

51Talk IELTS Speaking-Advanced

雅思口语高级

——冲刺 7.5 分

Unit 10 Media

Topic 3—Lesson 1(上篇)

A radio programme

I. Pronunciation Practice (2 minutes)

	Nationalities: (the words in bold should be stressed)	
	Spanish guys	Spanish girls
	Spanish restaurant	French toast
	Mexican food	Italian food
	Chinese teacher	American teacher
	English teacher	Biology teacher

Read the following sentences and circle the words that need to be stressed.

1. I saw two Italian guys on the street yesterday.
2. I went to a Mexican restaurant last week.
3. My favourite teacher is my English teacher.

II. IELTS Speaking Part 1 (8 minutes)

Extend your answer to 3-4 sentences. It's easier to get 7.5.

1. Imagine you are a candidate in the IELTS test. The teacher is an examiner. Please answer the questions below with what you have learned to develop your IELTS answers. (4 minutes)

What is your favourite subject, and **why**?

What's the most interesting thing about your subject?

Which subjects do you think are most useful for adult life?

The examiner will score your answer from the following aspects:

1. How good you are at **keeping talking** at the right speed and **connecting your ideas together**;
2. **How much vocabulary** you have and **how well** you use it;
3. **How many structures** you have and **how well** you use them;
4. How well you **pronounce** the language.

2. Read and learn the following key words and models for the IELTS Part 1. You are suggested to apply these words in the following steps. (4 minutes)

Key Words and Models

discipline

 *Example:* My favourite subjects are related to the scientific **disciplines**. Of all the courses related to science, biology is by far the most interesting to me. I suppose I love this subject because of the lab work that is involved. I love using a microscope and analysing different microscopic organisms. I also enjoy the thrill of creating models of chemical elements and labelling the various parts of cells.

grounded in reality

 *Example:* The most interesting thing about subjects in the field of science is that they require vigorous attention to details. Also, I like how subjects in science require all theories and hypotheses to be falsifiable, which ensures that experiments can be duplicated. Another thing I find interesting about science in general is that it is based on observations, thus making its subjects wholly **grounded in reality**.

initiate into

 *Example:* Schooling from a young age is extremely useful, and according to my viewpoint, all general subjects have a great effect on adult life. These common subjects are: maths, science, history, language arts, and social studies. In my opinion, having a well-rounded education that includes a combination of all of these subjects will benefit everyone when they become **initiated into** adulthood.

III. IELTS Speaking Part 2 (12 minutes)

1. Brainstorm. Plan your answers based on the given questions. (1 minute)

Describe a radio programme you like.

- What is the programme?
- When did you first listen to it?
- What was the content that attracted you most?
- Why do you choose this programme to talk about?

Tips: During the first stage of Part 2, you don't need to talk. Keep the questions in mind and think them over.

2.1 Here is a model for the IELTS Speaking Part 2. We will focus on the words and expressions highlighted and in red below. (8 minutes)

Model 1

What the programme is: A radio programme that I really love to listen to is called “*Stuff You Should Know*”.

When you first listened to it: I first started to listen to this programme online about a year ago. I still listen to this radio programme today, which goes to show just how much I actually like this show!

What content attracted you the most: This programme is **informative** by nature and I have always enjoyed learning new things. The show is updated constantly with new interesting and sometimes strange topics. For example, last week the show was about how vestigial organs work. There is nothing better than learning something new while you multi-task and this is exactly what this radio programme offers!

Why you chose this programme to talk about: I chose to talk about this particular radio programme because there are so many programmes out there that just focus on entertainment. I think learning is an **ongoing** process and that we owe it to ourselves to learn as much as we can and avoid wasting our time with things like **celebrity gossip**. In fact, being a loyal listener of this programme, I feel as if I have almost turned myself into an amateur scientist in the eyes of my friends.

You are required to talk for the full 2 minutes.

2.2 Imagine you are a candidate in the IELTS test. The teacher is an examiner. Please answer the questions below with what you have learned to develop your IELTS answers. (3 minutes)

Describe a radio programme you like.

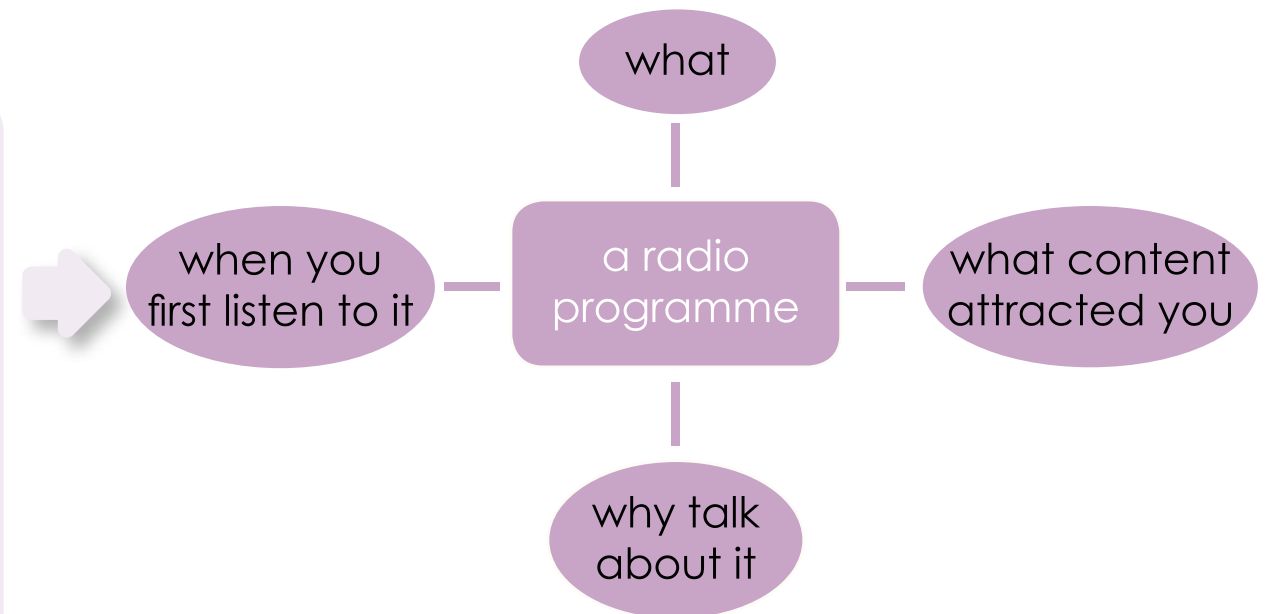

You should say:

what the programme is

when you first listened to it

what content attracted you most

and **explain why** you choose this programme to talk about.

Homework: Please use the model for these two topics for further practice.

Describe something you heard that is interesting.

Describe an educational programme.

Review (2 minutes)

Key Words & Expressions

discipline

grounded in reality

initiate into

informative

ongoing

celebrity gossip

Key Sentences

My favourite subjects are related to the scientific **disciplines**.

Another thing I find interesting about science in general is that it is based on observations, thus making its subjects wholly **grounded in reality**.

Having a well-rounded education that includes a combination of all of these subjects will benefit everyone when they become **initiated into** adulthood.

This programme is **informative** by nature and I have always enjoyed learning new things.

I think learning is an **ongoing** process and that we owe it to ourselves to learn as much as we can and avoid wasting our time with things like **celebrity gossip**.

You will learn more about this topic in Lesson 2.
