# The Most Dangerous

We are going to learn about some of the most dangerous animals in the world.

Warm-up

2 min

What things scare you? Why?

**Reading****3** min

**Read with the teacher and then answer the question below.**

From snakes to crocodiles, the **deadliest** animals on our planet have different ways to attack. Some use **venom**, while some use their strength to attack their enemies.

What ways can animals attack others?

To be continued... >>

**Reading** **4** min

**Read with the teacher and then answer the question below.**

The Black Mamba is the most dangerous snake in the world. Its venom is so strong that any person it bites can die within half an hour. The Black Mamba **feeds on** small birds and rodents and will only attack humans when scared.

Why do you think the Black Mamba feeds on small animals?

**To be continued...** >>

## Reading 3 min

**Read with the teacher and then move to the Word Focus.**

The **mosquito** may be tiny, but it's still very dangerous. This little insect is found all around the world and it can transfer deadly **viruses** from one person to another.

### Word Focus

- **Viruses** can make people very ill.
- Have you ever had **viruses**?

To be continued... >>

**Reading** **4** min

**Read with the teacher and then answer the questions below.**

The golden poison frog is very dangerous, too. It has enough **poison** on its skin to kill ten humans. A person can die from just touching this very cute but deadly frog.

What should you do if you see a golden poison frog? Why?

**Task****4**

min

**Match the pictures with the correct sentences.**

**1**

I can transfer viruses from one person to another.

**2**

I have venom that can kill a person in half an hour.

**3**

I am very cute, but very dangerous too. I have poison all over my skin.

**More challenges! >>**

**Leadership****4** min**Discuss with the teacher.**

What other dangerous animals do you know? Why are they dangerous?
