亲爱的小朋友们，此页是为老师准备的教学目标页。

## **You are going to learn:**

**Topic:** Food – Safe to Eat?

**Grammar:** First conditional

**Reading skill:** Fact and opinion

# Are You Ready?

**Listen to me.**

**Look at me.**

# SAFE TO EAT?

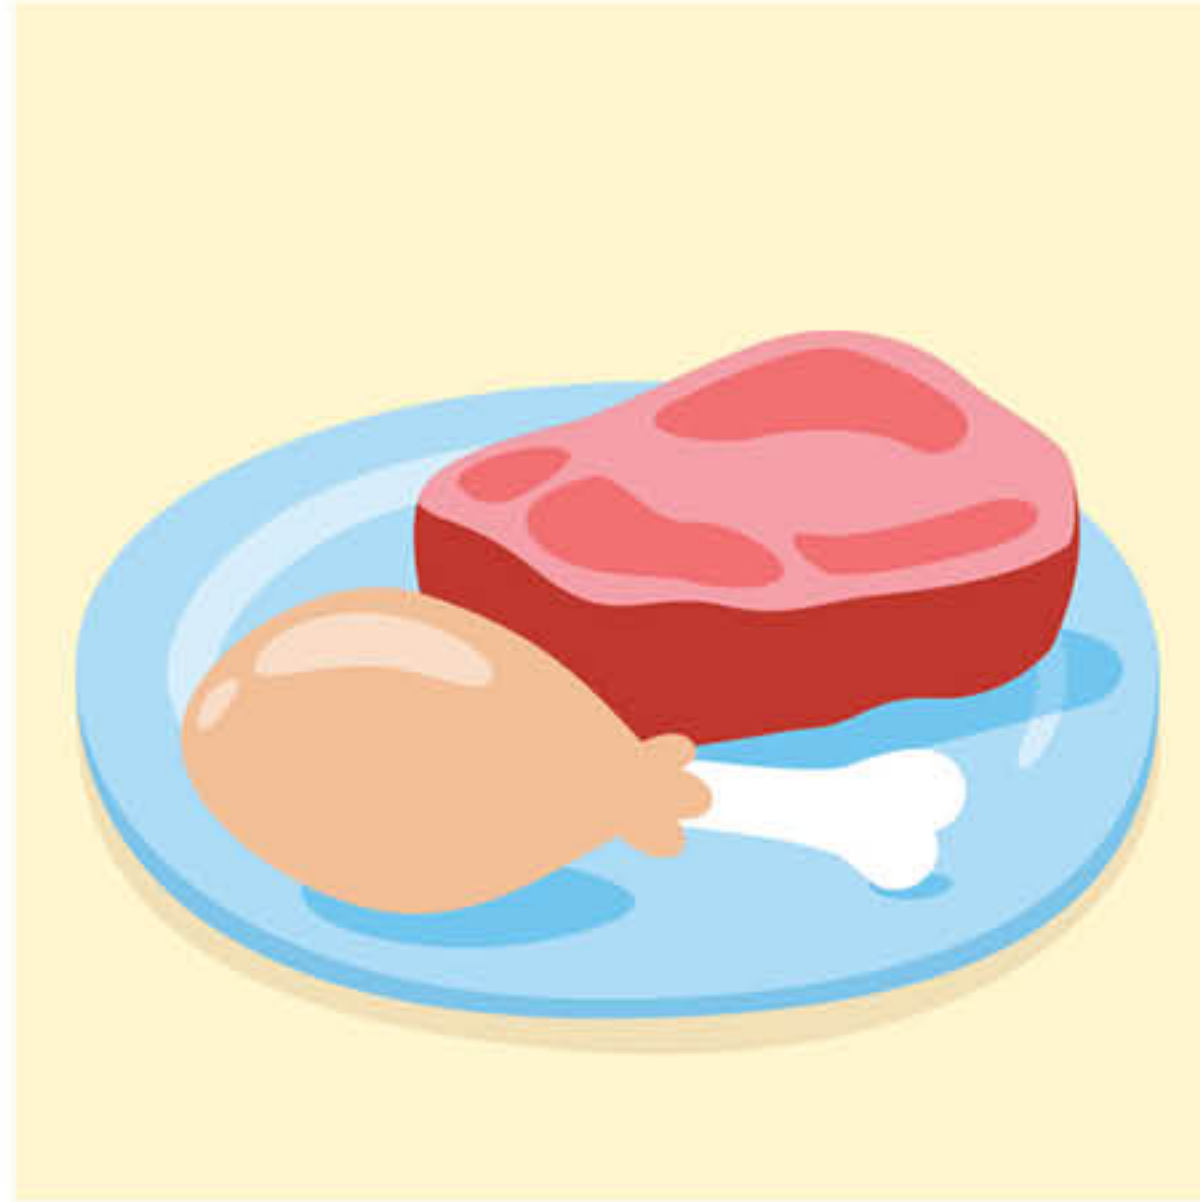

Classic English Junior Level 5 - Unit 1 - Lesson 7

INTENSIVE READING

**WARM-UP**

What would happen if you eat these?

## • LET'S PREPARE! •

## VOCABULARY

safe

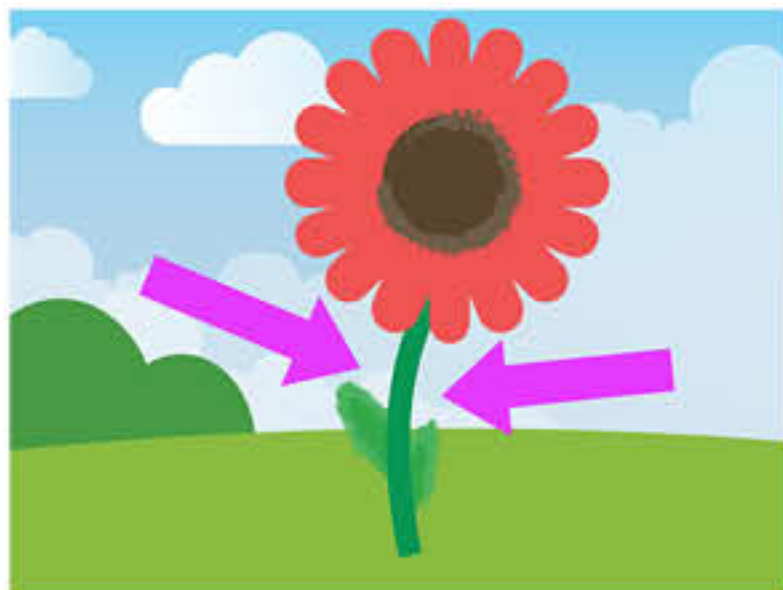

cautious

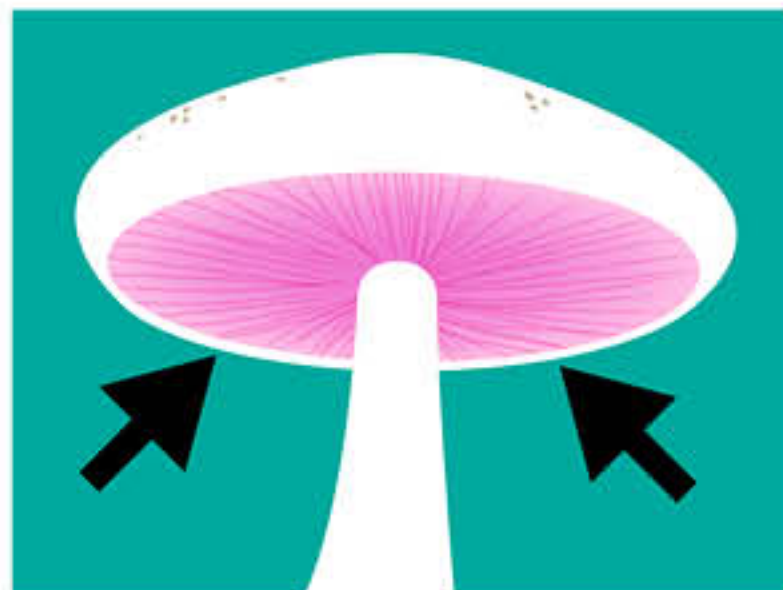

rule

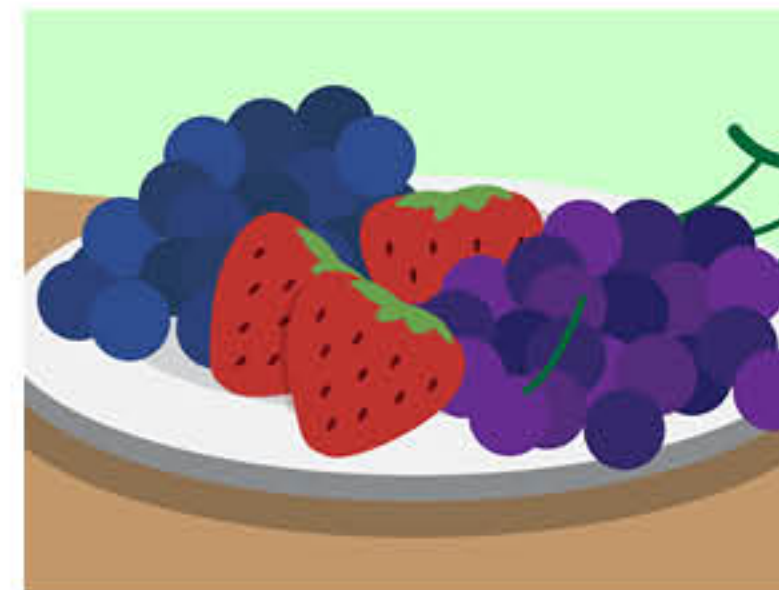

cap

stem

gill

berry

look for

## GRAMMAR

We use the **first conditional** when talking about possible future events. It consists of two parts:

If + present simple, ... will + ...  
**If** you study hard, you **will** pass the exam.

**Match the phrases to make correct first conditional statements.**

If you sleep early, ...

... you will get wet.

If you play in the rain, ...

... you will wake up early, too.

## READING SKILL

### Fact and opinion

Determining whether a piece of information is a fact or an opinion allows you to know which details are true and which are someone's thoughts or feelings about a topic.

**Fact:** The button mushroom is a kind of mushroom that you can eat.

**Opinion:** Some people love burgers with mushrooms.

**Say if each statement is a fact or an opinion.**

- Chocolate comes from cacao beans, which grow on cacao trees.
- Most people love chocolates.
- Dark chocolate and milk chocolate are some kinds of chocolates.
- Many people think milk chocolate is delicious.

## • LET'S READ! •

Guess the name of each kind of food.

## INTENSIVE READING

### SAFE TO EAT?

Do you think that all the food in the forest is **safe** to eat? Actually, most things aren't. We need to be very **cautious** when looking for food.

Let's learn about how to look for food in the forest. The most important **rule** to remember is this: if you don't know what the food is, then you had better not eat it.

## MUSHROOMS

Mushrooms are delicious and can be found in most forests. But can we eat all of them? If you want to eat a mushroom that is in the forest, then you need to know what kind of mushroom it is.

Mushrooms with a red **cap** or **stem** aren't safe to eat. They're extremely poisonous. Mushrooms with white **gills** are also not safe to eat. They can be poisonous as well.

## BERRIES

There are often many kinds of **berries** in the forest. But are all berries safe to eat? Of course not!

Most white and yellow berries are poisonous. For red berries, about one-half are safe to eat. Almost all of blue, black, and purple berries are also safe to eat. **If** you want to eat berries in the forest, you **will** need to remember this rule.

**Say which one is a fact and which one is an opinion.**

- Many red, blue, black, and purple berries are delicious.
- White and yellow berries are not safe to eat because they're poisonous.

## OTHER FRUITS

How about other fruits? Most fruits that grow on stems are safe to eat. Some examples of these fruits are apples, cherries, and oranges.

Remember to think about what's safe and what isn't safe when **looking for** food in the forest. If you don't know what something is, then it's better not to eat it.

## WRITING PREPARATION

Which kinds of food in the box are safe and not safe to eat? Why?

SAFE TO EAT	NOT SAFE TO EAT

### FOOD IN THE FOREST

mushrooms

cap

stem

gill

berries

## WRITING PROJECT

Read and answer.

Imagine you are in a forest and you need to find food.

- 1 What can you safely eat?
- 2 What should you avoid?  
Why should you avoid them?

Write a passage about this after class.

## Today we learned:

### TOPIC

Food – Safe to Eat?

### GRAMMAR

First conditional

**If** you want to eat berries in the forest, you **will** need to remember this rule.

### READING SKILL

Fact and opinion
