Travel Faster and Further

We are going to learn how transportation has changed over time.

 Warm-up **2** min

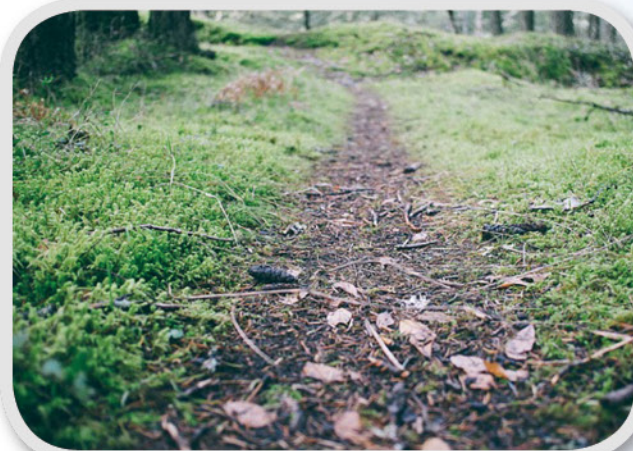

How can people cross a river?

**Reading****4** min

Read with the teacher and then answer the question below.

A long time ago, there was no mode of **transportation** or roads, so people could hardly travel from one place to another. If they had to travel, there were only **trails** for them to follow.

How did people travel without transportation or roads?

To be continued... >>

Reading 3 min

Read with the teacher and then move to the Word Focus.

After people learned how to **domesticate** animals, they used horses, oxen, and donkeys as modes of transportation. People either rode the animals, or arranged them to pull carriages. For people who lived near the sea or large rivers they built boats as a mode of transportation.

Word Focus

- People **domesticate** animals in order to keep them in their houses.
- Can tigers be **domesticated**?

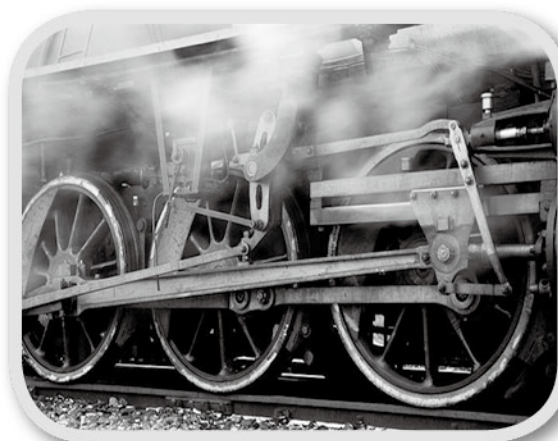

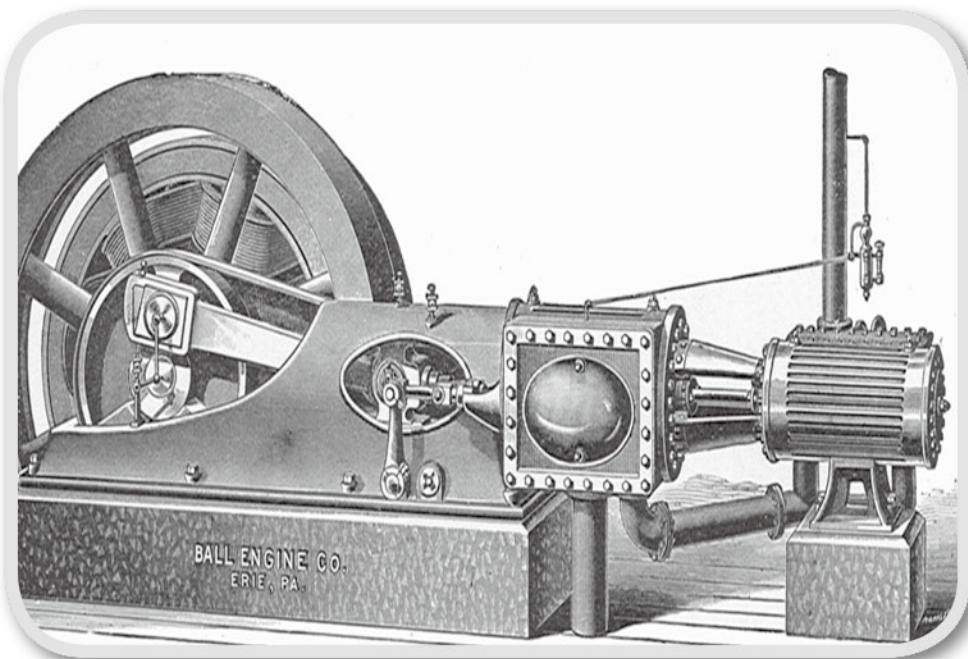

To be continued... >>

Reading 3 min

Read with the teacher and then answer the question below.

During the eighteenth, nineteenth, and twentieth century, many kinds of **engines** were invented and used to power different modes of transportation, such as trains, cars, and motor boats. After the Second World War, air transportation grew quickly and became the fastest way to travel.

Why were engines invented?

To be continued... >>

Reading 4 min

Read with the teacher and then answer the question below.

Nowadays, people can take **bullet trains** or **jumbo jets** to travel anywhere in the world, both quickly and comfortably. People's next step seems to be focused on being able to travel into space.

In the future do you think people will be able to travel to space for a holiday?

**Task****4**

min

Answer the questions by using the words from the Word Bank.

How did people travel a long time ago?

A long time ago, people ...
