The Hardest **Natural Substance**

We are going to learn about diamonds.

**Warm-up****2** min

Do you wear any of the jewelry shown in the pictures below?

Who in your family wears the most jewelry?

**Reading****3** min

Read with the teacher and then answer the questions below.

Diamonds are some of the rarest stones found on Earth, for which reason they are regarded as **precious** stones. Most diamonds are clear, but they can come in different colors, too.

Do you prefer clear or colored diamonds? Why?

Reading

4 min

Read with the teacher and then move to Grammar Focus.

Natural diamonds are formed deep in the earth, where there is a lot of pressure and heat. Diamonds were **first** found in **India**, but nowadays, most of them are found in Africa.

Grammar Focus

- **first**: ordinal number of “one”. We use ordinal numbers to talk about the “order” of things or to define a thing’s position in a series.
- For most ordinal numbers the ending “-th” is used, but there are exceptions. e.g. one-first; two-second; three-third.
