This mushroom has pink **gills** under its white cap.

Have you ever seen or touched the gills of a mushroom?

VOCABULARY

ber·ry

Some of the most popular **berries** are strawberries, blueberries, raspberries, and grapes.

look for

It's easy to **look for** trees with fruits in the forest.

What berries do you like to eat?

GENRE

Nonfiction refers to fact-based literature, stories, and opinions about real people, animals, things, or events.

Example:

A Dangerous Dish

Fugu is a Japanese dish prepared from puffer fish. It is one of the most dangerous dishes to eat because the organs of a puffer fish are poisonous. Only chefs that have trained for three years are allowed to prepare this dish. Despite the dangers of eating puffer fish, many Japanese still consider it as a special dish.

Food you can eat

Food you cannot eat

FAST READING

SAFE TO EAT?

Do you think that all the food in the forest is **safe** to eat? Actually, most things aren't. We need to be very **cautious** when looking for food.

Let's learn about how to look for food in the forest. The most important rule to remember is this: if you don't know what the food is, then you had better not eat it.

What do we need to do when looking for food in the forest?

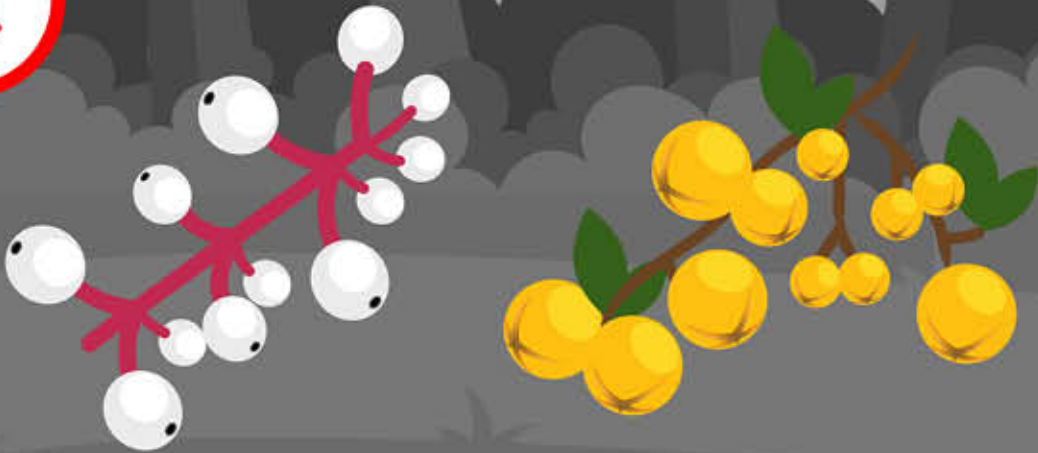

MUSHROOMS

Mushrooms are delicious and can be found in most forests. But can we eat all of them? If you want to eat a mushroom that is in the forest, then you need to know what kind of mushroom it is.

Mushrooms with a red **cap** or **stem** aren't safe to eat. They're extremely poisonous. Mushrooms with white **gills** are also not safe to eat. They can be poisonous as well.

Which mushrooms are not safe to eat?

BERRIES

There are often many kinds of **berries** in the forest. But are all berries safe to eat? Of course not!

Most white and yellow berries are poisonous. For red berries, about one-half are safe to eat. Almost all of blue, black, and purple berries are also safe to eat. If you want to eat berries in the forest, you'll need to remember this rule.

Which berries are safe to eat?

OTHER FRUITS

How about other fruits? Most fruits that grow on stems are safe to eat. Some examples of these fruits are apples, cherries, and oranges.

Remember to think about what's safe and what isn't safe when **looking for** food in the forest. If you don't know what something is, then it's better not to eat it.

What are some examples of fruits that grow on stems?

ACTIVITY

Match the sentences with the correct words.

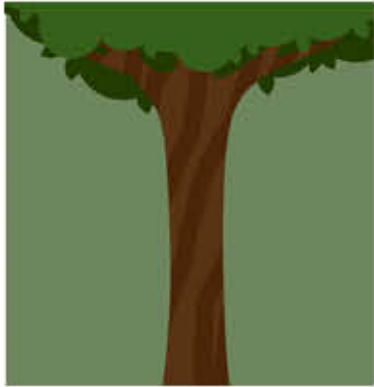

1. When something is _____, it's not dangerous or harmful.
2. A _____ person tries to stay away from danger.
3. A _____ is an instruction about what you must or must not do.
