Sign Language

Do you know what sign language is? Sign language uses hand movements, facial expressions and body posture to communicate.

Mostly the deaf and people who can hear but cannot speak use sign languages. There are 142 sign languages in the world, and new sign languages are frequently being created. There are many differences in sign languages.

Let's take a closer look at sign language. The simple "OK" sign is commonly used. In America, it means "fine". In China, people can use it as "no problem", "zero" or "three". But Japanese think it's money.

However, you should not use the sign in Turkey or Brazil, because it's rude. If you go abroad, you should learn some sign language there and be careful of using it.
