#### Model 2

**What:** A small successful company that is growing rapidly called Tesla Motors, is the company I would like to talk about. Tesla Motors is an American automotive and energy storage company.

**What it does:** Tesla Motors manufactures and designs electric vehicles. Tesla Motors also manufactures efficient batteries for energy storage in electric vehicles sold all over the world and in the home. For example, many solar powered homes are now using Tesla's batteries for energy use and storage.

**How you know of it:** I first learned of this company through a friend of mine, who is an environmentalist. My friend is always reading about new companies that work to safeguard the natural environment in one way or the other.

**Why:** I believe that the major reason for its huge success is that it raises awareness to the general public that electric vehicles are a safe and clean alternative to the traditional motorized vehicle. It's considered an efficient approach to reduce harmful gas that damage the ozone layer, because it can use renewable electricity as a power source. Thanks to Tesla, we now know that electric vehicles can be efficient in reducing our carbon footprint, which is harmful to the environment.

You are required to talk for the full 2 minutes.
