

51Talk IELTS Speaking-Advanced

雅思口语高级

——冲刺 7.5 分

Unit 8 Technology and invention

Topic 2—Lesson 2(下篇)

A useful website you have visited

IELTS Speaking Part 2 (10 minutes)

You will be given one minute to prepare to talk about the topic on the task card. You will have to talk for 1-2 minutes, and then the teacher will give you feedback for 2-3mins. (5 minutes)

Describe a useful website you have visited.

You should say:

what the website was

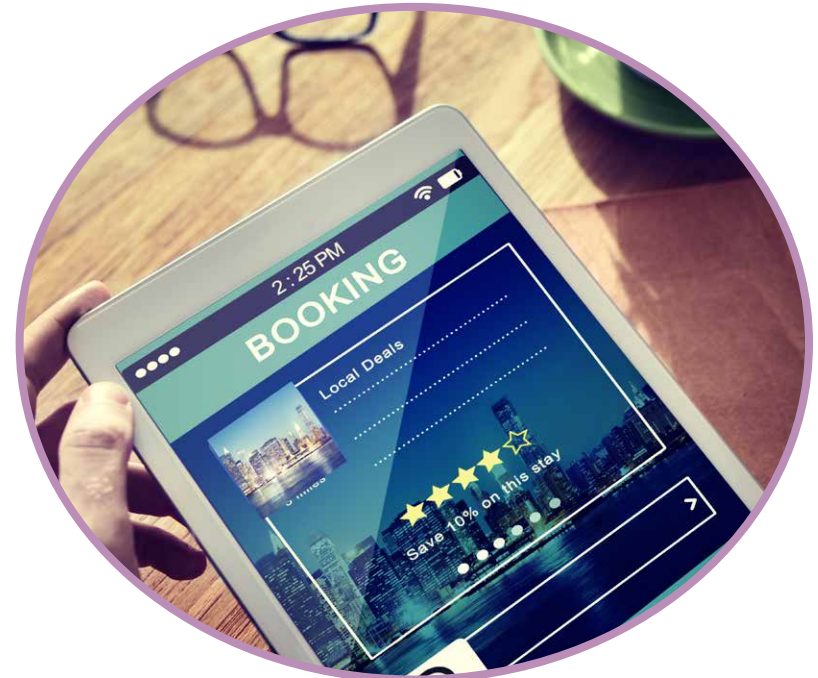

how you found the address for this website

what the website contains

and **explain why** it was useful to you.

Tips: During the first stage of Part 2, you don't need to talk. Keep the questions in mind and think them over.

2.3 Here is another model for the IELTS Speaking Part 2. We will focus on the words and expressions highlighted and in red below. (5 minutes)

Model 2

What the website was: Nowadays with the increasing interconnectedness of the world through various undersea cables and satellites, accessing the Internet for most of the global population has never been more convenient. The web has proven to be an invaluable source in all matters ranging from academia to entertainment, and websites are the main medium for the exchange of information. My own favourite website to visit is Wired.

How you found the address for this website: I first stumbled upon this website by accident when I inadvertently clicked on an advertisement about this online magazine.

What the website contains: Wired contains news that pertains to the technology industry as a whole and is considered an unbiased source. If you have any questions that are related to technology, this website will undoubtedly have the answer stored away in their numerous archives. Their “when to upgrade” articles are informative and consumer friendly, giving customers the power to make an informed decision on when to buy a device based on the current upgrade cycles.

Why it was useful to you: Thanks to this informative website, I was able to avoid purchasing an already outdated model of my favourite laptop brand, which was extremely helpful since the model I would have bought would have been obsolete in little more than half a month. This website in general has proven to be a huge knowledge base to pull from, which has helped me to become a more informed shopper and citizen.

IV. IELTS Speaking Part 3 (10 mins)

1. Please answer the following question from Part 3. According to your answer, the teacher will give you feedback on how to improve your organisational skills. (5 minutes)

How to organise your answer in Part 3:

T: Topic Sentence + S: Supporting Details (Explanation/Examples)

What effect has the Internet had on the way people generally communicate with each other?

T: The advent of the Internet has had drastic effects on the way people communicate.

S1: First, since the Internet is easily accessible and allows for near **instantaneous** sending and receiving of messages, it makes people's mode of communication faster and more economical than ever before. In other words, there is no longer the need for people spend too much time or money exchanging ideas with others.

S2: Moreover, this shift in the preferred method of communicating was first brought about by chatrooms, which trained people to communicate by typing out words, and the fact that text-messages are so popular today illustrates this point.

2. You will learn some key words and expressions from these questions. Pay attention to the structure of the underlined sentences, and the words in red. (5 minutes)

Key Words and Models

Why do you think the Internet is being used more and more for communication?

 I suspect that the use of the Internet follows similar principles as supply and demand. As more and more people have come online, this has increased the demand for this popular service and it is no secret that the Internet is rich in features and opportunities. Once this demand has peaked, the supply **catches up** and becomes complex and more technically advanced, thus perpetuating the cycle.

How reliable do you think information from the Internet is? Why?

 The Internet has a plethora of information to sort through, but the nature of the Internet is that any and all information can be added and therefore it is up to the individual to search for specific information. The reliability of said information depends on the source and the purpose of each piece of information. Information from scientific and academic sources should be regarded as the top-tier reliability whereas other information should be taken with **a grain of salt**.

V. Summary (5 minutes)

Key Words & Expressions

academia

as a whole

obsolete

instantaneous

catch up

a grain of salt

Key Sentences

The web has proven to be an invaluable source in all matters ranging from **academia** to entertainment, and websites are the main medium for the exchange of information.

Wired contains news that pertains to the technology industry **as a whole** and is considered an unbiased source.

Thanks to this informative website, I was able to avoid purchasing an already outdated model of my favourite laptop brand, which was extremely helpful since the model I would have bought would have been **obsolete** in little more than half a month.

First, since the Internet is easily accessible and allows for near **instantaneous** sending and receiving of messages, it makes people's mode of communication faster and more economical than ever before.

Once this demand has peaked, the supply **catches up** and becomes complex and more technically advanced, thus perpetuating the cycle.

Information from scientific and academic sources should be regarded as the top-tier reliability whereas other information should be taken with **a grain of salt**.

The next lesson will be **Unit 8 Topic 3 A useful technical skill you learned**.
