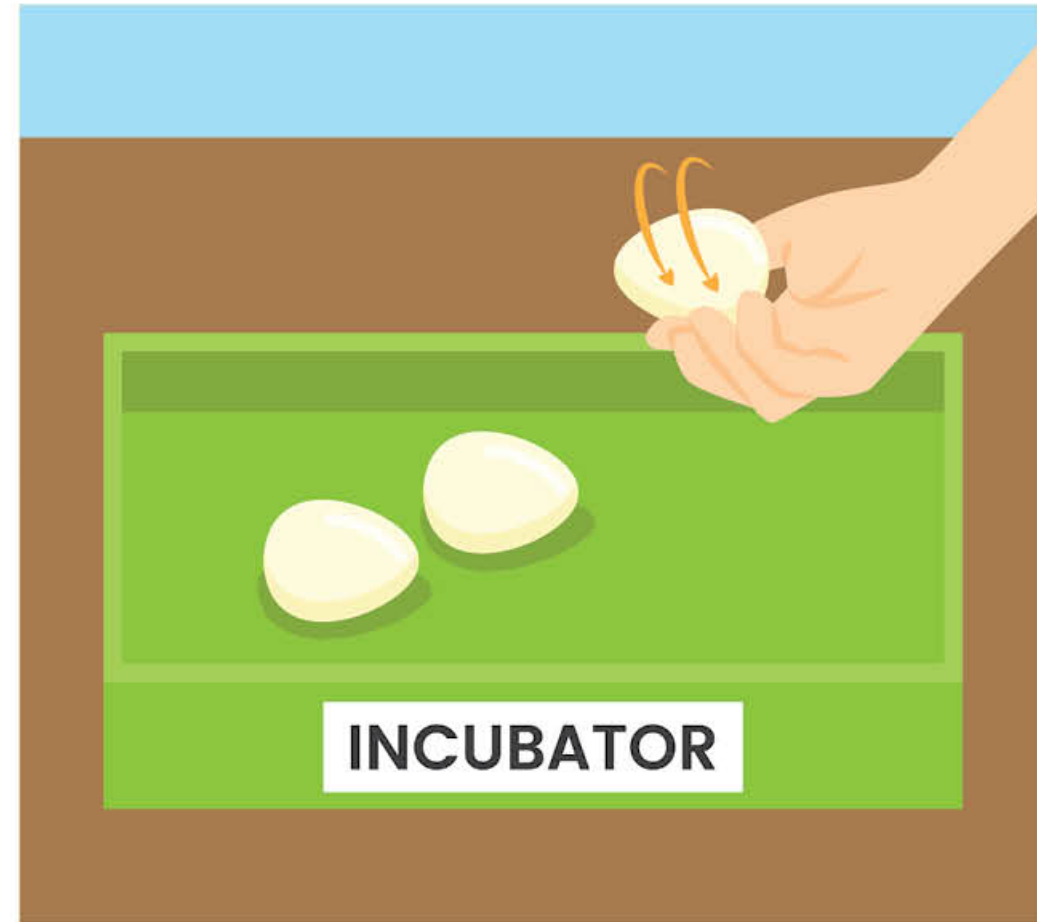

It's also important to make sure your incubator is **ventilated**. It needs holes for air to flow in and out.

INTENSIVE READING

Choosing healthy eggs for your hatchery is also very important. Make sure you choose fully formed, large eggs.

The best way to get your eggs is from a farmer or someone who takes care of chickens. **After you place your eggs in the incubator,** you should check on them as often as possible. You will need to **turn** the eggs **over** three times a day.

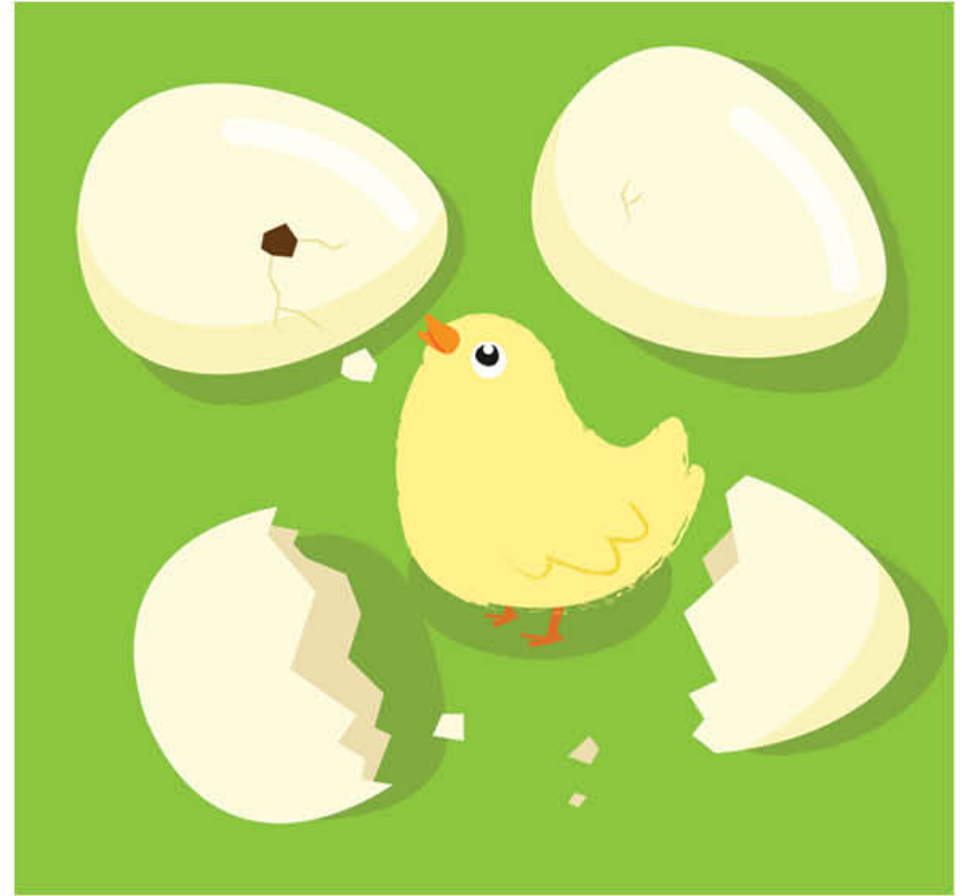

INTENSIVE READING

After 21 days, the eggs will begin to hatch. This starts with the eggs shaking. Eventually the chicks will break through their **shells**.

Most of the chicks should hatch within 24 hours. After hatching, you should lower the temperature to 95 degrees Fahrenheit. Newborn chicks should be kept in the incubator for another one to two days.

At last, congratulations! You've helped bring new life into the world!

WRITING PREPARATION

**Answer the following questions by quickly looking through the passage again.
Type your answers.**

1. What should the humidity be kept at for the first 18 days?

40–50%

2. What should be the temperature of the incubator?

3. Why does the incubator need holes?

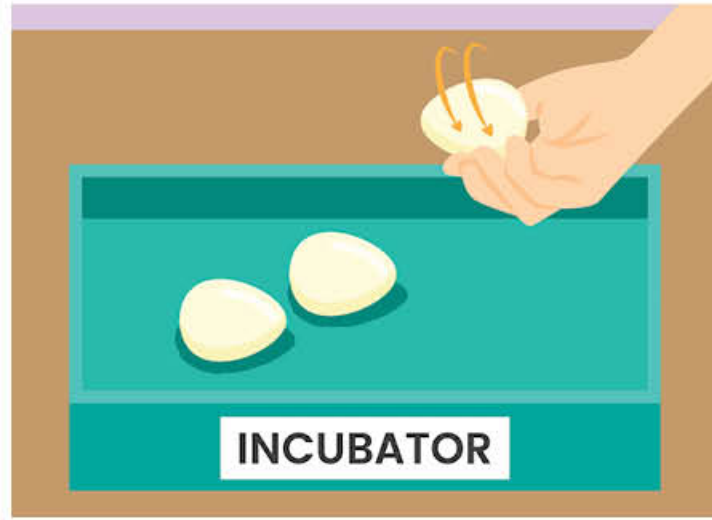

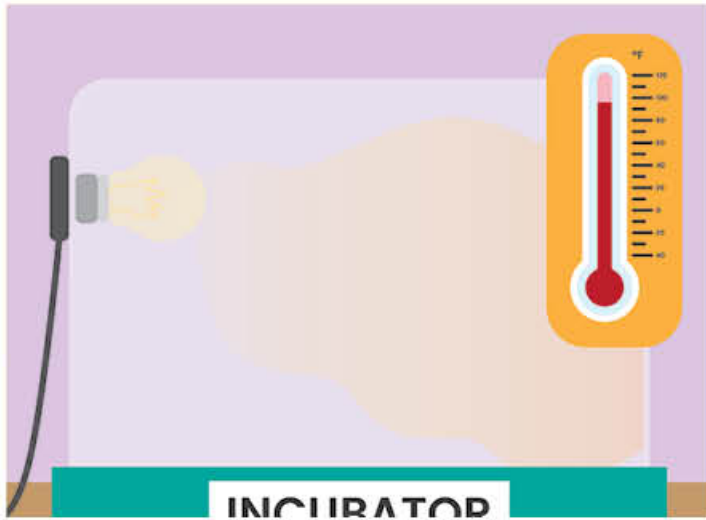

4. What do you need to do with the eggs 3 times a day?

5. How many days will it take for the eggs to hatch?

6. What should the temperature be after hatching?

WRITING PROJECT

Retell the story by using your answers from the previous activity.

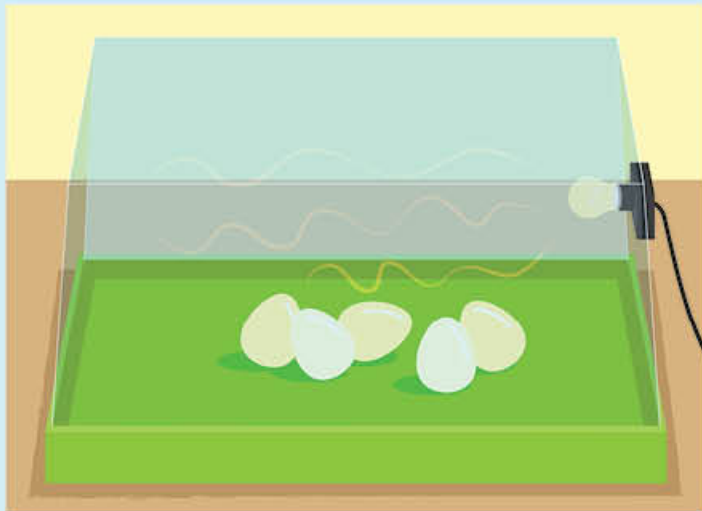

Write a passage about this after class.

Today we learned:
