Chewing Gum

We are going to learn how chewing gum is made.

**Warm-up****2** min

Do you like eating sweets? Which ones do you like best?

Reading

4 min

Read with the teacher and then answer the questions below.

Chewing gum is a type of candy loved by kids and adults alike, though for different reasons. While kids love to play with it and make bubbles, adults may use it to **freshen** their breath and relieve stress.

Do you like chewing gum? Why?

Reading 4 min

Read with the teacher and then move to the Word Focus.

Chewing gum comes in many colors and **flavors**, yet it is made from the same main **ingredients**: chicle, sugar, and flavorings. Chicle is a natural gum collected from several species of trees.

Word Focus

- All chewing gum loses its **flavor** after being chewed for a while.
- Which **flavor** of chewing gum is your favorite?

To be continued... >>

**Reading****3** min

Read with the teacher and then answer the question below.

The **process** of making gum is quite simple. Firstly, the chicle is melted down and cleaned of dirt and bark. Then, sugar and flavorings are added and mixed together. Lastly, the thick mixture is cut into little chunks and left to cool down.

How is chewing gum made?

To be continued... >>

**Reading****3** min

Read with the teacher and then move to the Word Focus.

The good news about gum is that people have discovered a way to make it without extracting chicle and hurting the trees. The bad news about gum is that the **synthetic** gum is not as healthy as natural gum.

Word Focus

- All **synthetic** things are made by people, not by nature.
- Is **synthetic** food healthy or unhealthy?

Let's practice. >>

**Task****4**

min

Use the words in the Word Bank to ask questions that match the given answers.

Q: What do kids love to do when they chew gum?
