

51Talk IELTS Speaking-Advanced

雅思口语高级

——冲刺 7.5 分

Unit 8 Technology and invention

Topic 5— Lesson 2(下篇)

An app. you think is useful

IELTS Speaking Part 2 (10 minutes)

You will be given one minute to prepare to talk about the topic on the task card. You will have to talk for 1-2 minutes, and then the teacher will give you feedback for 2-3mins. (5 minutes)

Describe an app. that you think is useful.

You should say:

what app. it is

what contents it has

how you use it

and **explain why** you think this app. is useful.

Tips: During the first stage of Part 2, you don't need to talk. Keep the questions in mind and think them over.

2.3 Here is another model for the IELTS Speaking Part 2. We will focus on the words and expressions highlighted and in red below. (5 minutes)

Model 2

What is the app: An app. that I have downloaded and never regretted the decision is a sleek **antivirus app.** called Mobile Security & Antivirus from AVAST Software Company.

What are its contents: The contents of this programme are similar to other security apps. **It has tools aimed at protecting your devices from any outside influence in the form of malware.** What really sets this programme apart from **the multitude of** other security apps. is that this one is free, while also being comprehensive.

How you use it: Most of the features included in this app. are passive and merely run in the background. However, I do manually scan my device at least once a week to **double check** for hidden viruses, because **as you know** some malware is quite difficult to detect.

Why you think this app. is useful: Our devices are important in our day-to-day lives and quite often contain important data within them, especially if we have sensitive information stored on our phones. There are far too many malicious entities out there in the digital world, so it is vital to make sure we are protected with some kind of antivirus software installed on our mobile devices.

IV. IELTS Speaking Part 3 (10 mins)

1. Please answer the following question from Part 3. According to your answer, the teacher will give you feedback on how to improve your organisational skills. (5 minutes)

How to organise your answer in Part 3:

T: Topic Sentence + S: Supporting Details (Explanation/Examples)

Do you think phone charges are reasonable in china? And is the phone charge too high for international phone calls?

T: I do believe that phone charges for domestic and international calls in China are reasonable enough for the following reasons.

S1: As for domestic phone calls, the phone charge is relatively low and almost everyone can afford it. It is because China's telecommunications industry has developed fast during the past few years, and advanced technologies allow making phone calls an easy and economical practice.

S2: When it comes to telephoning people outside China, it will always be expensive due to sheer distance. You are accessing another country's telecommunication resources, which means you incur their fees and your own carrier's fees. This is quite normal in regards to the telecom industry.

2. You will learn some key words and expressions from these questions. Pay attention to the structure of the underlined sentences, and the words in red. (5 minutes)

Key Words and Models

Do you think landlines will be replaced by cell phones one day? Why or why not?

This depends on different types of establishments and for what uses. For businesses there will always be a need for landlines as they tend to be a more reliable way to communicate with clients. However, for individuals cell phones are much more useful. There is no need **whatsoever** to own a landline at your home, especially since almost everyone owns a cell phone. Therefore, I think landlines that are in use in one's home are set to be replaced by cell phones in the near future.

Do you think cell phones will be replaced by some other unknown high-tech stuff some day?

I think technology is always evolving and advancing, so in the future cell phones will definitely be replaced by more efficient devices. I can imagine devices being the size of a small coin and emitting **holographic images** with audio played through **implanted ear pieces**. In the distant future. I can even imagine brain-to-brain interfaces that utilise telepathy for communication between people. Certainly, more and more magical technologies will emerge.

V. Summary (5 minutes)

Key Words & Expressions

antivirus app.

the multitude of

double check

whatsoever

holographic image

implanted ear pieces

Key Sentences

An app. that I have downloaded and never regretted the decision is a sleek **antivirus app.** called Mobile Security & Antivirus.

What really sets this programme apart from **the multitude of** other security apps. is that this one is free, while also being comprehensive.

However, I do manually scan my device at least once a week to **double check** for hidden viruses, because as you know some malware is quite difficult to detect.

There is no need **whatsoever** to own a landline at your home, especially since almost everyone owns their own cell phone.
