

Eagle Eye

We are going to learn about an eagle's strong sense of sight.

Warm-up

2 min

How far can you see? Do you know any ways to help you see better?

**Reading****3** min

Read with the teacher and then answer the question below.

Look around the room you're in. You probably think you see the world pretty clearly. But did you know that birds of **prey** can see even more clearly than the sharpest human eye?

Do you know any birds of prey?

**Reading****4** min

Read with the teacher and then move to the Word Focus.

Eagles have the best **eyesight** in the animal kingdom. Their eyesight is about four to eight times better than the average human eyesight and they can spot their prey from as far as three kilometers away.

Word Focus

- He has poor **eyesight** and can't read properly.
- What animals have sharp **eyesight**?

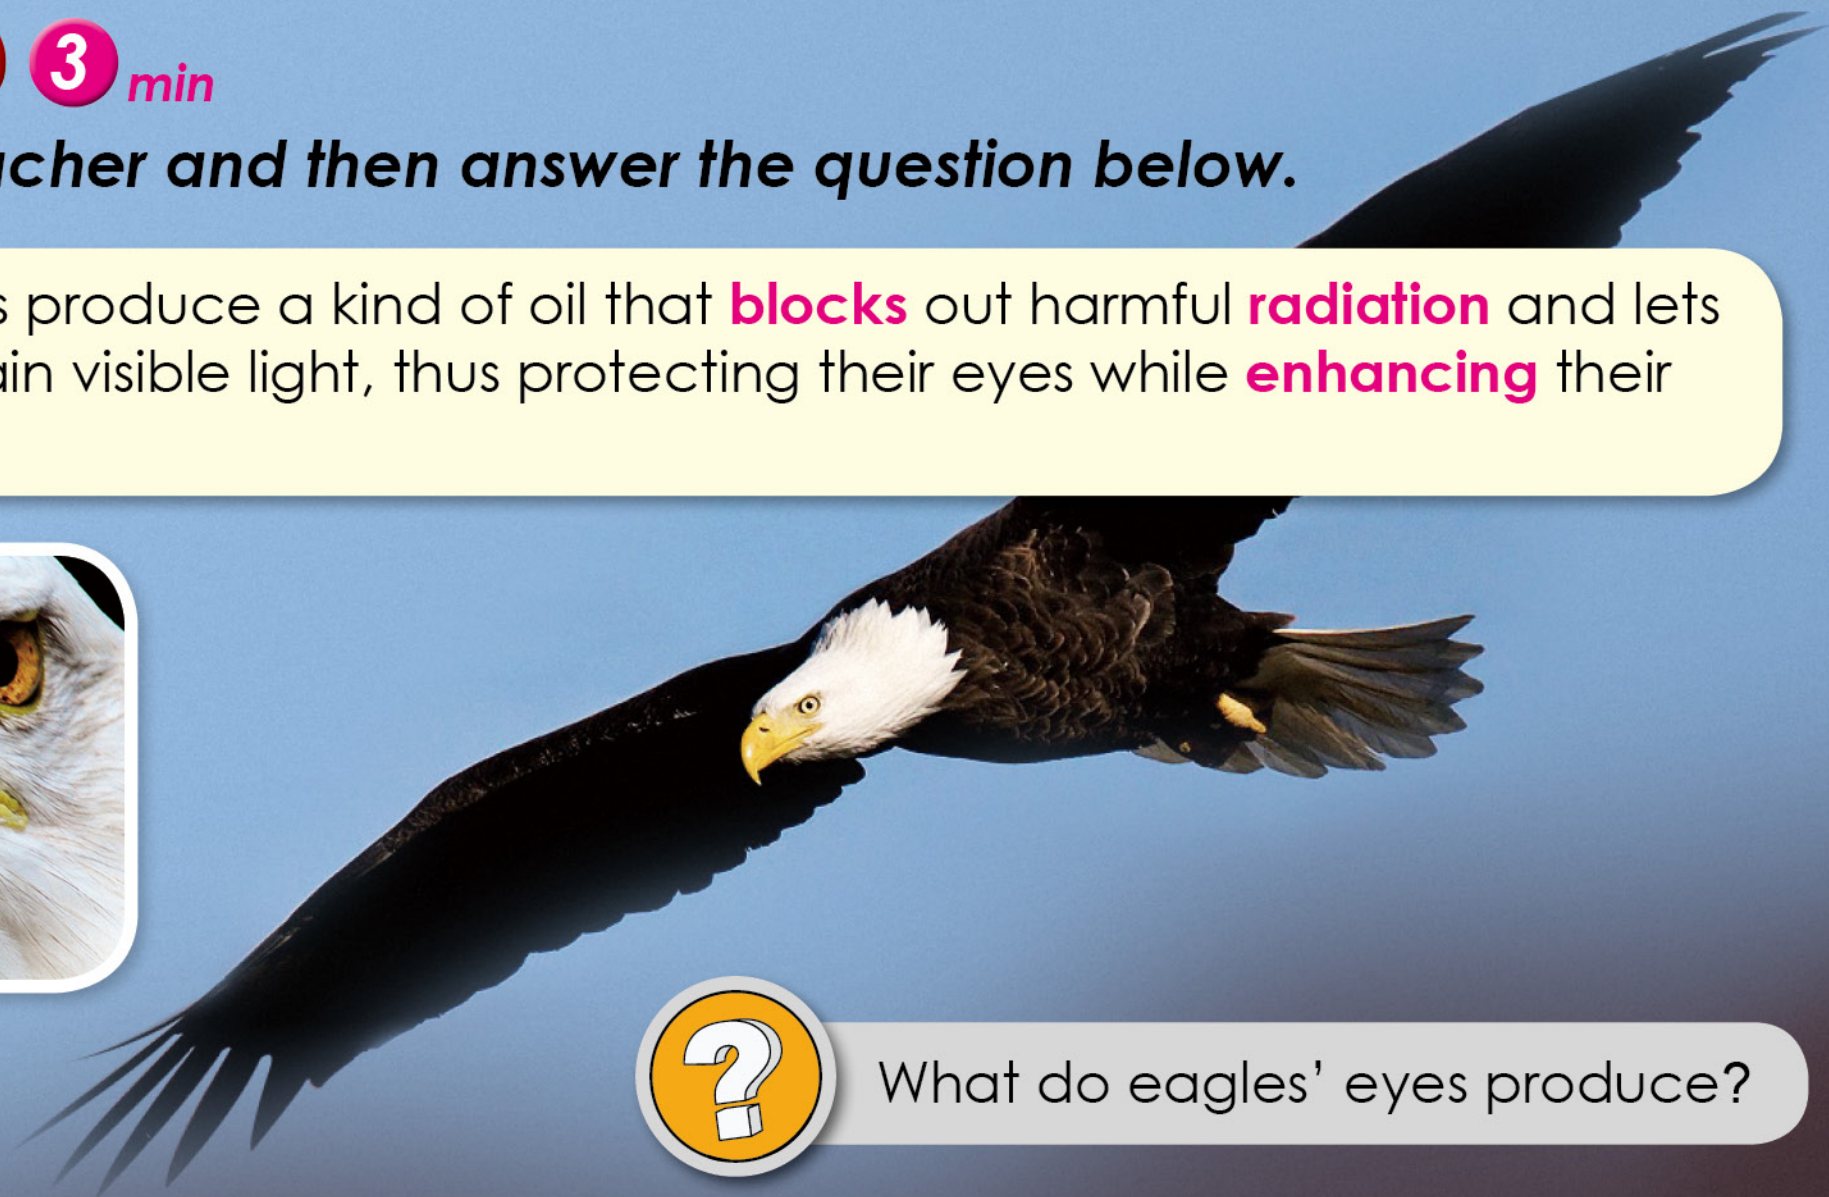

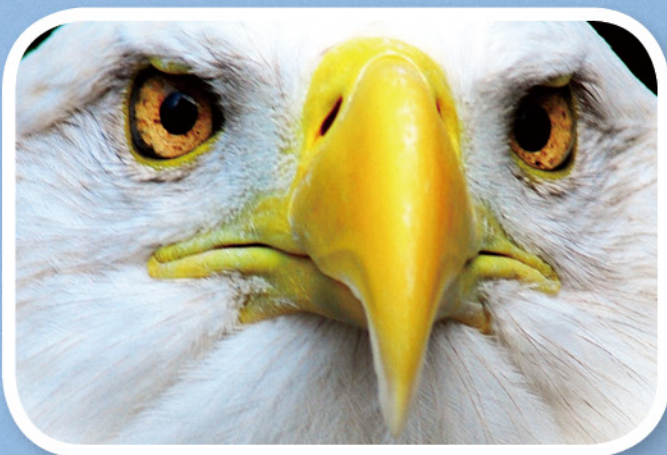

To be continued... >>

**Reading****3** min

Read with the teacher and then answer the question below.

Eagles' eyes produce a kind of oil that **blocks** out harmful **radiation** and lets in only certain visible light, thus protecting their eyes while **enhancing** their eyesight.

What do eagles' eyes produce?

To be continued... >>

Reading 4 min

Read with the teacher and then answer the question below.

Now, there are special sunglasses that protect human eyes the same way oil protects eagles' eyes. These sunglasses can protect our eyes from harmful radiation, enhance our vision, and enable us to see more clearly in **hazy** or cloudy conditions.

with ordinary sunglasses

with special sunglasses

What can the special sunglasses help us do?

**Task****4**

min

Match each picture with the correct fact/facts.

An eagle

An eagle's eyes

Special sunglasses

can protect eyes from harmful radiation and enhance vision.

has the best eyesight in the animal kingdom.

can spot prey from as far as three kilometers away.

produce oil that blocks out harmful radiation.

More challenges! >>

**Leadership****4** min

Discuss with the teacher.

Q1. How does an eagle's eyesight compare to human eyesight?

An eagle's eyesight is ...

Q2. Would you wear special sunglasses to be able to see like an eagle? Why?

Yes, I would/No, I wouldn't ... because ...

Q3. If you were a scientist, how would you use the oil produced by an eagle's eyes?

I would ...

In this lesson, we...

learned about an eagle's strong sense of sight.

learned new words.
