雅思口语高级
——冲刺 7.5 分

Unit 7 Culture

Topic 6—Lesson 2(下篇)

A foreign language you would like to learn (not English)

IELTS Speaking Part 2 (10 minutes)

You will be given one minute to prepare to talk about the topic on the task card. You will have to talk for 1-2 minutes, and then the teacher will give you feedback for 2-3mins. (5 minutes)

**Describe another language you would learn
(not English).**

You should say:

what it is

where you learn it

how you learn it

and **explain why** you would learn it.

Tips: During the first stage of Part 2, you don't need to talk. Keep the questions in mind and think them over.

2.3 Here is another model for the IELTS Speaking Part 2. We will focus on the words and expressions highlighted and in red below. (5 minutes)

Model 2

What it is: To tell you the truth, the one foreign language I've wanted to learn for a while is Latin, a classical language belonging to the Italic branch of the Indo-European languages.

Where you learn it: Latin seldom needs to be spoken, if ever. The whole learning process can be carried out through books as it consists of reading and writing only. In other words, this language can be studied at any time and on any occasions, so I shall try and learn Latin whenever I am free, either between classes or in the evenings.

How you learn it: Just as I mentioned previously, I shall be learning this mysterious language through textbooks. In fact, learning Latin essentially boils down to remembering vocabulary and dealing with the ever so finicky grammar. However, I do believe my meagre knowledge of English may present me with an upper hand. Therefore, I am confident enough to tackle Latin texts, which always appear so exciting to me, later on in my quest.

Why you would learn it: I have attempted to learn Latin before, yet quickly gave up on such an endeavour as I merely labelled the language as useless. It was quite a grave mistake on my behalf, I dare say. Hopefully the past can be atoned by my completing the studies now, for I hate giving up half way through. Another yet more powerful reason lies in the fact that Latin can be of tremendous assistance when I intend to understand English words and to learn other European languages, which is definitely something I have planned for the future.

IV. IELTS Speaking Part 3 (10 mins)

1. Please answer the following question from Part 3. According to your answer, the teacher will give you feedback on how to improve your organisational skills. (5 minutes)

How to organise your answer in Part 3:

I: Introduction Sentence + P: Points (Point1, Point2...)

What are some interesting things about learning another language?

I: Learning about foreign languages is interesting in many aspects.

P1: Since there are always new words and scenarios to learn, you are constantly being introduced to stimulating activities. These activities keep things fresh and make you look forward to future lessons!

P2: Also, if you happen to learn a new language with a partner or classmates, you will definitely make new friends in the process.

P3: Having the ability to speak another language could also open other possibilities, such as better job prospects or even romantic relationships.

2. You will learn some key words and expressions from these questions. Pay attention to the structure of the underlined sentences, and the words in red. (5 minutes)

Key Words and Models

What are the difficulties in learning another language?

 There are many different hardships related to learning another language. For example, it often starts off difficult, as the first thing you have to learn is a completely different **alphabet**, which can be even harder if you are used to character-based languages. Then there are the traditional difficulties faced by those who are learning a second language: grammar and vocabulary. More often than not, learning both grammar and vocabulary can be a lifelong endeavour.

Do you think learning more languages is good for intelligence development?

 I think it would be rather short-sighted to believe that learning a foreign language is not beneficial for one's overall intelligence. Little is understood about the intelligence of animals, **let alone** the intelligence of human beings. However, it is no secret that having a spoken language has allowed us to **prosper** and spread upon this great planet that we inhabit. So if learning your native tongue can boost your intelligence, then it stands to reason that learning several languages would double or triple your intelligence. Of course this is merely my opinion on the subject and there will always be exceptions.
