Unit 8 Technology and invention
Topic 6— Lesson 2(下篇)

An item of technology that you couldn't do without

IELTS Speaking Part 2 (10 minutes)

You will be given one minute to prepare to talk about the topic on the task card. You will have to talk for 1-2 minutes, and then the teacher will give you feedback for 2-3mins. (5 minutes)

Describe an item of technology that you couldn't do without.

You should say:

what the thing is

how often you use it

what difference it makes to your life

when you bought this particular piece of technology

why it is so important to you.

Tips: During the first stage of Part 2, you don't need to talk. Keep the questions in mind and think them over.

2.3 Here is another model for the IELTS Speaking Part 2. We will focus on the words and expressions highlighted and in red below. (5 minutes)

Model 2

What the thing is: A piece of technology I could not live without is my television. This technology has gone through multiple stages of **progression**, from the mechanical version in the late 1800's to the digital TV in our homes today.

How often you use it: Honestly, I spend too much of my time being entertained by my television. I probably watch TV for around two hours every day!

What difference it makes to your life: I suppose the main difference it makes to my life is by giving me something to look forward to after work. There are so many excellent programmes that I can watch on my television, that I always have something interesting or even educational to view in my free time.

When you bought this particular piece of tech: The first TV set I ever bought was a 40-inch plasma. Actually, I bought it for my dorm room for my first year of college.

Why it's so important to you: The entertainment value alone is enough to **justify the importance of** the television in my life. Watching TV is a type of **escapism** allowing me to forget the troubles of the day and dive into a fictional world. I am really looking forward to the day when the TV is more immersive and perhaps even utilises virtual reality!

IV. IELTS Speaking Part 3 (10 mins)

1. Please answer the following question from Part 3. According to your answer, the teacher will give you feedback on how to improve your organisational skills. (5 minutes)

How to organise your answer in Part 3:

T: Topic Sentence + S: Supporting Details (Explanation/Examples)

How do you feel about computers? What influence do you think computers have on kids?

T: I have a mixed feeling towards computers, because although they are useful, they may also do harm to people, especially children.

S1: Kids that own computers and have access to the Internet might believe whatever they read online. This can cause kids to believe in harmful ideas like racism or terrorism.

S2: Computers can also be used to lure children away from their parents and put them into adult situations and possibly danger.

2. You will learn some key words and expressions from these questions. Pay attention to the structure of the underlined sentences, and the words in red. (5 minutes)

Key Words and Models

Do you think computers' bright side overshadows/outshines their dark side?

It really **boils down to** the person using the tool. Similar to other tools, their uses depend on the person wielding them. If a person that has good intentions is using a computer, they are using it for noble purposes, such as the pursuit of knowledge or communicating with a loved one. If a person that is considered evil is using a computer, they may be using it for criminal purposes, such as identity theft or posting underage pornography. Luckily, there are more good people using computers.

How to overcome the dark side of computers?

This is a topic that only politicians and law enforcement agents can answer. The only way to **lower the crime rate** that relates to computers is to have extensive government policies that **address the core issues**. Once a government decides on the proper way to handle these types of crimes while ignoring extreme opinions on the subject, law enforcement agencies can effectively overcome the dark side of computers.

V. Summary (5 minutes)

Key Words & Expressions

progression

justify the importance of

escapism

boil down to

lower the crime rate

address core issues

Key Sentences

This technology has gone through multiple stages of **progression**, from the mechanical version in the late 1800's to the digital TV in our homes today.

The entertainment value alone is enough to **justify the importance of** the television in my life.

Watching TV is a type of **escapism** allowing me to forget the troubles of the day and dive into a fictional world.

It really **boils down to** the person using the tool.

The only way to **lower the crime rate** that relates to computers is to have extensive government policies that **address the core issues**.

The next lesson will be **Unit 9 Topic 1 An important choice**.
