

51Talk IELTS Speaking-Advanced

雅思口语高级

——冲刺 7.5 分

Unit 4 Objects

Topic 6—Lesson 2(下篇)

A small successful company

IELTS Speaking Part 2 (10 minutes)

You will be given one minute to prepare to talk about the topic on the task card. You will have to talk for 1-2 minutes, and then the teacher will give you feedback for 2-3mins. (5 minutes)

Describe a small company you know that has been successful.

You should say:

what the company is

what the company does

how you know of it

and **explain why** it has been successful.

Tips: During the first stage of Part 2, you don't need to talk. Keep the questions in mind and think them over.

2.3 Here is another model for the IELTS Speaking Part 2. We will focus on the words and expressions highlighted and in red below. (5 minutes)

Model 2

What the company is: In the news, a really bright rising star is an interesting company named Oculus VR.

What the company does: This is an America-based company founded in 2012. This company is mainly engaged in designing a head-mounted display for **immersive technology** or **virtual reality** (VR).

How you know about it: Their product is geared towards gamers, whose main gaming machines are their computers. Since I enjoy playing computer games I was naturally interested in this type of technology. I've spent weeks researching this company and their product and much of the information I learned about this company came from their official website.

Why it has been successful: Not only was this small but promising company recently acquired for two billion dollars in cash, but it is also a most well-known organisation that is **pioneering** a new industry. Oculus VR is helping to make virtual reality mainstream and nothing is cooler than this immersive technology!

IV. IELTS Speaking Part 3 (10 mins)

1. Please answer the following question from Part 3. According to your answer, the teacher will give you feedback on how to improve your organisational skills. (5 minutes)

How to organise your answer in Part 3:

T: Topic Sentence + S: Supporting Details (Explanation/Examples)

In your country, which companies or organisations are good to work for?

T: In China the best companies to work for are large corporations.

S1: Any job for a Tech company is highly valued among Chinese citizens, simply because many people in China believe that working for a **multi-national corporation** (MNC) is a huge plus with great welfare benefits.

S2: People here also would love nothing more than to work for a SOC (state-owned corporation). These types of establishments always offer fantastic job security, which is an essential criterion of an ideal career.

2. You will learn some key words and expressions from these questions. Pay attention to the structure of the underlined sentences, and the words in red. (5 minutes)

Key Words and Models

Is it easy for young people to get jobs in these companies or organisations? If no, why not?

 In general, it is extremely challenging to get a job in these types of companies, since these companies are commonly recognised as the **best of the best**. They are quite demanding when it comes to hiring new employees. It is even more difficult for a young person to compete against seasoned veterans who also wish to work for these prestigious companies. The fact that there are several rounds of intense interviews also adds to the difficulty in securing a position at one of these companies.

What are the benefits and drawbacks of having many different kinds of jobs and careers?

 To be honest, there are both advantages and disadvantages. As for the individuals, having access to a multitude of jobs or careers gives them leeway in choosing what best suit their preferences, and in the meantime provides them with vast chances to secure their dream jobs as well. On the other hand, so many choices also need relevant specialists and **technicians** for an optimal match, but some newly-emerged intensive demands of the market can cause a severe lack of intellectuals within limited time, restraining the development of a country's economy.

V. Summary (5 minutes)

Key Words & Expressions

immersive technology

virtual reality

pioneer

multi-national corporation

best of the best

technician

Key Sentences

This company is designing a head-mounted display for **immersive technology** or **virtual reality** (VR).

Not only was this small but promising company recently acquired for two billion dollars in cash, but it is also a most well-known organisation that is **pioneering** a new industry.

Many people in China believe that working for a **multi-national corporation** (MNC) is a huge plus with great welfare benefits.

In general, it is extremely challenging to get a job in these types of companies, since these companies are commonly recognised as the **best of the best**.

On the other hand, so many choices also need relevant specialists and **technicians** for an optimal match, but some newly-emerged intensive demands of the market can cause a severe lack of intellectuals within limited time, restraining the development of a country's economy.

The next lesson will be **Unit 5 Topic 1 An interest or hobby that you enjoy.**
