In China, doctors put **needles** into the patient's body to treat an illness.

nee·dle

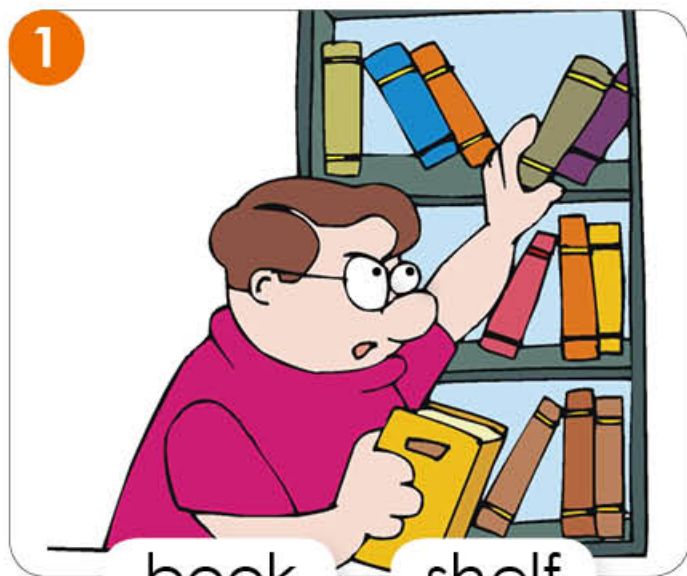

Which shows a needle?

Grammar

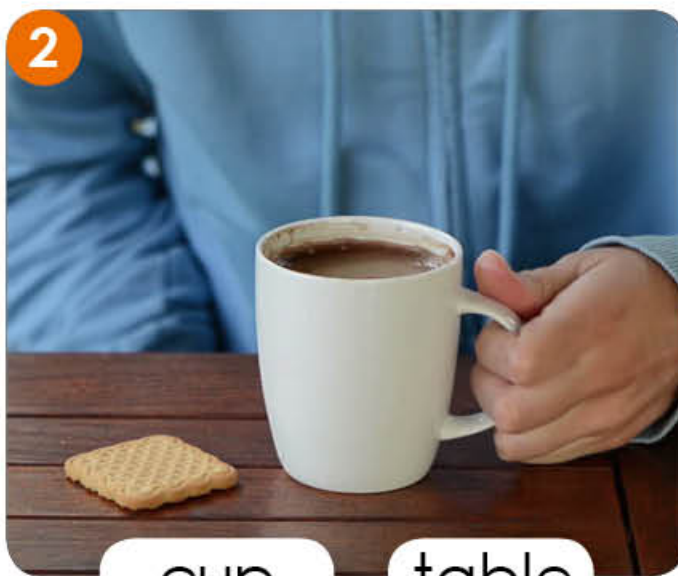

He **placed** the medicine bag **on** the table.

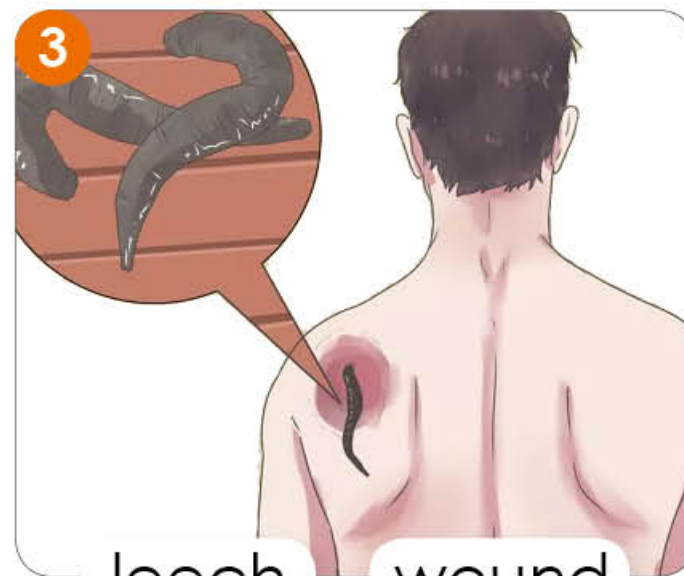

book

shelf

cup

table

leech

wound

Let's read!

There is medicine to cure almost every **illness**. It's usually easy to get, and usually quite cheap too. However, if you had lived in the past, it would not have been so easy to find. In fact, before about 100 years ago, there wasn't any **modern** medicine like we have today.

When wasn't there any modern medicine?

Before modern medicine, people had to find something else to use. Plants and **herbs** were probably the first type of medicine. However, not everyone knew how to find or use the plants. And, if you had not lived near an herbal doctor, you would have had much less chance of getting better.

What were the first type of medicine?

Animals were used to make medicine too, such as parts of elephants and tigers. Animals were also used to help heal people. In fact, in the past, if you had gotten a bad cut, you may have had leeches **placed on** your wound!

Grammar

Phrasal verb: place on

"Place on" means to put something on the surface of something else.

e.g. He placed his schoolbag on the desk.

What can also be used to make medicine?

Acupuncture and massage were created to help sick people feel better. Acupuncture is when the doctor puts **needles** into someone's body to help them feel better. Massage uses the hands to touch someone's body and is very useful for muscle pain.

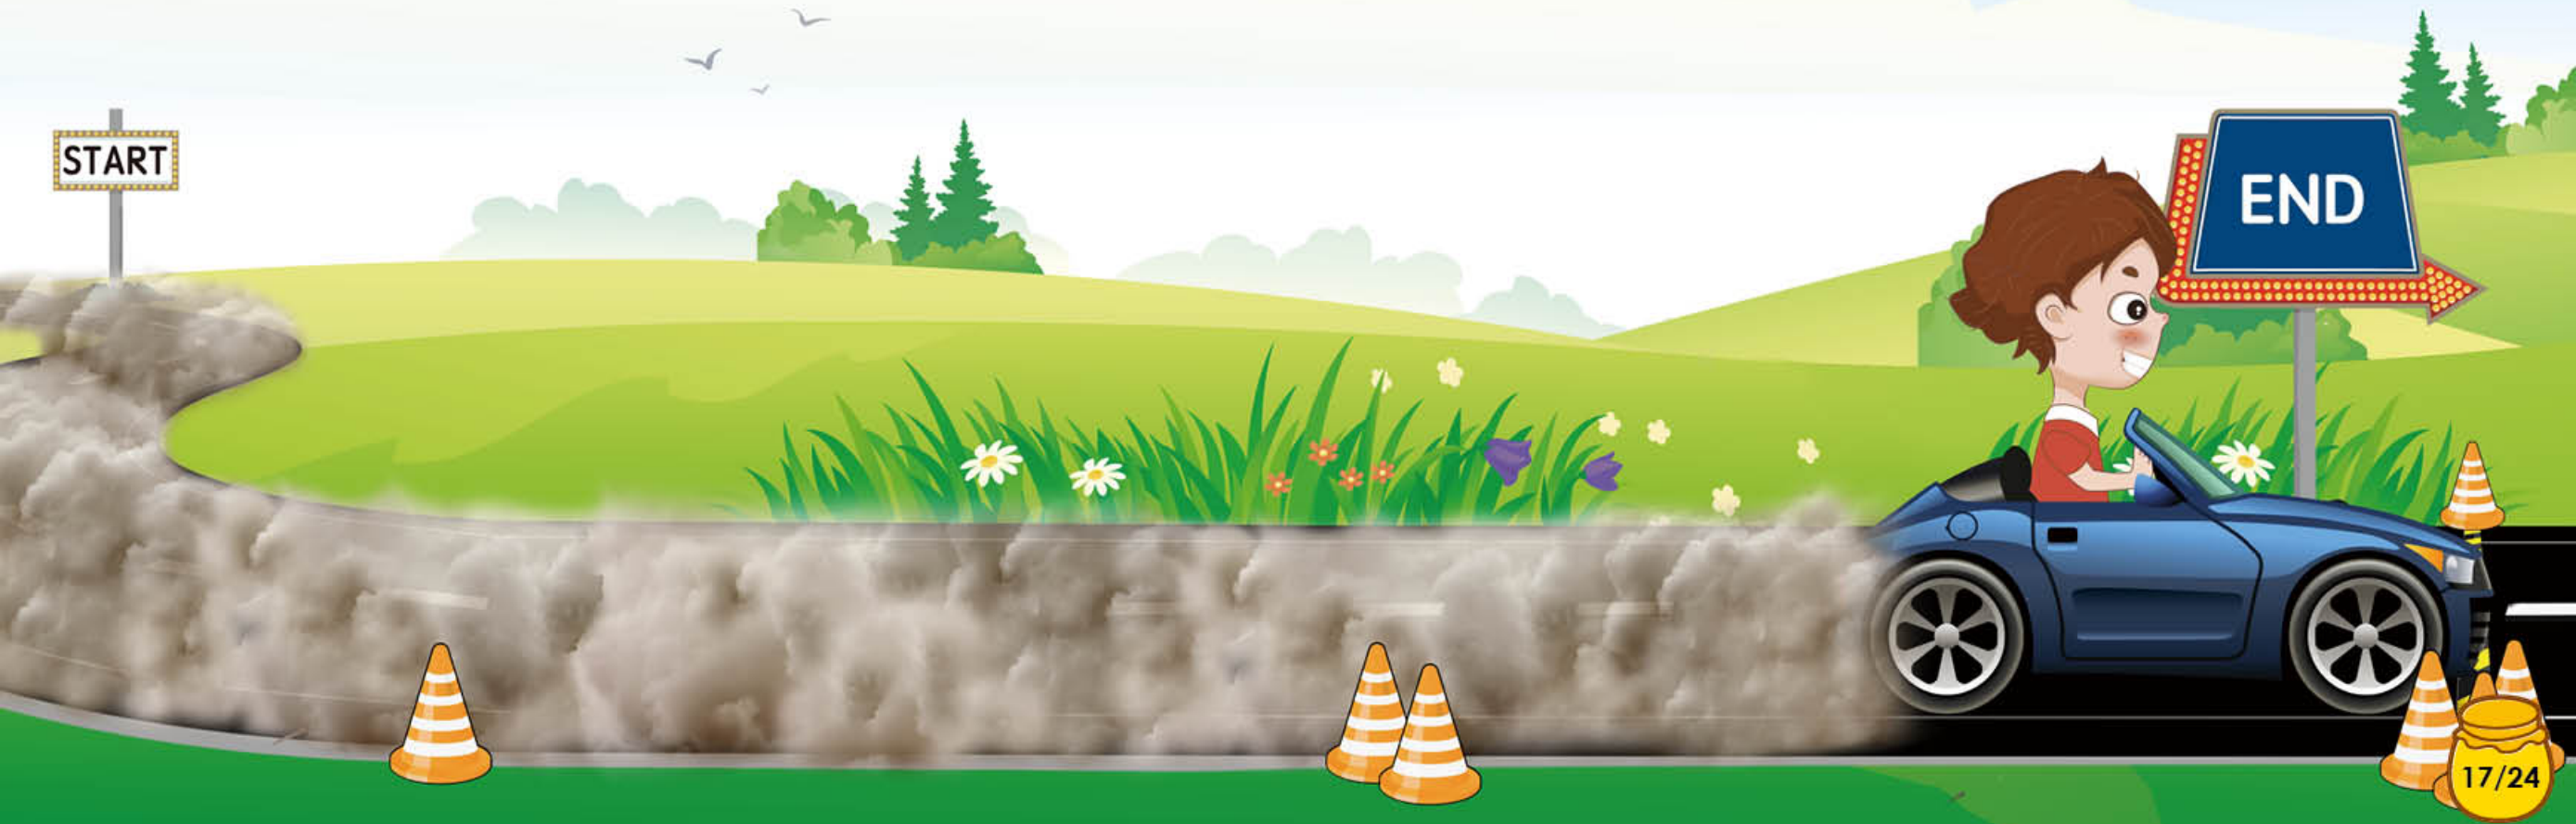

What is massage useful for?

Today, more and more chemicals are being used to make medicine, instead of plants and animals. It is now much easier to make medicine, and we are testing new medicine every day. There has never been a better time to get sick!

What are being used to make medicine today?

Let's practice!

Activity

Read the words and make sentences.

illness

modern

herb

needle

I need to take this medicine.

You should take some medicine if you have an **illness**.

Activity

Look and answer the questions.

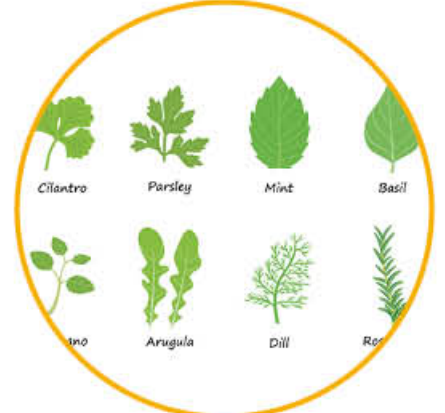

What's modern medicine like?
What was medicine in the past like?

Answer box for the questioner.

Hints: easy cheap herbs
 not so easy animals

next page.

Activity

Look and say.

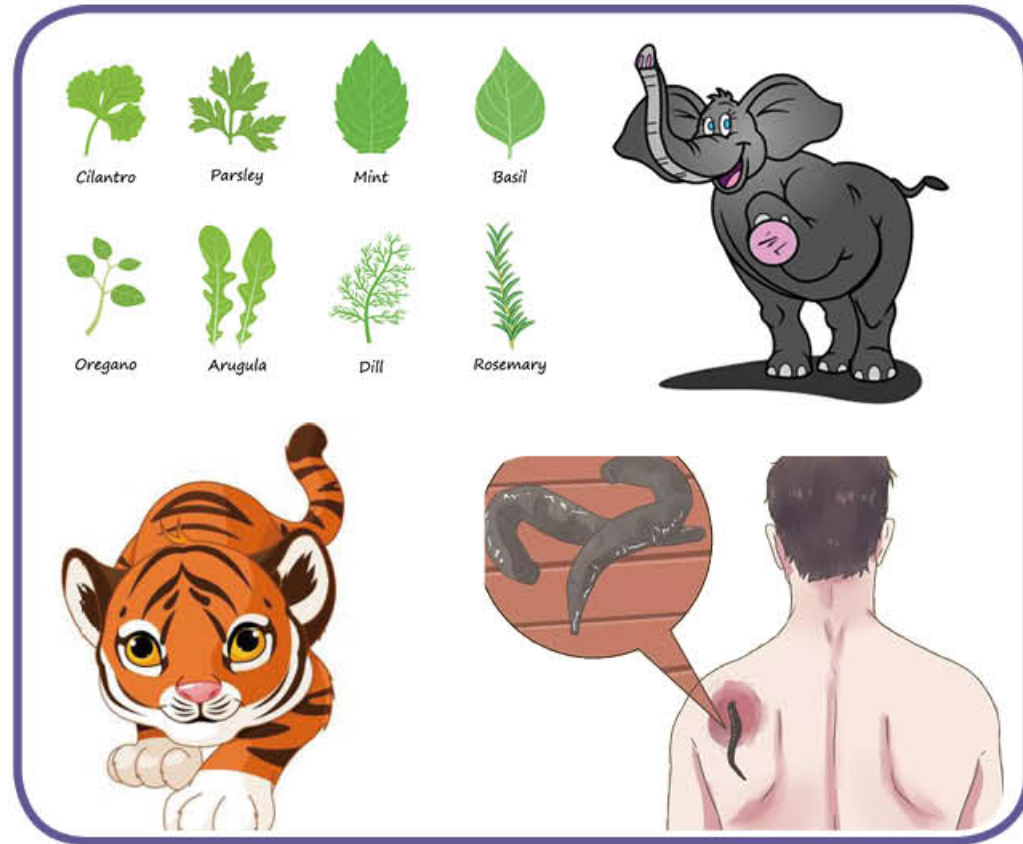

Ways to help people
in the past

Writing Preparation

Prepare for your writing by answering the questions.

Let's talk!

What medicine did people use in the past? What do you know about them?

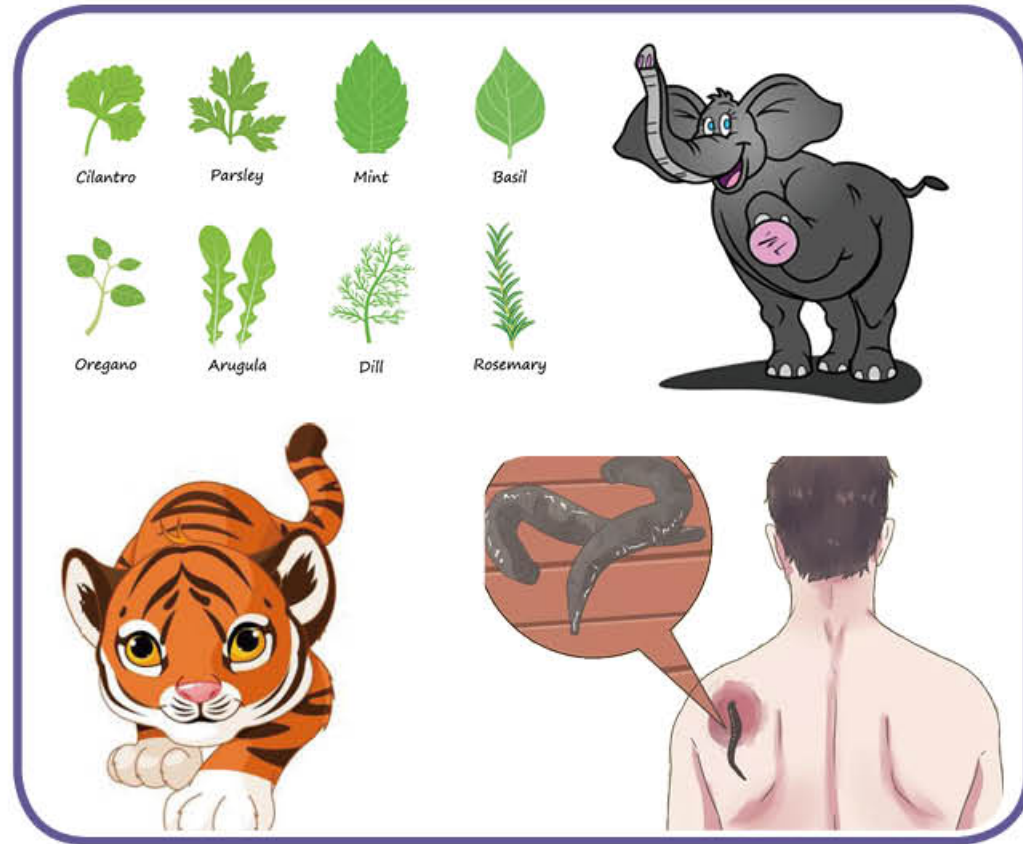

Hints: herbs
tiger

elephant
leech

Writing Project

Write a passage about the ways to cure illnesses in the past.

Ways to cure illnesses in the past

Hints: herbs
tiger

elephant
leech

Today I learned:

Topic

Feelings and health —
Medicine in the past

Words

-  illness
-  modern
-  herb
-  needle

Grammar

Phrasal verb
(place on)

e.g. In fact, in the past, if you had gotten a bad cut, you may have had leeches **placed on** your wound!
