

Eyes of the Night

The background of the slide is a dark blue night sky filled with stars. On the right side, there is a large, detailed illustration of an owl's face, looking directly forward with its large yellow eyes. On the left side, there is a smaller illustration of a mouse, also looking forward. The title 'Eyes of the Night' is prominently displayed in the center, with 'Eyes' in large yellow letters and 'of the Night' in blue letters.

We are going to learn about some animals' strong sense of vision at night.

Warm-up

2 min

What animals can you see?

51Talk
无忧英语

**Reading** 3 min

Read with the teacher and then answer the question below.

Can you imagine what it would be like to be able to see at night? Tigers and owls are some **nocturnal** animals that can see at night.

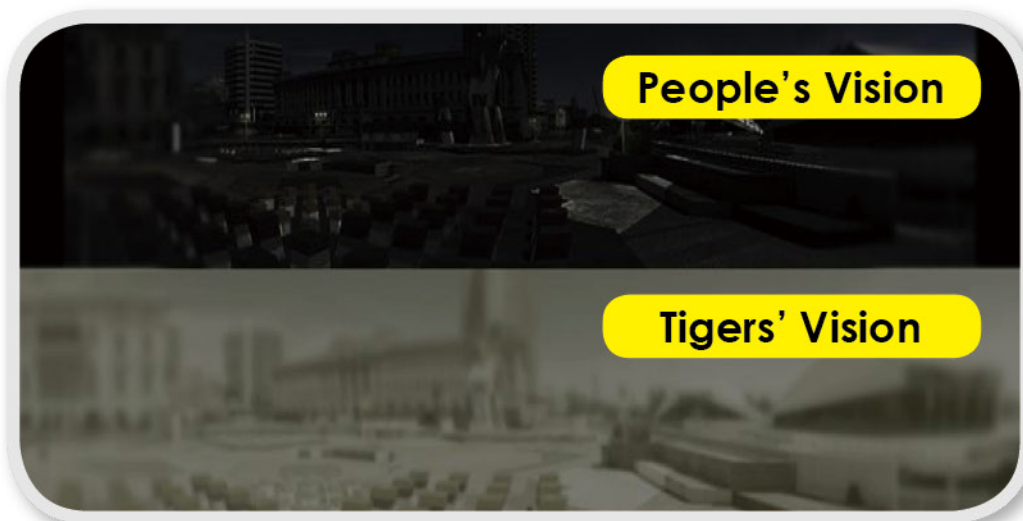

What can nocturnal animals do?

To be continued... >>

**Reading****4** min

Read with the teacher and then move to the Word Focus.

People find it hard to see at night because it's dark. But tigers have night **vision**, which means they can see clearly in the dark. Tigers use their night vision to hunt mainly during the nighttime, when the vision of their prey is weakened.

**Word Focus**

- The boy has poor **vision** so he cannot see clearly.
- Which animals have better **vision** than people?

To be continued... >>

Reading 3 min

Read with the teacher and then answer the questions below.

Owls have big eyes to let in more light so they can see better at night. Owls use their eyes to **spy** on their **prey** when it's dark. Both tigers and owls are excellent nighttime hunters.

Why do owls have big eyes? How does having big eyes help them?

To be continued... >>

**Reading****4** min

Read with the teacher and then answer the question below.

People have **difficulty** seeing at night, so night-vision **goggles** were invented to help them see even if it's dark. With the help of night-vision goggles, people can see someone standing 100 meters away on a moonless, cloudy night!

**Goggle View**

What did people make to help them see at night?

Let's practice. >>

**Task****4**

min

Unscramble the letters to make the correct words.
