leap year

How many days are in a leap year?

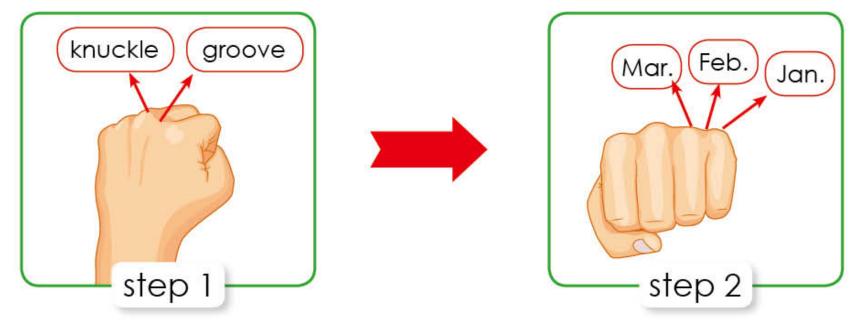

Sentence Pattern

First, make your hands into fists. Then, count the months on your knuckles and the grooves in between.

One day, Timmy was confused about how to remember days in different months.

What made Timmy confused?

"Timmy, I know a trick to remember them. Do you want to learn?" said Grandpa with a secret smile. Timmy shouted, "Tell me, please! Grandpa!"

What is the trick used for?

"OK, OK," Grandpa said. "First, make your hands into fists. Then, count the months on your knuckles and the grooves in between. Start with January on your left hand's little finger's knuckle."

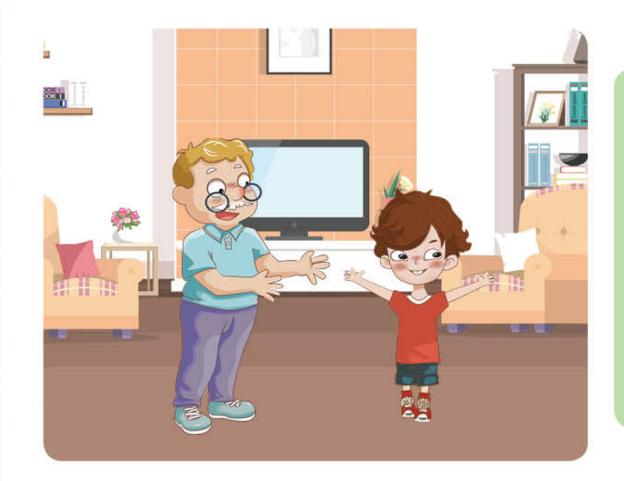

"I got it! Each knuckle month has thirty-one days, and each groove month has thirty days!" shouted Timmy.

What is the first step of Grandpa's trick?

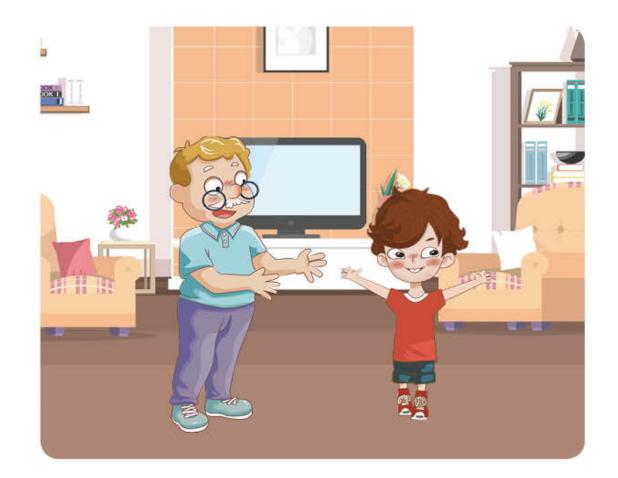

"Now, can you tell me how many days are in March?" asked Grandpa. "Let me count... It's a knuckle month. So March has thirty-one days!" answered Timmy. "Ha-ha, my boy! You can show this trick to your friends!" laughed Grandpa.

How many days are in a knuckle month?

Grandpa reminded Timmy, "But don't forget one thing — February is a special month." Timmy replied, "I know! February usually has twenty-eight days, or it has twenty-nine days in a leap year!"

Why is February special?
