What is an airplane?

An airplane is a winged **aircraft** that flies through the sky by using thrust from a jet **engine**.
The number of engines can vary.

2

How can an airplane fly to the sky?

3

The front part of the airplane

The front part of the airplane is called the “nose”. Here you can see the cockpit—a cockpit is where the pilot sits and flies the plane.

4

5

The middle part of the airplane

The middle part of the airplane, which we call the **fuselage**, is where **passengers** sit and goods are carried. The passengers sitting beside the window can see a sea of clouds during the flight.

6

Without the fuselage, there would be nowhere to keep the huge amount of fuel needed to keep the airplane in the sky.

What is the fuselage?

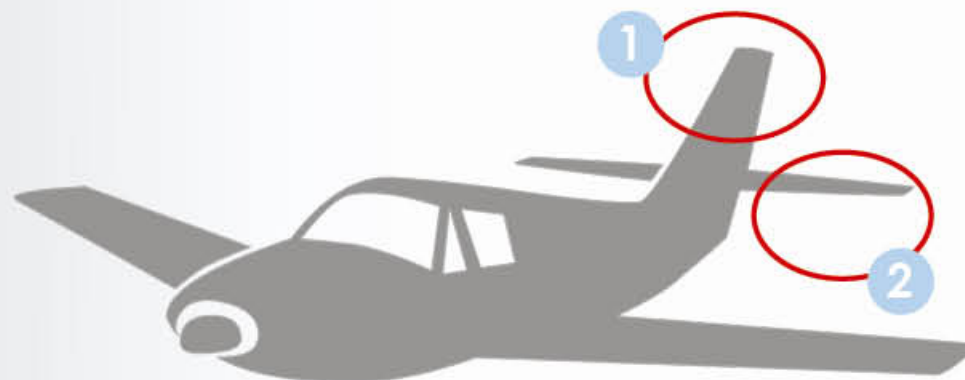

7

The back part of the airplane

The back part of the airplane is called the “tail”. Here you can see the **horizontal stabilizer** and **vertical stabilizer**.

horizontal stabilizer

vertical stabilizer

8

Can you match the horizontal stabilizer and vertical stabilizer?

9

The bottom part of the airplane

On the bottom part of the airplane you will find the **landing gear**. Without this, the airplane could not take off or land!

“Mr. Brown, are airplanes easy to fly?”
Timmy asked.

“No, they are extremely difficult to fly and it takes years of hard work and practice to be good enough to fly one,” said Mr. Brown.

See You Soon!

A cartoon illustration of a young boy with brown, curly hair and freckles, wearing a yellow zip-up hoodie over a blue shirt and dark pants with white shoes. He is smiling and waving with his right hand. He is positioned on the left side of the image, standing in front of several large, stylized yellow and orange stars. The background is a solid blue color with a repeating pattern of white and blue zig-zag lines.
