Comparative forms of adjectives

Comparative forms of adjectives is used when comparing two things.

We usually add **-er** at the end of an adjective to get the comparative form. For adjectives with three or more syllables, we form the comparative by putting "**more**" before the adjective and "**than**" after the adjective.

Examples:

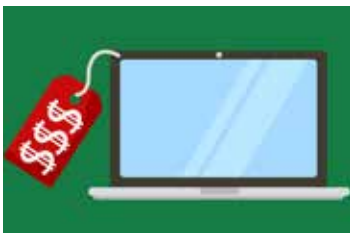

★ new – **newer**

★ colorful – **more** colorful

The things they sell here are **newer than** those at the flea market.

This shirt looks **more colorful than** the other one.

Compare the pictures using the words in the box.

HINTS

cheap

expensive

CONVERSATION

Timmy and his dad are walking home from school. They pass by a place with many people. Different things are for sale.

Where are we, Dad? There are so many people! And look, everything's for sale!

We're at a flea market. It's where people sell old and used things at **cheap** prices. It's also where some people **exchange** things with others.

Where are Timmy and his dad?

Why is it noisy at the flea market?

I see. Dad, look! The red scooter looks **older than** the blue one. But why is it more expensive?

Some old things become more valuable or more **expensive** as time goes by. Maybe that's why. Let's try asking the vendor for a cheaper price.

What could be the reason why the red scooter is more expensive than the blue one?

How much does the vendor want to sell the scooter for?

Okay. I think that's **reasonable**. We'll take it.

Sorry, Dad. Can we buy the blue scooter instead of the red one? The blue one looks nicer.

Why did Timmy change his mind about the red scooter?
