What the animal is: I'm going to talk about my favourite animal, the **giant** panda.

Where it can be found: This animal can be found in most city zoos in China. Pandas are black and white bears. They are among the most recognised but rarest animals in the world.

What is special about it: They love eating a lot of bamboo and that's why they live in bamboo forests. They are now **endangered species** and a lot of them are placed in zoos and need to be taken extra care of. Adult giant pandas are generally alone, but they do communicate regularly through smelling marks, calls, and occasional meetings.

How people feel about it: Many people find these chunky animals very cute, but sometimes giant pandas can be as dangerous as any other bear.

You are required to talk for the full 2 minutes.
