Model 1

What: I love to learn, so a useful app that I recommend is DXX. It is a language learning app.

What content: The content is very straightforward. This app provides a series of lessons with each lesson getting progressively more difficult each time. What sets this app apart from other language learning apps is that it is free and it encourages the user to learn by giving out rewards for passing lessons.

How: I use this app as a way to improve my language learning abilities and to give myself an introduction of other foreign languages that one is interested in.

Why: I think that in order for an app to be considered useful it should either make our lives better or tasks easier in some way. DXX helps me to be a better student because it motivates me to study a foreign language for at least an hour each day. Thanks to this app's clear structure and amazing reward system, it has become a useful part of my routine and has made me much more productive in my foreign language studies.
