The Solar System You Don't Know

Lesson Structure

1	Learning Objective
2	Warm-up
3	Reading Preparation—Vocabulary
4	Genre
5	Fast Reading
6	Wrap-up

You are going to read an article called
“The Solar System You Don't Know”.
In the article you will learn:

Genre

Brochure

Key Words and Phrases

solar system, enormous, solar flare, asteroid, crust,
jigsaw, crater, crash

Warm-up

01:00

What do you know about the solar system?

What I Know

.....

What I Want to Know

.....

What do you want to know about the solar system?

Let's GO!

Reading Preparation—Vocabulary

02:00

Learn and say.

**solar system**

Our **solar system** is one of many located in the Milky Way.

**e•nor•mous** *adj*

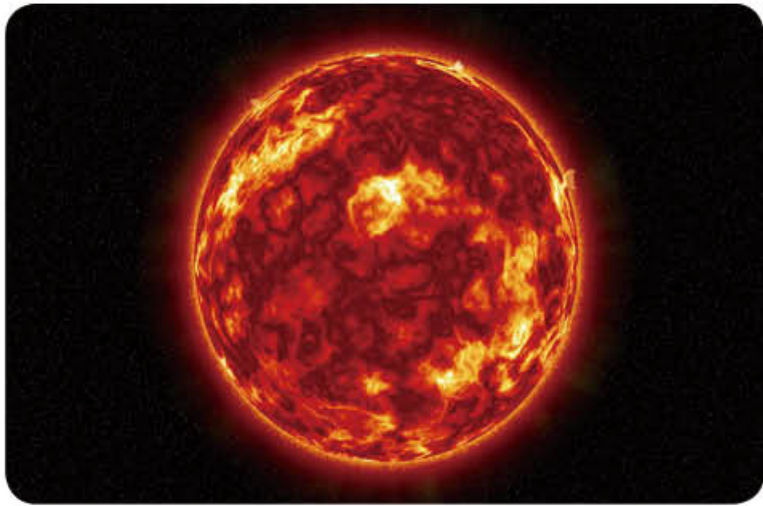

The clouds look small compared to the **enormous** blue sky.

Use a **key word** or **phrase** to ask a question:

Reading Preparation—Vocabulary

02:00

Learn and say.

**solar flare**

We can't see **solar flares** with our naked eyes.

**as•te•roid** *n*

Asteroids are found between Mars and Jupiter.

Use a **key word** or **phrase** to make a sentence:

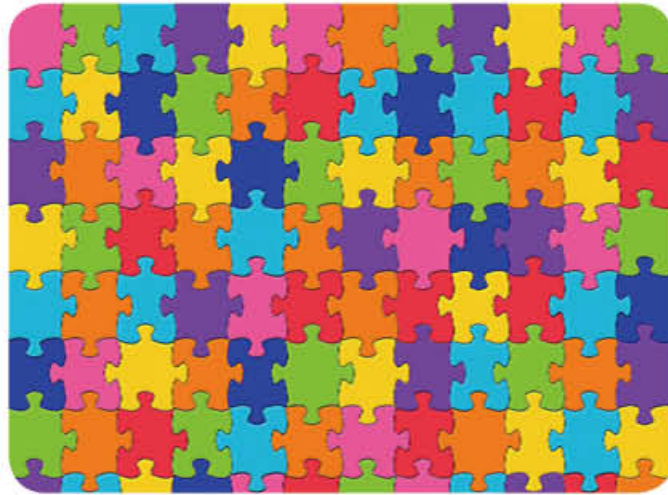

Reading Preparation—Vocabulary

02:00

Learn and say.

**crust** *n*

A **crust** is a hard layer of rocks.

**jig•saw** *n*

This is a 1000 piece **jigsaw**.

Use a **key word** to make a sentence:

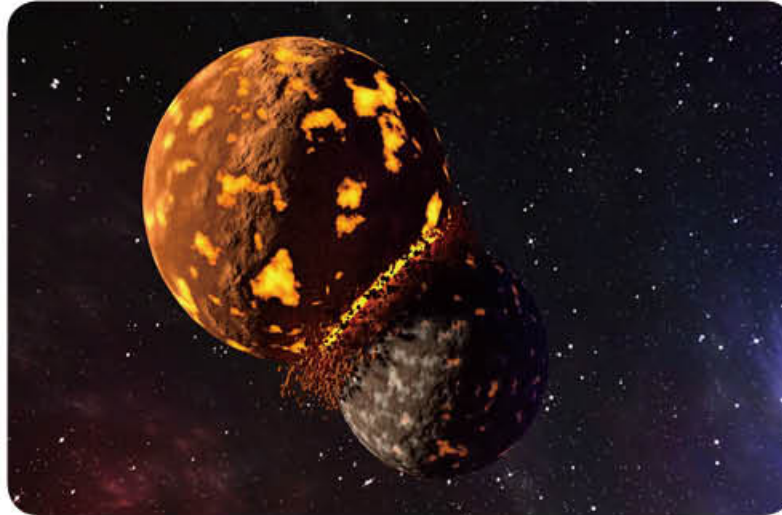

Reading Preparation—Vocabulary

02:00

Learn and say.

**cra•ter** n

These are the **craters** on the surface of the moon.

**crash** v

The big planet **crashed** into the small one.

Explain a **key word** with your own words:

Let's Read!

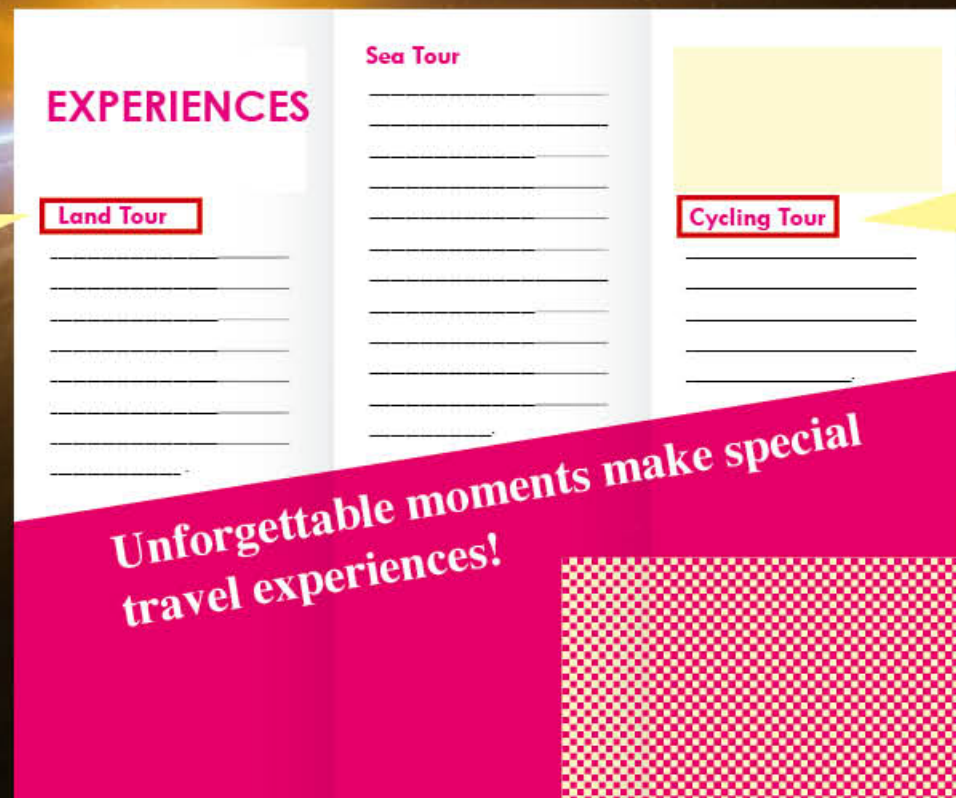

Brochure

A **brochure** is **an informational text**.

It's often used for advertising and can be folded.

What is this feature?

How can this feature help us in reading?

*For I dipped into the future, far as
human eye could see, saw the vision
of the world, and all the wonder that
would be.*

—Alfred Lord Tennyson (UK), 1842

The Solar System You **Don't** Know

**Do you know how many planets
there are in the solar system?**

Fast Reading

02:00

The **solar system** is so **ENORMOUS**.
It goes on ... and on ... and on ...
Let's see what we are going to
find ...

The Sun

The Sun is a big star. It continually
explodes, giving off heat and light
every second.

Some explosions are so huge.
You can even see them from the
Earth. We call them **solar flares**.

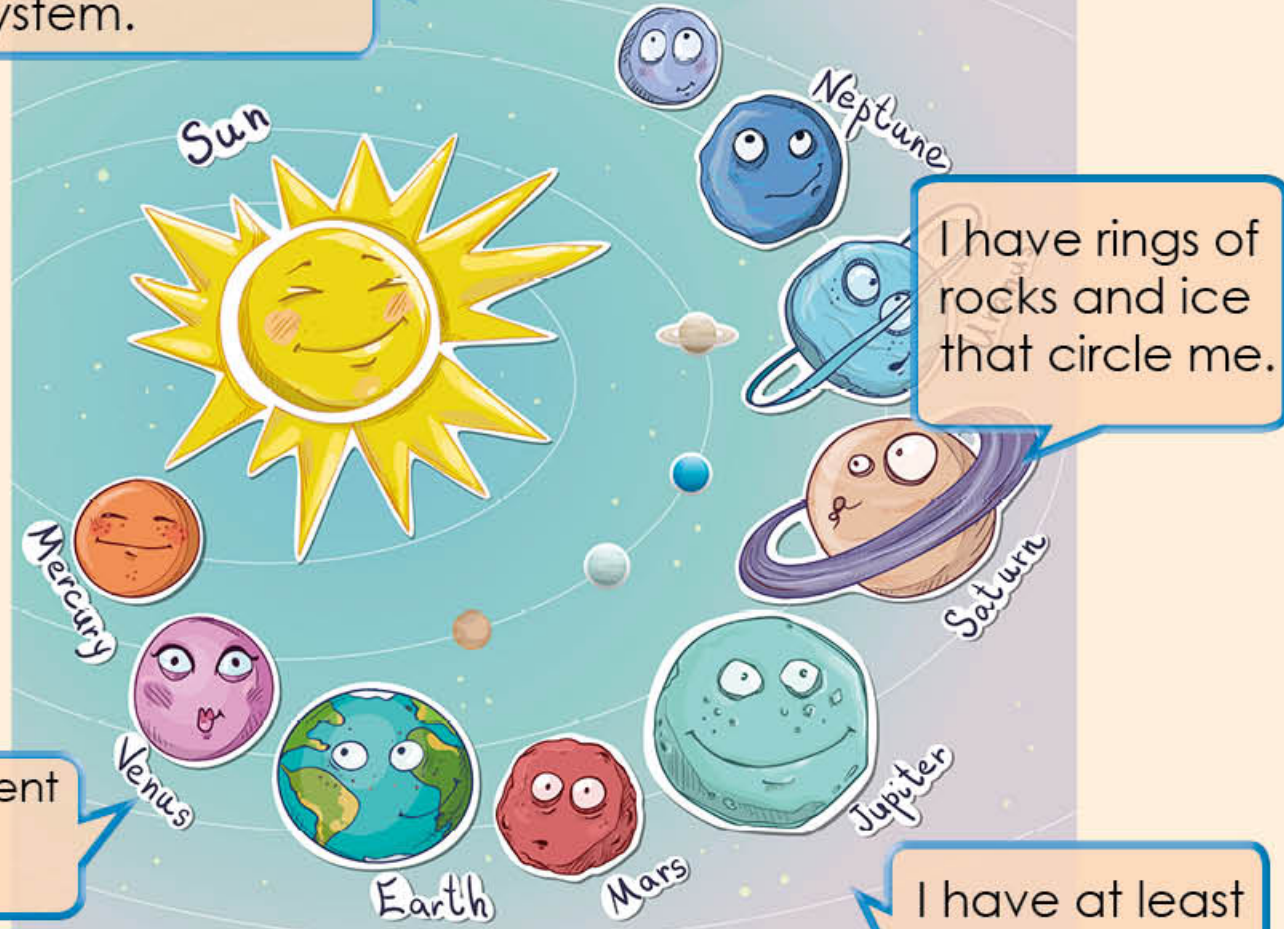

What kind of explosion can
we see from the Earth?

Including our lovely Earth, all together there are eight planets that travel around the Sun. The Sun, the planets and everything that travels around the Sun, are known as the solar system. Some planets have one or more moons circling around them. The bands of rocks that are also found in the solar system are called **asteroids**.

The planets

I am the hottest place in the solar system.

I have rings of rocks and ice that circle me.

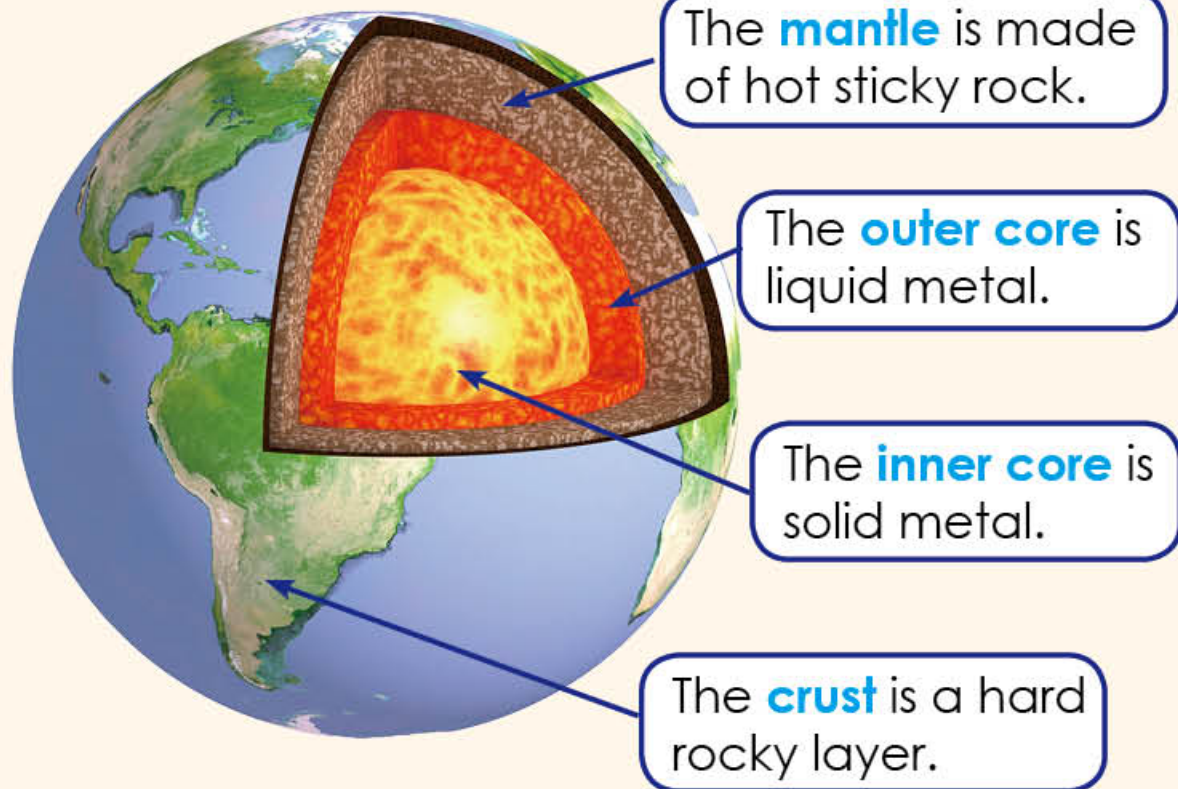

I have at least 63 moons.

I am named for the ancient Roman goddess of love and beauty.

What is the subheading of this section?

The Earth

We live on the Earth, which is a big ball of rock.

The Earth is made of many layers. The top layer is a hard rocky layer called the **crust**. The crust can be divided into huge plates. And the plates fit together like pieces of a **jigsaw** puzzle.

Can you name the layers that are mentioned in this section?

The Moon

The Moon is a rocky ball that circles the Earth. It's the only natural satellite of the Earth.

It takes 28 days for the Moon to circle the Earth once.

The holes on the surface are called **craters**. More and more craters were formed when big rocks **crashed** into the Moon.

Why are there so many craters on the surface of the Moon?

Take a look at the sky at night, and
see if you can spot these things:
The Moon ... the stars ...

What else can you find at night?

Wrap-up

02:00

I Can Do It

Today we read an informational text about the solar system.

KWL CHART

What I **K**nowWhat I **W**ant to KnowWhat I **L**earned

Wrap-up
