These foreigners make China their new home so many of them speak Chinese fluently.

global influence

China's growing **global influence** has led to more and more business abroad, so Chinese language has become essential for international companies and foreign governments, which, definitely, has made Chinese an important language.

aspect

Example: Generally, I think that all languages have what could be considered a variety of challenging **aspects**. When comparing Chinese and English, I believe that Chinese is not too hard to speak since its alphabet has been Romanized using Pinyin, but when it comes to learning Chinese characters for writing it might be more difficult for a native English speaker, since they are not used to a character-based writing system.

Model 1

How and what: A culture that I find interesting is Native American culture. The first time I ever heard about Native Americans was when reading a book about early American history.

What: Native Americans have a fascinating tradition of taking captives in a practice known as “mourning wars”. Wars and feuds were a major part of Native American culture, and by taking young captives they were able to absorb their enemies into their own culture and keep them as part of their tribe.

Why: In my opinion, the Native American culture is fascinating because they were able to live in harmony with nature and by taking people from other tribes created the first melting pot in the United States. Native Americans worshiped nature. They followed the rules of nature — used the resources of the earth fully and made good neighbours with wild animals, which teaches modern people, who develop the economy at the expense of the environment, a good lesson. Meanwhile, the Native Americans absorbed other cultures which formed diverse cultural heritages, like different tribal dialects, which is similar to modern society. All in all, the Native American culture is amazing and worth getting to know.
