How: I normally use this app as a way to keep me **focused on** working out. In the app I can keep track of how many exercises I have completed and even how long it takes me to finish them.

Key words and key sentences

excessive

 Example: In China, You have a range of cell phones that you can choose from according to your budget. However, the main cost of owning a phone comes from your service provider. They normally charge an **excessive** amount in fees or other hidden extra charges for international calls. If you happen to be overseas, these companies charge you for every minute and every megabyte you employ, therefore international calls are expensive.

assume

 Example: I **assume** that cell phones will replace landlines in the near future. I feel that globalization will cause more people to travel and do business abroad, which will increase the need for cell phones. Landlines might still exist in certain circumstances though. For example, they might remain useful for communication between government organisations and between military bases.

potential

 Example: In my opinion, technological advancement is always going to play an important role in modern society. Even today, we have smart watches that are beginning to be popular, so these actually have the **potential** to replace cell phones someday.
