Unit 6 Nature

Topic 4—Lesson 2(下篇)

A thing that you can do to improve the environment

IELTS Speaking Part 2 (10 minutes)

You will be given one minute to prepare to talk about the topic on the task card. You will have to talk for 1-2 minutes, and then the teacher will give you feedback for 2-3mins. (5 minutes)

Describe a thing you did that is good for the environment.

You should say:

what it was about

when you did it

how you did it

and **explain why** you did that thing and **what** result it led to.

Tips: During the first stage of Part 2, you don't need to talk. Keep the questions in mind and think them over.

2.3 Here is another model for the IELTS Speaking Part 2. We will focus on the words and expressions highlighted and in red below. (5 minutes)

Model 2

What it was: I consider myself to be environmentally green and I am always looking for ways to protect the environment, so recently I have sold my car and cycle everywhere I need to go.

When you did it: I **became aware of** the need to protect our environment about a year ago while I was driving to work. That morning the air was particularly polluted; I could barely see the vehicle in front of me. The smog was so heavy that I had to turn on my **fog lights** just to get any kind of visibility. Then I decided that I should be part of the solution, not the problem. The next day I bought a bicycle.

How you did it: This was the easy part. I simply went to one of the many bicycle shops in my city and purchased the best one I could find. Of course I also had to purchase special gear, such as a helmet and a special protective mask. I also bought a pair of inexpensive goggles to protect my eyes from debris.

Why you did it and what the result was: The reason I did it was **two-fold**. I wanted to help the environment and also get in shape. Mostly, the process is still ongoing but I feel much more self-confident about my body now than I ever have before. I also feel very proud that I am no longer contributing to the horrendous pollution in my city.

IV. IELTS Speaking Part 3 (10 mins)

1. Please answer the following question from Part 3. According to your answer, the teacher will give you feedback on how to improve your organisational skills. (5 minutes)

How to organise your answer in Part 3:

I: Introduction Sentence + P: Points (Point1, Point2...)

What suggestions could you give to solve the pollution problem?

I: In my opinion, there is much that should be done to deal with pollution.

P1: I propose that factories use less coal, which is a major contributor to pollution, and use a more sustainable resource for fuel, such as wind power, **geothermal power**, and solar power. Only by taking advantage of a power source that reduces the creation of harmful substances can the pollution issue begin to be solved.

P2: Additionally, less reliance on meat could help reduce methane emissions into the atmosphere, since farms and cows are a major contributor to this type of harmful gas.

2. You will learn some key words and expressions from these questions. Pay attention to the structure of the underlined sentences, and the words in red. (5 minutes)

Key Words and Models

What role do you think the government should play?

Governments of the world should impose hefty taxes on carbon emissions, and punish those who are responsible for polluting the environment. I think corporations that utilise materials emitting toxic pollutants should pay more taxes. I would suggest that extremely rigid fines be **doled out** to offenders, and for frequent offenders prison time and community service should be administered.

What can individuals do to help?

I think individuals play a vital role in helping establish a more sustainable environment. In principle, governments are made up of individuals, and we **are** all **accountable for** our actions; therefore, all individuals should do everything in their power to come together and solve the pollution problem. People should buy electric cars, recycle, and donate money to non-profit organisations whose goal is to protect the environment.

V. Summary (5 minutes)

Key Words & Expressions

become aware of

fog light

two-fold

geothermal power

dole out

be accountable for

Key Sentences

I **became aware of** the need to protect our environment about a year ago while I was driving to work.

The smog was so bad that I had to turn on my **fog lights** just to get any kind of visibility.

The reason I did it was **two-fold**.

I propose that factories use less coal, which is a major contributor to pollution, and use a more sustainable resource for fuel, such as wind power, **geothermal power**, and solar power.

I would suggest that extremely rigid fines be **doled out** to offenders, and for frequent offenders prison time and community service should be administered.

In principle, governments are made up of individuals, and we **are** all **accountable for** our actions.

The next lesson will be **Unit 6 Topic 5 The worst weather you have experienced in your life.**
