

Helium Prime

We are going to learn about chemistry classes in school.

**Warm-up****2** min

Can you guess what will happen to the paper?
Will the colored water go into the empty glasses?

**Reading****3** min

Read with the teacher and then answer the questions below.

This is Carl. His family is walking him to school for his very first day, when suddenly he sees a man with lots of **helium** balloons in the sky. Carl starts to think about how the man is able to do that.

Where is Carl's family taking him?
What does Carl see in the sky?

To be continued... >>

**Reading****4** min

Read with the teacher and then answer the questions below.

Carl's first class of the day is **chemistry**, so he decides to ask his teacher more about helium. Carl quickly learns that it's an **element** in the periodic table and that it's a special type of gas that can be very useful.

What does Carl learn about helium?
Why is helium a special type of gas?

To be continued... >>

**Reading****3** min

Read with the teacher and then answer the question below.

Carl does more research into helium after class and learns that it's both **odorless** and **colorless**. He also learns that this special gas can be used to make balloons fly in the air.

What interesting things does Carl learn about helium?

To be continued... >>

**Reading****4** min

Read with the teacher and then move to the Grammar Focus.

Carl tries an experiment to make helium, but he fails to make any, as it's a **natural** element. Now that he **has learned** what makes balloons float in the air, he is excited about trying to find more natural elements.

Grammar Focus

- When we describe an action that happened at an unspecified time before now, we use the present perfect tense. The pattern is **have/has** + past participle of the main verb (e.g. **learned**).
- e.g. They **have finished** their homework.

Let's practice. >>

**Task****4**

min

Retell the story by using the words from the Word Bank.

1. Carl sees a man with lots of _____ balloons in the sky.
2. Carl's first class of the day is _____, so he decides to ask his teacher more about helium.
3. Carl does more research into helium. He learns that it is _____ and _____.
4. Carl tries an experiment to make helium, but finds that it is a _____ element.

Word Bank

natural
colorless
helium
chemistry
odorless

More challenges! >>

**Leadership****4** min

Discuss with the teacher.

Q1. What does Carl want to try?
Carl wants to ...

Q2. Can you see helium? Why?
Yes/No, because ...

Q3. What can you use helium for?
I can use helium to ...

**Wrap-up****1** min

In this lesson, we...

learned about chemistry classes
in school.

learned new words.

☐ chemistry☐ helium☐ element☐ odorless☐ colorless☐ natural
