

We are going to learn about physics classes in school.

Warm-up

2 min

How can you make these objects move?

**Reading****3** min

Read with the teacher and then answer the question below.

In **physics** classes this week, Eric has learned about what makes things move. His teacher taught him this **through** playing soccer and a Tug of War competition.

Do you like physics?

To be continued... >>

**Reading****4** min

Read with the teacher and then answer the question below.

Eric's teacher told him that when he played soccer, he had to kick the ball in order to move it. His kick is the **pushing** force. If he doesn't kick the ball, it will stay in the same place.

How else can you make a soccer ball move?

To be continued... >>

**Reading****3** min

Read with the teacher and then answer the question below.

During the Tug of War competition, Eric learned that he needed to use a **pulling** motion. Pushing and pulling are both **forces**.

How can we win a Tug of War competition?

To be continued... >>

Reading

4 min

Read with the teacher and then move to the Grammar Focus.

Eric **has learned** that objects only move when he applies a force to them. By using a pushing **motion** he can move something away from him, and by using a pulling motion he can move something closer to him.

Grammar Focus

- **has learned**: present perfect tense of “learn”.
- You use the present perfect tense to say that an action happened at an unspecified time before now. The pattern is: have/has + past participle of a main verb (learned, lived, etc.)
- **e.g.** He **has learned** that before.
He **has lived** there before.

Let's practice. >>

**Task****4**

min

Fill in the blanks by using the words from the Word Bank.

Eric learned what makes things move in his _____ class this week. He learned this _____ playing soccer and Tug of War.

The kick of a soccer ball is a _____.
Its opposite movement is called a _____.
These two actions are called _____.

By using a pushing _____ we can move something away from us.

Word Bank

motion
push
pull
forces
physics
through

Leadership

4 min

Discuss with the teacher.

Q1. What have you learned about physics?
I have learned that ...

Q2. What kinds of forces do you know?
There are ...

Q3. Can you name two actions that use
a push or pull?

In this lesson, we...

learned about physics classes in school.

learned new words.

☐ physics

☐ push

☐ through

☐ force

☐ pull

☐ motion
