[1] At last **firefighters** have put out a big forest fire in California. [2] Since then, they have been trying to find out how the fire began. Forest fires are often **caused** by broken glass or by cigarette ends which people carelessly throw away. Yesterday the firefighters **examined** the ground carefully, but were not able to find any broken glass. They were also quite sure that a cigarette end did not start the fire. This morning, however, a **firefighter** accidentally discovered the cause.

1. At last firefighters **have put out** a big forest fire ...
➤ Use [present perfect tense] (have/has done) to show a recent event that has a result or an effect on the present moment.

E.g. (1) Someone has opened the window. (It's cold inside.)

(2) Tom has broken his leg. (He can't walk.)

2. Since then, they **have been trying** to find ...

- Use [present perfect continuous tense] (have/has been doing) to show that an action started in the past and is continuing in the present time.

E.g. (1) Have you been exercising lately?

(2) Jane has been teaching for 5 years.

Please turn to next page for remaining text.

TI: Listen and guide S through the text. Focus on explanations of sentences on the right.

He noticed the **remains** of a snake which was wound around the electric **wires** of a 16,000-volt power line. In this way, he was able to **solve** the **mystery**. The explanation was simple but very unusual. ^[3] A bird had **snatched** up the snake from the ground and then dropped it on to the wires. The snake then wound itself around the wires. When it did so, it sent **sparks** down to the ground and these immediately started a fire.

3. A bird *had snatched* up ... and then *dropped* it ...
(snatching at first, then dropping)

➤ Use [past perfect tense] (*had done*) to show the sequence (先后顺序) of two actions in the past.

E.g. (1) After he had graduated, he decided to study Spanish.

(graduating at first, then deciding)

(2) She had travelled a lot before she moved to Paris.

(travelling a lot at first, then moving)

(3mins)

D. Comprehension

1. *What are the common causes of forest fires? (glass; cigarette; which)*
2. *What did the firefighters know after examining the ground carefully? (sure)*
3. *How did a firefighter solve the mystery at last? (remains; wires)*
4. *How did the snake start the fire? (sparks)*

D. Comprehension

1. What are the common causes of forest fires? (glass; cigarette; which)
Broken glass or cigarette ends which people throw away carelessly.
2. What did the firefighters know after examining the ground carefully? (sure)
They knew that was not caused by cigarette ends or broken glass.
3. How did a firefighter solve the mystery at last? (remains; wires)
He noticed the remains of a snake which were wound around the electric wires.
4. How did the snake start the fire? (sparks)
When winding itself around the wires, it sent sparks to the ground and these started the fire.

Sentences

1. At last **firefighters have put out** a big forest fire in California.
2. Since then, they **have been trying** to find out how the fire began.
3. A bird **had snatched** up the snake from the ground and then **dropped** it on to the wires.

F. Extra exercise

■ Retell the text using the key words below.

1. firefighter - put out - fire in California
2. since then - find out - fire began
3. Forest fires - glass - cigarette ends
4. examined - couldn't find - broken glass
5. quite sure - cigarette end - not start
6. This morning - accidentally - the cause
7. remains - snake - wires - 16,000-volt power line
8. explanation - simple - unusual
9. bird - snatched up - dropped on to
10. When - wound - sent sparks - started

F. Extra exercise

- Check your answer against the text.

At last firefighters have put out a big forest fire in California. Since then, they have been trying to find out how the fire began. Forest fires are often caused by broken glass or by cigarette ends which people carelessly throw away. Yesterday the firefighters examined the ground carefully, but were not able to find any broken glass. They were also quite sure that a cigarette end did not start the fire. This morning, however, a firefighter accidentally discovered the cause. He noticed the remains of a snake which was wound round the electric wires of a 16,000-volt power line. In this way, he was able to solve the mystery. The explanation was simple but very unusual. A bird had snatched up the snake from the ground and then dropped it on to the wires. The snake then wound itself round the wires. When it did so, it sent sparks down to the ground and these immediately started a fire.
