Unit 8 Technology and invention

Topic 4—Lesson 2(下篇)

An important invention that has influenced human society

IELTS Speaking Part 2 (10 minutes)

You will be given one minute to prepare to talk about the topic on the task card. You will have to talk for 1-2 minutes, and then the teacher will give you feedback for 2-3mins. (5 minutes)

Describe an important invention (before the age of computers) that has influenced human society.

You should say:

what the invention is

when and where it was invented

how it is used

and **explain how** this invention has influenced society.

Tips: During the first stage of Part 2, you don't need to talk. Keep the questions in mind and think them over.

2.3 Here is another model for the IELTS Speaking Part 2. We will focus on the words and expressions highlighted and in red below. (5 minutes)

Model 2

What the invention is: Perhaps no other invention in recent memory is as prevalent and useful as the invention of the wheel.

When and where it was invented: The first use of the wheel was discovered in the late Ceramic Neolithic Period from 6500 to 4500 BCE. These wheels discovered by archeologists were wooden and used for a wide range of purposes. The first discovery of the wheel was in Mesopotamia, but similar variations were also found in the Eurasian steppes. Today most scholars disagree on whether this invention had a starting point and then spread to other cultures or was developed independently across numerous regions.

How it is used: According to scholars, the wheel was first used as a tool for potters. Later, the wheel was utilised for transportation after the **domestication** of the horse. Over centuries, the design and materials used for wheels have improved, with current iterations using rubber and metal.

How this invention has influenced society: The invention of the wheel has allowed the growth of trade, which has given people access to various commodities. The wheel has also allowed the transfer of messages over great distances and **facilitated** the birth of the modern transportation system. Without this invention, globalisation could not have occurred on the scales that it has **in the past millennia**.

IV. IELTS Speaking Part 3 (10 mins)

1. Please answer the following question from Part 3. According to your answer, the teacher will give you feedback on how to improve your organisational skills. (5 minutes)

How to organise your answer in Part 3:

I: Introduction Sentence + **P:** Points (Point1, Point2...)

What changes have taken place in society as a result of the use of modern technology such as the television and the computer?

I: Obviously, modern technology has brought dramatic changes to society.

P1: The advancements in computer technologies have allowed people to contact each other no matter where they live on the planet as long as they have access to the Internet, and they have even helped create a system of **global capitalism**.

P2: Likewise, television is a medium that gives people valuable information through an easily digestible video format. Thus, societies are able to spread useful information and further scientific breakthroughs.

2. You will learn some key words and expressions from these questions. Pay attention to the structure of the underlined sentences, and the words in red. (5 minutes)

Key Words and Models

Do you think people rely too much on machines and modern technology nowadays?

In the 21st century, it is impossible to live without machines. Modern technology is all around us and permeates our daily lives. It helps us cook our food **in a matter of** minutes and helps us get to work in an equal amount of time. Technology powers our cities and insures a constant supply of clean water while also dispensing our waste. If our technology were to break down, modern society would crumble in a matter of days.

How do you think modern technology will change the way people work in the future?

I think modern technology will change our work patterns **for the better** in the future. I envision a future when most people are able to work at home and very rarely do people need to appear in person at the office. Since most jobs in the future might theoretically be done via the Internet or by controlled robots, people will be free to work in manly creative and scientific industries. I imagine that people will be much more comfortable than us forced to commute long distances in the modern era, thus creating a more productive and happy workforce.

V. Summary (5 minutes)

Key Words & Expressions

domestication

facilitate

in the past millennia

global capitalism

in a matter of

for the better

Key Sentences

Later, the wheel was utilised for transportation after the **domestication** of the horse.

The wheel has also allowed the transfer of messages over great distances and **facilitated** the birth of the modern transportation system.

Without this invention, globalisation could not have occurred on the scales that it has **in the past millennia**.

And they have even helped create a system of **global capitalism**.

It helps us cook our food **in a matter of** minutes and helps us get to work in an equal amount of time.

I think modern technology will change our work patterns **for the better** in the future.

The next lesson will be **Unit 8 Topic 5 An app. you think is useful.**
